Thread: [LetsFindPokemon.com | PokeVision CLONE | FULLY WORKING AFTER UPDATE!!!](#)

Drizzy?? - July 23, 2016, 9:29 pm

WE ARE CURRENTLY THE FIRST AND ONLY WORKING TRACKING SITE THAT WORKS POST-UPDATE!

Hello guys, I'm here to share my most recent project with you guys. I'm sure you've heard of all of the sites popping up that allow you to search for nearby Pokemon, but I can guarantee you you've never seen anything this easy and convenient. You play Pokemon GO on your phones. So why should you try and navigate a website that was clearly not optimized for mobile use? Here's where my idea takes place. A messaging-based program that tells you EXACTLY where Pokemon are based on your given location.

How it works:

*Head over to <http://letsfindpokemon.com> and enter your location (address, zip code, etc). You'll soon be redirected to a site containing Pokemon near that location.

Why am I doing this? I don't know.

Does it cost anything? Not for you, no. However, if you have any spare BTC you can donate to keep the site running, I'd greatly appreciate it. It costs around \$20 a month to run at the moment. Here is my BTC address if you can spare some change: 1MWL1c8Jdta1h3qDByx5osrNHnJfJfYEuC

Silicon Valley - July 23, 2016, 9:30 pm

Good job on your latest project Drizzy. I wouldn't hesitate to use this locator!

Drizzy?? - July 28, 2016, 3:00 pm

Updated the site with instructions and redid how the nearby pokemon are delivered to you. I encourage everyone to try it if you are a legitimate player (site and map are optimized for mobile use).

anajaf27 - July 28, 2016, 3:34 pm

Well it won't work for me cause I'm Canadian

murt - July 28, 2016, 3:43 pm

USA only as in for phone number or for full project? Good job bro!

Drizzy?? - July 28, 2016, 3:46 pm

(Jul 28, 2016 03:43 PM)murt Wrote: [\[CITE\]](#) USA only as in for phone number or for full project? Good job bro!

Just for the phone number.

OneEightSeven - July 28, 2016, 3:47 pm

Has anyone tried this? going to wait for other vouches :)

ImExpecting - July 28, 2016, 3:50 pm

What's the point of the Username and Password?

Drizzy?? - July 28, 2016, 3:51 pm

(Jul 28, 2016 03:50 PM)ImExpecting Wrote: [\[CITE\]](#) What's the point of the Username and Password? In order to access the API, it's necessary to have authentication.

Pew ? - July 28, 2016, 3:53 pm

I started using this and it's been really helpful. Good job Drizzy.

ImExpecting - July 28, 2016, 3:54 pm

Alright, thank you. I entered "New York" about 5 minutes ago and it has not said anything else since.

Drizzy?? - August 1, 2016, 1:06 am

We are now the FIRST and ONLY tracker to be running correctly after the new update!

Kekui - August 1, 2016, 8:30 am

What... No you aren't.

Skiplagged.com/pokemon is a tracker and it was released and still is working, before your tracker.

thecommoncold - August 1, 2016, 8:45 am

Locations returned were nowhere near me but all over the city (London, UK). Hard considering most spawns don't last a minute or two.

05317832892 - August 1, 2016, 8:48 am

It worked for me op, thanks for the share, I will add this to the cord finding thread.

Spoiler [\(Click to View\)](#)

[img]http://image.prntscr.com/image/9f26b6ae0eef49ad94a320c6ab0bde76.png[/img]

?Ladon Kkc - August 1, 2016, 8:53 am

i think this website will be usefull to some :) goodjob

05317832892 - August 1, 2016, 8:54 am

(Aug 1, 2016 08:45 AM)thecommoncold Wrote: [\[CITE\]](#) Locations returned were nowhere near me but all over the city (London, UK). Hard considering most spawns don't last a minute or two.

I would assume that this is for sniping because the locations are given as cords, not visual spots on a map.

Batidas - August 1, 2016, 9:05 am

Good job Drizzy, ty for share.

Cap - August 1, 2016, 9:18 am

Thank you for this, but I keep receiving a 404 Not Found error when I enter my zip code. I have yet to find a working nearby Pokemon searcher since the update. I also tried skiplagged and that isn't working for me either.

Kekui - August 1, 2016, 10:02 am

(Aug 1, 2016 08:30 AM)Bill Cipher? Wrote: [\[CITE\]](#) What... No you aren't.

Skiplagged.com/pokemon is a tracker and it was released and still is working, before your tracker. Just use SkipLagged it works 100% of the time, no problems like this site..

Lol nevermind, SkipLagged is officially dead, for me at least, thanks for the website OP

Drizzy?? - August 1, 2016, 10:17 am

(Aug 1, 2016 08:45 AM)thecommoncold Wrote: [\[CITE\]](#) Locations returned were nowhere near me but all over the city (London, UK). Hard considering most spawns don't last a minute or two. Try entering a more specific search location.

(Aug 1, 2016 08:54 AM)?Cam? Wrote: [\[CITE\]](#) I would assume that this is for sniping because the locations are given as cords, not visual spots on a map.

You can click the name of the Pokemon and it will open the location on a map.

WhistleFK - August 1, 2016, 10:20 am

Not working for me - just gives me a loading screen constantly.

DATAHOARDER - August 1, 2016, 11:42 am

Anddddddddd it's not working

ILikeHacking - August 1, 2016, 11:48 am

It's not even working... and there's tons of working ones out there.

Pillows - August 1, 2016, 11:50 am

The requested URL /NewPokemon/maps/bgpj.html was not found on this server.

Maybe you should double check the code somewhere?

DATAHOARDER - August 1, 2016, 12:04 pm

(Aug 1, 2016 11:48 AM)ILikeHacking Wrote: [\[CITE\]](#) It's not even working... and there's tons of working ones out there.

Direct me to them pleasee

Drizzy?? - August 1, 2016, 11:15 pm

We are working once again. Hosting a PokeVision clone with a few added features.

BottomNotch - August 1, 2016, 11:51 pm

Works but when you change the location it doesn't load up what's around there, only at the OG location... skiplagged is also down now lol

EDIT: Oh, only for big areas it seems to be working? Was this specifically released just for pokesniping? Not actually playing legit? if that's the case, not a pokevision clone :(

Tree of Life - August 1, 2016, 11:58 pm

<https://pokestumble.com/> works for me

Drizzy?? - August 2, 2016, 12:18 am

(Aug 1, 2016 11:51 PM)BottomNotch Wrote: [\[CITE\]](#) Works but when you change the location it doesn't load up what's around there, only at the OG location... skiplagged is also down now lol

Unexpected traffic (currently 2300+ people using it right now) caused it to slow down a ton. Did not expect it to get so big within ten minutes of release, so I'm working on a fix now. Hopefully can be fixed by tomorrow night.

Leimone - August 2, 2016, 12:27 am

> Advertises as PokeVision clone

> Doesn't expect traffic

?

grail - August 2, 2016, 12:28 am

This looks really promising, going to check this out more later.

Haxel - August 2, 2016, 12:28 am

Looks really decent! Thanks for releasing this. ?

Drizzy?? - August 2, 2016, 12:29 am

I wanted to simulate Niantic's business model ;). Nah but it was my fault for not preparing for this amount of traffic.

KawaiiTheo - August 2, 2016, 12:40 am

Can you make it so that when I click the marker moves and reveals more pokemon?

m4r14n - August 2, 2016, 1:04 am

Is it only me or its down ?

Pindakokosnoot - August 2, 2016, 1:31 am

Yeah same here, if we could get the API. Thanks!

xLelouch - August 2, 2016, 2:22 am

Site is down at this time. Hope you will get better hosting

joshua.avacado - August 2, 2016, 2:25 am

"fully working" lul. site is down.

SuperPepijn - August 2, 2016, 3:51 am

(Aug 1, 2016 08:30 AM)Bill Cipher? Wrote: [\[CITE\]](#) What... No you aren't.

Skiplagged.com/pokemon is a tracker and it was released and still is working, before your tracker. I have never been able to get Skiplagged to work for me. It won't even change location.

Thanks OP, I can confirm LetsFindPokemon was working great yesterday, I guess it must be getting hammered with traffic right now or something.

King??? - August 2, 2016, 4:42 am

Unfortunately this has been the same problem that we had, system just wasn't ready for the ridiculous amount of traffic coming to the site!

Leimone - August 2, 2016, 4:50 am

(Aug 2, 2016 04:42 AM)King??? Wrote: [\[CITE\]](#) Unfortunately this has been the same problem that we had, system just wasn't ready for the ridiculous amount of traffic coming to the site!

I literally do not understand this post.

<https://twitter.com/PokeVisionGo?lang=en>, they have 780K followers, that's a FUCKTON. How can you NOT expect insane amount of traffic to the site? Pokevision likely had millions of visitors.

Is it easy to handle this amount of traffic? Probably not, Pokevision was struggling as well. But not expecting that traffic is just dumb.

King??? - August 2, 2016, 4:53 am

Umm we were around before PokeVision...

We got swamped with 500k views in 2 days, the craze for maps is mental and it's very hard to judge the capacity of your servers let alone the scripts that you are running, whether they will hold up with the ridiculous amount of data being stored at once.

In regards to the bottom of your post, I don't think you quite understand the concept of marketing. Just because Google goes down doesn't mean the users are coming to my site Foofle.

Leimone - August 2, 2016, 5:25 am

I am well aware how marketing works, and in this case it's crystal clear.

The most popular site goes down, EVERYONE will be looking for an alternative.

You guys show up, people will go to your site to check it out.

If the scripts are failing that's one thing, but the bandwidth should not be an issue.

Since PV went down, about 10 thousand clones have gone online. That is what you don't understand.

Leimone - August 2, 2016, 5:48 am

(Aug 2, 2016 05:37 AM)King??? Wrote: [\[CITE\]](#) Since PV went down, about 10 thousand clones have gone online. That is what you don't understand.

What a silly excuse.

Literally the ones that matter are:

Trackemon, skiplagged, yours & this.

DonD - August 2, 2016, 6:25 am

Will it be up again anytime soon?

What are other good alternatives?

DamienVC - August 2, 2016, 6:56 am

Pretty much useful places, thanks for the site, might leave my bot near some Pokemon nests for evolving them later.
