Thread: [PokeColor Download, no need to PM me for it](#)

Reporter - July 24, 2016, 3:56 pm

I get tons of private messages about it.

This is the one I use.

Its from Ryan before but he edited his post with a "new version" that is way harder to configure.

Virus total for these people who will say "Ayy my matey, u trying to give a virus arent ya?"

<https://www.virustotal.com/sv/file/8920942ced9d4edf81c0963ebb895fe03a4d2fd21122322347902eb1a3ef0573/analysis/1469400785/>

<https://www.sendspace.com/file/nqg4cb>

"But how do I use it" ?

Quote:You open the User.xml, you change the location

You can get yours here: <http://www.gps-coordinates.net/>

Open the bot.

Go to www.google.com/device

Login and enter your code the program gives you....

Now in PokeColor, you get a key, open User.xml and paste the key there, now let the bot run 24/7. enjoy....

???

Note. If you wanna bot with multiple accounts like I am, just create a new folder for every account you wanna make, not so hard ?

All the files and the ones you need to configure and open.

All pokemon ID's if you want them.

Thank you my matey! But what specifically are the differences between color and the other bots like Necro? Do any bots have a GUI so it makes it a bit easier for us to understand. It worked ok for me before, but sometimes I would get bag errors, or it wouldn't transfer. I was using Necro, the old version btw. It worked quite good for a couple of hours, but then I deleted it to use this one. Thanks!

Agreed. What does this bot offer that others do not?

I don't know the difference.

I use this one and it works.

Its no hard steps to configurate this one either, you just paste the location you want and enter the code to google device and your done ?

Also feel free to PM me if you need help configuring anything anyone.

I highly recommend poke color

Daddy Troubles - July 24, 2016, 4:04 pm

Most simplistic one out there IMO. Never had a problem at all with it.

Doesn't offer as much as the other one's but it clearly doesn't fuck up as much haha.

PokeColor still works great. The only thing is that you have to constantly empty out your bag, which is why I switched to PokeFast. Now I don't have to worry about having my bag full or any of that nonsense.

So what do I replace "none" with if I want pokemons with less of X ammount CP be transferred?

replace it with "cp" and the line below you put the amount of cp you want to transfer for example "500" anything lower than that gets transferred

quick example <https://imgur.com/maTDLGV>

(Jul 24, 2016 04:10 PM)Sapn1s Wrote: [\[CITE\]](#) So what do I replace "none" with if I want pokemons with less of X ammount CP be transferred?

Row 10 and 11

(obviously change row 10 to "cp" instead of leavestrongest)

iNk. - July 24, 2016, 4:19 pm

leaveStrongest will always leave the strongest pokemon of ANY pokemon you catch.

CP will transfer EVERY pokemon below the certain amount of CP you set.

Use inside your own country and you wont face softbans.

Teleport everywhere if you like but you will get softbanned for that so don't.

i got soft banned but it was because i made the mistake to go from LA to NY in 1 hour.

Try not to teleport so far in such little time. Make it always seem realistic

Damn, tried registering on PTC, but it won't let me :/ Anyway to bypass the error message?

With the exciting launch of Pokémon GO, there's an overwhelming demand for access to Pokémon Trainer Club accounts, including new accounts, profile changes, and password/username retrieval. Our team is hard at work improving support for these features. Until the work is complete, for a brief time, we'll be limiting the amount of access to these features. Please refresh your browser and try again.

You will need windows to open the program to run it.

Edit the User.xml with a text file editor. (Not with a webbrowser)

Probably because the other bots simulate walking speed (10 km/h) for egg hatching, while this does not. But you can farm xp / stops / pokemons a lot faster with this one. I have 3 accounts at level 30 currently in 2.5 days ?

EthanX - July 25, 2016, 5:20 pm

Mine is working fine except for the fact that it says " Unexpected stop? Restarting in 20 seconds. " every 1-5 mins.

Heard from other people that a fix is to change location to more populated area

Fistsworn - July 26, 2016, 3:11 am

So basically I download run the bot and put only my GMAIL access data+Location?

Thanks for answering!

Advertising on the DL, lol xD.

You will need to sign up on Pokemon trainer with your gmail account and use those details to login. It will give you a device key to enter and auth code to save

Yes it is safe and real. I used it since he created the thread and didn't have any issues. Good starter bot to use

Ryxan - July 26, 2016, 3:37 am

I would wish there was an option to transfer bag items. It is possible? thanks.

Not with this bot.

Either login manually once everyday to clear your inventory (Takes 30 seconds), or use a slower bot

Yes indeed, you just enter google auth code that you get + location you want and your ready to go ?

Where do you put the refresh token thing?

Fistsworn - July 26, 2016, 1:26 pm

Hey what do you do when it stops catching pokemons? Bot running but all pokemons are escaping...

Open up the app on your phone and clear the inventory because you ran out of balls.

Ayy my matey, u trying to give a virus arent ya?

Youngmetrohype - July 26, 2016, 10:10 pm

one of the greatest tools out, but i just have a quick question sometimes the pokestops don't actually work where it just says pokestop, it says that you didn't get anything from it and then after a few pokestops it goes back to normal. does that happen to u guys as well or is it just my thing?

I think it's because it tries to use the same pokestop twice

I keep pasting the refresh key into the user.xml & saving the file, but it keeps making me do the google device login screen.

SimonBeatdown - July 28, 2016, 1:42 am

I edditted the user.xml file and when i open the bot opens up ans say:
Please visit and enter

that all it say, pressing enter dose nothing

Bacardi. - July 28, 2016, 9:46 am

Did not edit the user.xml file but im getting the same as Simon.

that dont work.. it hasnt been giving codes all day lol.

Mitlar - July 28, 2016, 12:50 pm

I have a question. How do I get the code from the site?

Reporter - July 28, 2016, 1:57 pm

It might have been because servers has been down a lot today: <http://ispokemongodownornot.com/>

Try again please

I don't think this bot works anymore guys time to look for another bot

xMurqFuzionz - July 30, 2016, 6:13 pm

Is anyone able to update this bot with the new api?

Seasonal - July 31, 2016, 8:26 am

Bot no longer works, sucks it was the simplest one I could find.

adijostari - August 1, 2016, 12:07 pm

i found this bot and its working. i hope that this help. :D
