King of Hearts - July 25, 2016, 8:25 am

=====This is an introduction thread. The other thread is a support thread.=====

Edit: <https://hackforums.net/showthread.php?tid=5350906>

Hello,

Orgy and I would like to introduce you to an upcoming payment processing platform that will simplify and streamline selling digital products online. Before I introduce you to the platform, I'd like to introduce Orgy and myself.

Orgy

Orgy is a web developer and a system administrator that's done a lot of work and business with HF members over the past six years. He's run booters, hosting services, exchange services, and various other services.

King of Hearts

As for myself, although I do not like to do much development work for HF members, I have done quite a bit of work for Hack Forums. [One of my only public services was another payment processing platform called Sellan](#). Sellan was the first autobuy that supported crypto currency payments. I made Sellan back in 2014 when most people used Sellfy or Payhip to sell their ebooks. Back then, even HF didn't use coinpayments. I later sold the site to another member, who then rebranded it. My point here is that Orgy and I know what we are doing.

So what is Sellnow? Sellnow is an extremely powerful payment system that has been written from the ground up. Sellnow is a fully independent payment processing platform that allows you accept ether, bitcoins, Perfect Money and PayPal. We're planning to add several more payment methods in the near future. At the moment we allow for seller to sell files (e.g. zip files, pdf, .docx, etc), individual licenses/codes, and netseal products. Each product type comes with it's individual caveats that are extremely customizable. For example, should the pdf be stamped with the buyer's IP and email? Up to you. Should buyers be able to purchase multiple serials/codes? Up to you.

But that's not enough. The fact is that we live in a data driven world and we all crave data. Data helps us make our life easier. For example, as a seller, wouldn't you find it extremely useful if you knew exactly where your customers are coming from or how many times they look at a product before purchasing? SellNow.io offer these analytics. We have tons of graphs and will be constantly adding more.

Security

We're serious about security. All of our emails are signed with DKIM to verify origination. We encourage 2-Factor Authentication and offer email-based as well as Google Auth based 2FA, with

PGP based 2FA on the way. All data is encrypted during transport between servers.

Email marketing

We offer a powerful messaging system with your own email address (username@sellers.sellnow.io) where you can receive and send messages. We are also working on email marketing tools that will allow you to mass email your buyers for future updates/promotions with the click of a button.

We are also working on an extremely simple yet comprehensive affiliate system that will allow you, the seller, to easily track affiliates, how many product views they get, which site they get their referrals from, etc.

Sellnow is not a completely free service. We do take a small percentage of all Bitcoin/Perfect Money payments, and here's why: The reason I sold Sellan is that I was not making money. I agree that to make money you have to first lose a bit. However, I ended up having to sell Sellan. I do not want to make the same mistake again. Sellnow.io is going to be a leader in its field and in order to ensure that we can give the best service to our merchants, we have a paid tier as well. The payments from the paid tier will go back to the business and help us with things like purchasing secure servers and performing extensive, 3rd party, security audits.

Closed Beta Testing

Currently we're in closed beta as we prepare additional features and test them out. To follow along with development, make suggestions, ask questions, or bring up any other concerns, please use our [Development Thread](#). To join our closed beta, you'll need an invite code. This way we can sort of control the flow of users and fine-tune everything. If you can't find an invite, you can request one by [tweeting us](#) or via our [registration page](#).

Thanks,
Saad (KoH) and Rob (Orgy)

Definitely understand the discouragement -- the other sites around HF don't seem to charge a fee. But with everything we offer, we feel 5% isn't too much to ask for. Also keep in mind that we only charge that on BTC and Perfect Money. PayPal has no fee.

Aside from the marketing aspect, it allows us to control how quickly we grow right now. Sure, I send out a shitload of invites but let's be real: 2000 people aren't going to all see that and sign up. Being invite only means the rest of the masses can't quickly register and start using the site before we're fully prepared.

Sending out invites causes mass advertising and interest.

Smart move, something I thought Orgy wasn't capable of.

Travis Bickle - July 26, 2016, 7:35 am

@OP and Orgy, you should make this site free for the start, and once you build a customer base and a couple months in then implement the upgrades and 5% fee in my opinion, best way to do this if you are thinking long term.

Unfortunately, we do have bills to pay. Right now all "Voyager" features are enabled even for the "Apollo" plan that most people are on, so even though we charge 5% on bitcoin and perfect money transactions, you get all the features Voyager offers without paying the extra money. We also intend to take another look at Apollo plan to make it more enticing

Chargebacks in regards to PayPal is something that everyone deals with, whether or not you utilize a payment gateway such as SellNow. Using a payment processor allows you to provide further evidence in your dispute case as you're able to ensure the safe delivery of your digital goods through email.

Just a couple of things you might want to put on your to-do list:

Terms and Conditions, privacy policies, cookie policies, EU cookie consent (If you are working with EU customers).

The theme is okay, a bit bland it's not really drawing me in or really giving me the impression this is a professional site, so why would I trust you with my files/sales?

Is there an option to see what other people are selling? Regarding that, what are people even allowed to sell on here?

Analytics?

Overall, good start but a lot of work needs to be done.

Terms and Conditions, privacy policies, cookie policies, EU cookie consent (If you are working with EU customers).

The theme is okay, a bit bland it's not really drawing me in or really giving me the impression this is a professional site, so why would I trust you with my files/sales?

Is there an option to see what other people are selling? Regarding that, what are people even allowed to sell on here?

Analytics?

Overall, good start but a lot of work needs to be done.

Hey,

Thanks a lot for your suggestions.

We will be adding in proper support for the EU. This includes paypal currency as well as compliance with their cookie laws etc.

As for the theme, which part of the theme do you not like?

We are looking into doing a slight adjustment of our home page and it will include things like featured products, top selling products etc.

We offer a ton of analytics for your products and all the product reports are customizable, with respect to time frame, product range etc.

Thanks a lot for your feedback btw

The page does load fast even on very slow internet, which is a big positive. As for the theme I feel that you can try changing the black/grey to more blue and white.

As for the "Sellnow - a stress free payment gateway" this would work better as a tagline rather than the company name - using sellfy as an example: "Earn a Living Selling Your Digital Products" it's direct and it what they are all about.

I'd also remove the pricing table from the homepage, and replace it with what you are offering, such as the analytics, PDF stamping, email campaigns, etc. with a bit more information on what that actually is. Because at the moment all I am seeing is what I will have to pay. I'd be more likely to sign up knowing about all the awesome features I get.

The footer needs some work, terms, policy links, etc. (I know you are working on it.)

Would be nice to see a page of 'How it works' showing the dashboard and the analytics page, etc, etc. And all the users need to do is share a link and it goes straight to their product. You should also have a seperate Login and Sign Up link so that new users can easily get started.

Also, going from the first page you might want a contact us or an email so if needed users can ask you questions. I know you have Twitter/Facebook, but some prefer directly emailing.

That's about all I can think of now, will check back to see how it's going. Good luck.

Actually, no. What you are doing is sales thrashing. Please read the [Help Docs](#) (you've been around the block, you know where to find it).

Introducing Delivery Tracking

<https://sellnow.io> now offers a way to track orders. Get a disptue or a chargeback? You now have a tracking number you can provide to PayPal. Just one more reason you should sell now.

Seems like a really great platform for selling/buying. I wish you guys/girls the best of luck with it!

Menance - August 1, 2016, 2:58 am

This seems very interesting I will use this once I become high quality enough to release good working products.

I like the features sellnow.io has I just feel like it is still impossible to stop leaking even when stamping as people will just use a disposable email and vpn address.

Of course. There's never a way to fully stop leaking 100%. But we can make them go through more steps to do it

I'll be sure to update my signature with SellNow's graphics once my suspension is lifted.

KoH, hmu on Skype, have an interesting idea for you.

King of Hearts - August 6, 2016, 11:16 am

I've just redone the whole encryption part of serials. Now, there shouldn't be an issue with members seeing random characters.

I will be finishing up email marketing tonight and pushing that as well.

King of Hearts - August 9, 2016, 9:21 am

<https://sellnow.io/seller/marketing>

We now allow sellers to send marketing emails to their buyers. The emails allow for html. We also provide statistics for these email campaigns (e.g. number of times opened, number of times a link in email was clicked, etc). More statistics will be coming soon.

More sellnow features are in the works.

M?xim - August 9, 2016, 12:06 pm

Realized that I vouched on the dev thread instead of this one. Good job Maxim. Anyway SellNow.io is great and so is the people behind it. Glad that we could do some lil graphics together today. Best of luck.

At this point, we (and other similar sites) only log it.

In the future, we have plans to do more with it, for example, revoke download, add to fraud database/blacklist etc.

Fistsworn - August 10, 2016, 12:32 pm

Like how do I get in? Do I need an Invitation? Someone sends it to me? Or Do I wait? xD
So newb! But this looks so cool joining the Hype!

EDIT: Nevermind the Invitation was sent way fastr than I was expecting.

No more invitation system :)

Anyone can now freely register.

Just stopping by to let you know that you've got a spelling mistake in you thread title...

I think you meant to put "PDF Watermark" not "PDF Watermak."

?

Thanks. Let me know if you have any questions.

I added a feedback system last night, come check it out.

Should be back up. Let me know of any issues. All issues relating to updating and adding products etc fixed.

I apologize for the delays, seriously.

Will be getting back to people re: issues now.

But site should be back up and running smoothly.

Sent a message about some fixes that need to be addressed. The more everyone reports the bugs, the faster we all have a flawless system.
