Ok so alot of my friends from a clan forum liked my sig. And one of them told me to see if some one could make one for him. Ok here it goes,

OK the Forum is based on a game called day of defeat source a war game or wat ever.

He wanted a Day of defeat soldier(american) but if you cant get a Day of defeat soldier just use your imagination laying down ,crouching or having a 30 caliber MG machine gun laying down on somthing to shoot it With some muzzle fire coming out the end of the barrel which is the firish light coming out the end.

And somewhere he wants it to say Gunner kinda small not to big somewhere on it.

If you cant obtain a photo like that Just message me and i could most likely get one off the game. I would appreciate that if some one could do this. Thank you

I MOst likly could get a picture from the actual game of someone shooting the
