Thread: [\[Video\] Pokemon Go - GoBot Tutorial](#)

FractumSeraph - July 24, 2016, 8:22 am

This is the second Pokemon Go bot I've covered. This one is much more user friendly. You can find the thread for Necrobot [here](#).

[Video: <https://youtu.be/YQR41u07-qk>]

You can download the bot [here](#).

Frequently Asked Questions

What settings are you using?

[\(Click to View\)](#)

These example settings will keep any pokemon it catches that is either 1200CP, or 95IV. Anything else will be transferred.

Where are good places to bot?

[\(Click to View\)](#)

Tons of Pokestops:

35.6657052905, 139.753348874

Abra:

34.171102, -118.320120

Bulbasaur:

37.80794,-122.474

Dratini:

51.496308, -0.109325

33.312874, -111.920718

38.015007, -84.504289

33.782651, -118.28928

38.013622, -84.506774

38.555636, -121.237249

Charmander:

37.7916376, -122.388935

Drowzee:

51.509936, -0.118403

Electabuzz:

34.009304, -118.497005

Ghastly:
51.501693, -0.142273

Magikarp:
37.7916376, -122.388935

Magmar:
33.791578, -84.002176
51.2144, 4.46822

Pikachu:
41.905739, -87.7008263
51.88074, 0.91735

Slowpoke:
48.856752, 2.297515

Squirtle:
37.80794, -122.474

Let me know if you have any places you'd like me to add, and always remember to wait before teleporting far away. I usually wait about four hours.

Special thanks to [LaPanthere](#) for creating this bot!

GoFlex - July 24, 2016, 10:00 am

Perfecto! Thank you so much for this!!

Submit. - July 24, 2016, 10:31 am

Gonna try this out, could you please post a virustotal, I'm always scared when it comes to this shit, I trust you though :P

Thanks!

ThatsComplex - July 24, 2016, 10:42 am

Nicee going to try this one out.

Submit. - July 24, 2016, 10:49 am

I just downloaded it, working perfectly, quick question. I set my Long and Lat to Toyko where all the Pokestops are, but how do I teleport? I can't seem to figure it out.

Thanks!

FractumSeraph - July 24, 2016, 11:30 am

do i just use the 52ft one or the highest one?

EDIT: Also just curious, have you used all those cords before? or how do you know those are good spots for those certain pokemon?

Glide - July 24, 2016, 11:44 am

I cant get it to transfer pokemon. I set it to transfer all below 800cp/25 and its keeping low level pokemon saying that they are over the requirement. Any ideas what i am doing wrong ?. Also it evolved them even though i have it set to only evolve level 800 or greater pokemon.

FractumSeraph - July 24, 2016, 11:45 am

I've used about half of them myself, the rest of them have been verified by multiple Reddit users.

(Jul 24, 2016 11:44 AM)Glide Wrote: [\[CITE\]](#) I cant get it to transfer pokemon. It won't.

If you're on Android you can set your locations settings to Device/GPS only, then turn off your gps. Then log in to the app.

Not sure how to do it on iOS.

here maybe i'm doing something wrong <https://gyazo.com/c92eaf03cee43714597c3091118257c8>

kylefears12 - July 24, 2016, 8:24 pm

It won't transfer pokemon or catch pokemon, it was when i first did it, now its not. I selected about 60 pokemon to catch on the chart, then set the level to over(CP/IV) - will transfer rest 600 0 and for transfer selected i chose 60 random pokemon and chose CP/IV 600 0 Hpw do i fix this?

Also, isnt 15km/h too fast to catch pokemon? I am in aussie, and am not cacthing any at that speed, well almost none. I set walk speed to 5km/h. will that do? or 15km/h is fine?

lpre30 - July 24, 2016, 10:44 pm

How do I turn off the Bot when I am done? does it always stay running?

Cecilia - July 24, 2016, 10:48 pm

Thank you for the tutorial.

Simply press stop and wait for it to stop or hard stop it using the "X" button in the right hand corner.

Kuso - July 24, 2016, 10:50 pm

So far I really like this bot. Unlike most of the other bots or builds I have used, the first run went 6hrs without any interruptions or errors. I am gonna sleep soon and time to see how long the bot can run without stopping.

?I??? - July 24, 2016, 11:10 pm

Unfortunately because the API is built in 4.6.1 version of .net you will need it.

Go and visit the .NET fixer that Microsoft made, might be able to help you.

ninehell88 - July 25, 2016, 12:38 am

Hi, i have question. My bot only have 40 distance left to target. Does it mean my Bot only moving around the target location? how do i change it again to normal? i did force quit GoBot and press start but the distance still stays 40m left..if my bot really stays near target. i will make new target which have more pokestops with poke lure. any thought on this? thanks for making this software

Cecilia - July 25, 2016, 1:54 am

What do you mean?

No, it does not move around the 'target' location.

The target location changes as it is NOT your location that you set but each pokestop around the

location you set.

It walks to the pokestop (directly) so it counts down.

If it says 'we are within 40m of target, slowing down' then it is slowing down to avoid missing the target.

chr0matic - July 25, 2016, 2:07 am

Got me set up thanks for this!

HeisenbergX - July 25, 2016, 2:16 am

Thanks for the post and the tutorial :)

Hi Sir LaPanthere, So basicly our avatar just moving from pokestop to other pokestop around the location that i set? Because i saw tutorial video, the author use location of great lawn oval and Central Park New York location. I assume the author wants his avatar to move from Central Park to Great Lawn Oval. I did set my location around 5th avenue because i knew that location has many pokestop with pokelures in it. Is our bots will capture all pokemon from the pokelure? And i also set catch all pokemons with Over 10 CP/IV. does it mean Bot will catch pokemons with 10+ CP and 10+ IV? becuz author in video set catch requirement 50 cp and 50 iv. I am so sorry didnt understand this part. probably it will affect my statistic result

My Settings:

Latitude: 40.765261

Longitude: -73.972356

Altitude: 147

Walk Speed : 5m/ sec

FractumSeraph - July 25, 2016, 5:03 am

When the bot first starts, it will be exactly where I choose. After that it will start moving wherever to get to pokestops. If I left it going long enough it could eventually end up in California.

Bots are unable to see lured pokemon as far as I'm aware. So lures aren't any good to them. The

same thing goes for incense.

Setting it to such a low number is going to make your inventory be filled with tons of pointless pokemon. I usually set my minimum IV at 90 or 95. Your minimum CP will change depending on your level.

TeutonMaster - July 25, 2016, 7:48 am

hi i want the bot to catch everything and keep anything above 400 cp. also i want to keep pidgeys, magicarps and few others <400 cp.

first i tried

Evolve: nothing selected

catch: all

transfer: pidgey, magicarp, etc.. and i checked INVERSE.

over (cp/iv): 50/25

over (cp/iv)- will transfer rest: 0/50

Below cp/iv: 400/25

That didnt seem to work so i removed the inverse and manually seleceted every other pokemon.. its still not working.. its transferring most pokemon but not others..

its also removing pokemon with a cp higher than 400..

any ideas on how to set this up properly would be greatly apprecieated

Sta.ze - July 25, 2016, 7:56 am

You have one of those voices I could listen to for days

Cecilia - July 25, 2016, 8:10 am

(Jul 25, 2016 07:48 AM)TeutonMaster Wrote: [\[CITE\]](#) hi i want the bot to catch everything and keep anything above 400 cp. also i want to keep pidgeys, magicarps and few others <400 cp.

You cannot have the 'extra' bit's like the 'keeping of x below my requirements too!'.

When it is caught, it also transfers dupes so make sure your transfer settings are below what you want.

Catch CP: 400

Catch IV: 80

Catch: ALL

Transfer CP: 350

Transfer IV: 75

Transfer: ALL

ninehell88 - July 25, 2016, 8:22 am

Thanks. its clear now. i had some question regarding function and button from this tool. Does this bot spare 1 of each species pokemon? What does inverse do? Difference of Teleport and No delays? Some specific pokemon like tangela, electabuzz, magmar didnt have candies shown even i catch many in game..is this bug? I notice this bot will transfer same species starting from lowest cp ignoring IV requirements (that means if i had 2 magikarps. 1 with 90 cp 95% iv and 1 with 130 cp 20% iv...it will never transfer the magikarp with 130 cp and 20% iv..it stuck on 90 cp and 95%)

Sorry for making question again..Thanks!

Triops - July 25, 2016, 9:01 am

Wouldn't going to one of those locations listed get you banned if you are too far away from it? I really have no clue how to go there without waiting for my person to walk all that way.

FractumSeraph - July 25, 2016, 9:50 am

(Jul 25, 2016 09:01 AM)Triops Wrote: [\[CITE\]](#) Wouldn't going to one of those locations listed get you banned if you are too far away from it? I really have no clue how to go there without waiting for my person to walk all that way.

That's why you need to wait a few hours before starting it.

If I'm playing in California, log off for five minutes, and then I suddenly start the bot in New York, it's going to be obvious that I cheated. Nobody can get from California to New York in five hours. But If I wait six hours before starting the bot in new york, as far as pokemon go is concerned I just took a plane there.

So just make sure you factor in travel time.

(Jul 25, 2016 08:22 AM)ninehell88 Wrote: [\[CITE\]](#) Thanks. its clear now. i had some question regarding function and button from this tool. Does this bot spare 1 of each species pokemon? Sorry for making question again..Thanks!

Inverse will select everything EXCEPT what you have selected. If you only select magikarp in the catch list, but then you tick the inverse box, it will catch everything except magikarp.

Do not turn on teleport or no delays, if you turn them on you will get banned.

It will make it to where you travel at the speed of light to every pokestop, and capture every pokemon the instant you see it.

For your other two questions (Does this bot spare 1 of each species pokemon? | I notice this bot will transfer same species starting from lowest cp ignoring IV requirements) I'll have to take a look, but it will be a few hours before I'm able to.

It's worth noting that for the conditions where you choose minimum cp and iv, if it meets EITHER ONE, it will still apply. It's doesn't have to match both.

s1N - July 25, 2016, 10:04 am

So, I just setup a new Account on PTC just to try this out.

Whats happening here: <https://pl.vc/11lt3f>

Why does it keep failing ?

Triops - July 25, 2016, 10:05 am

One other question I have is about egg hatching. I let the bot run and my incubated egg doesn't have any progress towards hatching it. Not even anything below 1.0 KM.

Nevermind, I realized it was giving the distance in Meters and not KM on the bot.

junior17 - July 25, 2016, 10:17 am

My goodness, thanks to you and LaPanthere!

FractumSeraph - July 25, 2016, 11:18 am

I've heard a lot of problems like that using Ptc accounts, perhaps try creating a google account to see if it still happens? It's impossible for me to tell what's happening with the Ptc accounts.

Triops - July 25, 2016, 11:23 am

Alright, so I had the Bot active for around 30 minutes and my eggs didn't get any closer to hatching. Is there a bug with hatching eggs?

FractumSeraph - July 25, 2016, 11:26 am

(Jul 25, 2016 11:23 AM)Triops Wrote: [\[CITE\]](#) Alright, so I had the Bot active for around 30 minutes and my eggs didn't get any closer to hatching. Is there a bug with hatching eggs?

Eggs only hatch if you're going at a really slow speed. Set the KM/Hour to 15 if you're trying to hatch them.

Triops - July 25, 2016, 11:45 am

Alright, i'll try that to see if it works. I might have had it at 20 km/h. Can't remember.

lokoo34 - July 25, 2016, 11:52 am

I'm looking at your image and I have a suggestion. Uncheck the pokemon to evolve option and if you get enough candies you can evolve them manually on the bot. That might help it.

What does 'Under Requirement' mean? It keeps transferring Pokemon I don't want it to even though they're over 50 CP.

bonyo - July 25, 2016, 1:13 pm

Works perfectly, cheers bud

Regan - July 25, 2016, 1:14 pm

Posting here for later cheers mate.

I've got these settings but I'm still only getting 6k XP

I've got the bot set in central park too

Or am I reading that number wrong?

junior17 - July 25, 2016, 5:23 pm

So i just started the bot, and it bans me immediately.. the pokemon keeps on getting away :(i didn't teleport, i used google directions. Can anyone help with settings?

Triops - July 25, 2016, 5:27 pm

(Jul 25, 2016 05:23 PM)junior17 Wrote: [\[CITE\]](#) So i just started the bot, and it bans me immediately.. the pokemon keeps on getting away :(i didn't teleport, i used google directions. Can anyone help with settings?

It banned you immediately? Were you using it in your own area or did you enter the coordinates for some place out of state?

junior17 - July 25, 2016, 5:32 pm

(Jul 25, 2016 05:27 PM)Triops Wrote: [\[CITE\]](#) It banned you immediately? Were you using it in your own area or did you enter the coordinates for some place out of state?

I have teleported manually to central p*rk, ny before. And waited 4 hours, and then manually logged in to my account, tried to catch some pokemon and it worked. But then, i opened the bot, entered the central p*rk coordinates, and just start away.. I retrieved the first pokestop, soon after that the bot spotted some pokemon and it just got away like 4 times..

Triops - July 25, 2016, 5:40 pm

(Jul 25, 2016 05:32 PM)junior17 Wrote: [\[CITE\]](#) I have teleported manually to central p*rk, ny before. You don't use the Teleport option, you just get the coords for Central Park and type them into the Bot. But you have to have your app shut down entirely for a few hours before doing it. Otherwise they'll notice that you went from your local area to NY in a matter of minutes.

junior17 - July 25, 2016, 5:58 pm

(Jul 25, 2016 05:40 PM)Triops Wrote: [\[CITE\]](#) You don't use the Teleport option, you just get the coords for Central Park and type them into the Bot. Ah i just saw that this kind of question have been discussed in necrobot thread, i'm sorry! Thanks for your help btw, much appreciated?

lauraapp80 - July 25, 2016, 9:51 pm

I downloaded the bot, unzipped, downloaded .NET, and when I go to click on the GOBOT, nothing happens...

Expels - July 25, 2016, 11:34 pm

Bot is working nicely for me, the map is a nice implementation. Especially with the line showing where you were and where you're going and such. What's going to be new?

neakath - July 25, 2016, 11:42 pm

Hi, i got some problem with the settings i guess.

Event log tell me : Farming 0 pokestops... True
Looping PostLogin Again - Idle False

Thanks for the help

(I can't post screen sorry)

kalffrac - July 26, 2016, 1:01 am

Has anyone found a fix for the event log showing nothing but 0 for everything?

neakath - July 26, 2016, 4:15 am

Can someone tell me the settings to get 50k/h Thanks

Demize - July 26, 2016, 6:34 am

Got the account not verified error this morning and I just left it running and went to work is it safe to assume it'll work itself out while I'm at work?

liamcihra - July 26, 2016, 9:26 am

Hi, I'm getting the same error every time i try to start the bot. Here's the full error:

This happens regardless of whether I'm trying to login via gmail or ptc

I'm running windows 7 if that makes any difference

Sil3nc3 - July 26, 2016, 10:34 am

I keep getting this error, not sure what is going on: <https://puu.sh/qfelO/a179e7536e.png>

The bot isn't walking around anymore either, it was last night though. I did fall asleep while it was running, so it did walk around for like 10 hours...

Edit: Nevermind, my Pokemon storage was full (duh). I also restarted and that seemed to fix it (always restart!).

RedRabbit - July 26, 2016, 11:35 am

How do you change google accounts?

T0SH1 - July 26, 2016, 11:39 am

any recommended rdp to run this bot ? haha

Brama - July 26, 2016, 11:59 am

I'm a little confused to what exactly the the 3 Box settings in Pokemon Settings do. What are good general settings for these? I selected the only pokemon I want to evolve. (All the low easy fodder ones like caterpie, pidgeys etc etc)

I'm fine with transferring anything under 300 CP and less than 80 IV

But like Under Evolve selected (Over CP/IV)

This will evolve anything over the cp and IV I put in? So I Put like 5 CP 0 IV this will even evolve like a 95 CP event if it's not in the list of evolves I selected?

This is the one that really concerns me > Under Catch selected (Over CP/IV) - Will Transfer Rest

What exactly does the setting do? I don't want to accidentally have my high CP Pokemon transferred for setting this wrong.

I watched the video but the instructor just glossed right over these settings not explaining them.

FractumSeraph - July 26, 2016, 12:03 pm

What exactly does the setting do? I don't want to accidentally have my high CP Pokemon transferred for setting this wrong.

I watched the video but the instructor just glossed right over these settings not explaining them. That's part of the FAQ settings. The video is a quick run through of how to get the bot running.

Catch selected 900/90 will make the bot keep any pokemon over 900CP or 90IV. The rest will be transferred.

Quarkie - July 26, 2016, 2:23 pm

Keep getting the cycling error: Event Log loops through these three lines:

Looping PostLogin Again - Idle: True
Sorting through 0 pokemon to evolve...
Sorting through 0 pokemon to transfer duplicates...

It's a new account, not sure if I have to set it up manually and then begin botting?

kalfrac - July 26, 2016, 2:32 pm

(Jul 26, 2016 02:23 PM)Quarkie Wrote: [\[CITE\]](#) Keep getting the cycling error: Event Log loops through these three lines:

Manage to fix it at all?

Update: FIXED.

For those who live in high elevation areas, lower your elevation. My normal city elevation is actually ~1000M above sea level. Lowering it to 15M managed to trick the game into thinking I'm on the ground, not in a plane.

toanjuice - July 26, 2016, 2:53 pm

Sorry anyone know how to switch google accounts on the bot? checked everywhere, only guides for the necrobot to switch account

Brama - July 26, 2016, 2:59 pm

Oh Sorry didnt see the FAQ settings hehe xD

So after reading it definitely makes more sense. But one question I have is Magikarps. Magikarps Max CP is 262. Now since he only gets 3 CP per power up. I'd like to catch one with High CP and IV. So is there a way I could transfer all Magikarps below like lets say 250 CP and 95 IV while still being able to transfer all other pokemon who have CP lower then 500 and IV lower then 95?

Or do I just have to set it to 250 CP / 95 IP for all pokemon until I finally get the Magikarp I desire.

P.S. Thank you for sharing this. and For all your hard work and help.

Aeezakmi - July 26, 2016, 3:01 pm

Hello, im getting these errors: [00:45:11] Could not parse double: 41.905739)
[00:45:11] Could not parse double: -87.7008263)

Any ideas? Really.. Anything would help ;/ ?

P.S. Thank you for sharing this. and For all your hard work and help.

Unfortunately this can't be sets on a per-pokemon case. You'd probably be stuck setting it to 250/95 for everyone, unless a new update is released that chsnge it.

(Jul 26, 2016 04:11 PM)kylefears12 Wrote: [\[CITE\]](#) How did you get the lucky egg option? I messed

From some minor research I've done, it seems like my account DOES have a soft ban that could last anywhere from 3-12 hours. Despite what people advised, I changed locations multiple times from my home address to Central Park NY and then back again.

As far as the second account not working goes, I'm going to have to say that they linked the IPs or that there's a glitch in the bot, but it seems like linked IPs is more likely.

FractumSeraph - July 27, 2016, 12:14 pm

I've noticed that with GoBot recently. You get about 1/12th of the xp that Necrobot gives. But it's safer though.

Sutineur - July 27, 2016, 3:22 pm

is it possible to just farm one location like one spot with 4 stops and 24/7 lures up?
i know one but dont know how to set up the bot to stay just there.
amazing tut and bot anyway thx buddy

amazing tut and bot anyway thx buddy

Set the max distance to 1 meter.

Rare Air - July 27, 2016, 6:30 pm

Managed to go on my phone and catch a pokemon so I know my account is no longer soft banned, but when I start GoBot, I don't even find any pokemon now.

Quarkie - July 27, 2016, 7:18 pm

There was a new release about an hour ago that was supposed to fix the app crashing/erroring after about an hour of usage. Trying it now and will report back.

Dearrxx - July 27, 2016, 7:36 pm

Lol I need to check more often this topic or the download link from the bot. Got now the newest version. gonna take a nap

hope i can give somemore information after some hours!

with this new version i got a new line wich is in purple: Catching [number mostly 0] nearby Pokemon.

Does this just mean that there aren't at that moment any pokemons nearby. This line comes in 90 seconds 14 times isn't that a bit too much ?

Quarkie - July 27, 2016, 8:02 pm

Before, the client would run you to a specific pokemon, catch that pokemon, and pick a new destination. Now, it has the ability to catch pokemon on the way, that's what the purple line indicates. How many Pokemon are within (X) meters of your path to your destination, and there is an option to catch them.

Keep in mind it uses items quickly, but it's a really efficient way to catch things.

ninehell88 - July 27, 2016, 10:27 pm

Here's how to make GoBot Release 9 to work while we awaiting for Sir Panther to fix token issue.

1. Backup GoBot folder that works for u and has saved token in it
2. Delete GoBot application and GoBot.pdb from your previous GoBot folder which has saved token

in it.

3. Copy then paste GoBot application and GoBot.pdb from your New GoBot folder to Old GoBot folder.

4. Now you can enjoy GoBot release 9 with your old token.

Here's my log. I got Rhydon and pikachu from Nearby Pokemon feature:

[13:13:06] Catching 2 nearby Pokemon

[13:13:08] We caught a Rhydon with CP 1171 (73.33% perfection) using a ItemUltraBall

[13:13:09] Sorting through 4 pokemon to transfer duplicates...

[13:13:09] Did not Transfer Slowpoke (446 cp, 91.67%) (Over Requirement)

[13:13:09] Did not Transfer Pinsir (660 cp, 93.33%) (Over Requirement)

[13:13:09] Did not Transfer Zubat (10 cp, 91.67%) (Over Requirement)

[13:13:09] Did not Transfer Magikarp (50 cp, 96.67%) (Over Requirement)

[13:13:11] We caught a Pikachu with CP 449 (36.67% perfection) using a ItemPokeBall

[13:13:12] Sorting through 5 pokemon to transfer duplicates...

[13:13:12] Did not Transfer Slowpoke (446 cp, 91.67%) (Over Requirement)

[13:13:12] Did not Transfer Pinsir (660 cp, 93.33%) (Over Requirement)

[13:13:12] Did not Transfer Zubat (10 cp, 91.67%) (Over Requirement)

[13:13:12] Did not Transfer Magikarp (50 cp, 96.67%) (Over Requirement)

[13:13:13] Transferred Pikachu with 245 CP

xptrck - July 27, 2016, 11:46 pm

Please help.

I fucked up the settings and apparently the settings can't be adjusted.

I had a lot of pokeballs, greatballs en ultraballs, but now I literally have nothing in my inventory.

How can I fix this?

Tried downloading this bot on another computer but that didn't work.

Tried redownloading it on the same computer, didn't work either.

JefferiesLBO - July 27, 2016, 11:47 pm

nvm.....?????

xptrck - July 28, 2016, 12:03 am

Is there a way to reset the settings? My inventory's completely empty. Redownloading etc doesn't work. Really desperate. Don't have any pokeballs, greatballs or ultraballs now.

Same here. I'm actually getting it in 3 different bots.

Might be the Pokemon go servers going down.

Recordable - July 28, 2016, 12:48 pm

Does this bot support transferring of duplicate pokemon?

Fluppy - July 28, 2016, 12:58 pm

Im getting some sort of issue. "Looping PostLogin Again - Idle: False"

How can I fix this?

kylefears12 - July 28, 2016, 1:38 pm

I have the first GoBot and works fine for the most part. I think the newer updates may have issues. I would wait until Gobot is to a point where it is pretty much perfected before redownloading. I wish it had an option to use ultra balls. My bot uses great balls on high level pokemon, but there is no option for it. Does nercobot allow you to choose which pokemon to capture? My bot currently captures any pokemon nearby even though I only selected a few pokemon i want to catch, kinda annoying when a good pokemon is nearby, because usually goes for the closer one, then lose the good one.

justsee hacks - July 28, 2016, 3:44 pm

I would love an option to never transfer when the pokemon has a higher cp that the current in pokedex. I have for all Pokemon are transferred and sometimes happens to transfer a Pokemon with higher CP than at present.

Jayj71 - July 28, 2016, 7:30 pm

Hi,

I keep getting the following error:

Looping PostLogin Again - Idle: False

Is there any way to fix it? I am already using the newest version.
Thanks.

lauraapp80 - July 28, 2016, 7:35 pm

I am continually getting the following error: The server is up...
Exception (post login): Pokemon.Go.RocketAPI exceptions invalid responses
lapping post again

If this happens alot it means the pokemon servers are unstable...

But I am able to play on my phone.. HELP Please?

Jayj71 - July 28, 2016, 7:37 pm
