Thread: [\[CRYM\] #1 Spreading Method #1 \[FREE\]](#)

Liquir - July 23, 2016, 9:33 am

Ok, So i'm just gonna give this out for free ?

What you will need:

A FUD RAT

A Binder

Patience

Synopsis:

Ok, so in this method, we will be targetting gamers specifically, and to do this we will infect indie games! I will teach you how to setup your own autopilot spreading method using the power of gamejolt.com

Step 1:

Ok, first of all, head over to <http://gamejolt.com/> and create an account. This website allows indie game developers to share their games to the public.

Step 2:

After you have created an account, look through some of the games on the site, and choose one. Download the game files, and preview images.

Step 3:

Now, bind your RAT to the game you just downloaded. We will be uploading this to gamejolt shortly.

Step 4:

Head on over to gamejolt, and create a game. Click on your profile picture in the top left, then click "Add Game". Follow the steps to create your game page. Make sure to upload the images we got earlier. I recommend you change the name of the game aswell.

Step 5:

Thats it! Now just wait for the slaves to role in! Of you want more slaves, you can always make a

youtube video sharing "your" game. This will grab attention. Another idea is sharing it on facebook.

Thanks for reading ?

This method is in a payed ebook. This is basically a leak but I guess I can't really think of it like that, just claiming it for his own is a bit scummy. Almost word for word from the ebook I'm thinking of. Won't leak name to hurt sales of the seller.

Tell me how it goes ?

SHAY89 - July 29, 2016, 1:28 pm

But what is the point? do you just download a game and reupload it with the same pictures and all? people are just going to see the game twice and download the one with the most ratings.

does it work? have anybody tested it? it seems like you might get a slave per week using this..
