Thread: [\[CRYM\] Infinitum RAT \[FREE\]](#)

Liquir - July 24, 2016, 11:49 am

Infinitum

Before i start, i would like to point out that this RAT is meant for stability, and not features. The idea is that you spread with Infinitum, and then download & execute your RAT onto the clients.

Pictures:

Spoiler [\(Click to View\)](#)

Features:

Run file

- From Disk
- From Link

Control

- Keylogger
- Password Recovery

Misc

- Info
- Copy IP

Server

- Close
- Restart
- Uninstall

This is version #1 of Infinitum, i expect there to be bugs. If you find a bug, please PM me ?

Well, here is the download link ?

<http://www.mediafire.com/download/uv82zwcp4j86k6g/Infinitum.rar>

please leave some feedback, or some feature suggestions :)

If you would like to donate, PM me :D

Credits to the Xylos theme developer :)

I WILL NOT be adding:

Desktop Viewer
Webcam Viewer

Otherwise, good shit and good work. I will give this a look
I am uploading now :)

Good job dude, even tho there's not many features stability was the focus here.
Would love to see some feedback from people that use this.

GuRuHaX - July 24, 2016, 12:02 pm

Well , this really looks good and promising , ill be sure to bookmark this one and follow the updates ? .

A nice feature would be to be able to update your server as well.

Thanks for sharing this with the community , ill be sure to check out the code and see what i can learn from it !

If you download this , at least say thank you , takes 30 sec. (1 minute if your old like me) may not mean a lot for you but it can to the person who has put time and effort into this ?

?

Nice UI and easy to use plus perfect for beginners in Ratting like ME ?. Thank you for this mate ?

killad922 - July 24, 2016, 9:24 pm

Slick looking UI man. Keep up the high quality work! Its amazing that you've given this hard work out for free, again, good job man.

aesad - July 25, 2016, 3:05 am

Works great. You should change theme. Its very laggy.

Will come back for this at a later time when it has progressed much, But well done looks good atm.

Liquir - July 26, 2016, 1:36 pm

Looking for a new there, similar to Xylos, Xylos is laggy, Aether is buggy. Any other themes with the same style as these?

Phurkus - July 26, 2016, 7:59 pm

~~~

i dont understand the advantage of spreading with this first, and then downloading the other rat stub to the client.

is spreading with this method more discrete than other rats?

stub is smaller?

The stub is 80kb, compared to other rats, at 400kb. This RAT is very stable, meaning you wont loose your bots!

**2K2k** - July 27, 2016, 1:56 pm

Really love the simplicity.

Desktop Viewer

Webcam Viewer

Webcam I understand. Ok Coolio.

But why not Remote Desktop?

Thats the BASELINE for RATS, legal or otherwise.

But your Improving/adding DDoS functionality, okay.....?

Dude, pick a side.

I made a remote desktop, it just wasnt very good. I decided to make this rat stub as small as possible (Currently 60 kb)

Was this not disallowed on HF since recently?

I could be wrong, I never read a clear post about it.

Careful OP. ?

DDoS For Hire isn't allowed but tools with ddos functions as far as i'm aware aren't against rules.

It Is I was directly messaged to remove it from Orcus, advertisement especially.

No more SST/DDoS

This is brilliant and deserves more recognition! Exactly what I was looking for.

In case you take suggestions: A scalable GUI would be awesome!

This RAT is FUD or I'll need to use a Crypter?

It was FUD when i released it, scan the output to see the current detection rate :) I recommend you crypt anyways, as it is not runtime fud.
