Thread: [Sniping Pokemon without Soft-Ban](#)

Hydra - July 25, 2016, 12:40 pm

Okay, so I just noticed that not everyone knows how to snipe/teleport for a specific pokemon without getting soft-banned so let me share the secret trick with you all.

Download [Nox](#) - it comes with Pokemon Go app;

Go to settings and enable root. You can also change performance/quality settings and whatever else you think you'd want to do.

Get coordinates for your current location and the location you want to teleport to;

CTRL+3 or open the gps spoofer in Nox before you launch Pokemon Go app. If you use a bot, teleport to the location you set it in the bot so you don't get soft-banned. If you play legit but want to snipe a pokemon, set the coordinates to where you "are". It does not have to be exact, but it shouldn't be more than a few miles. The rule of thumb is teleport to/back to your "general" location.

Open the Pokemon Go app and let's begin the sniping process;

Enter in new coordinates to new location, click "Geocode" and then "OK" on the bottom. - DO NOT CLICK ON ANYTHING IN THE NEW LOCATION;

Click the pokemon you want to snipe after teleporting to the new location (assume Snorlax) BUT DO NOT CATCH IT JUST YET;

Let me clarify. You click on the pokemon, it will go to the catching screen where you can throw your pokeball. Once it goes to that screen, do not throw or click anything just yet.

Go to the gps spoofer and enter in original coordinates where you were previously at, click "Geocode", then "OK" on the bottom;

Now you may catch the pokemon however you'd like without getting soft-banned.

If you forget to teleport back, you WILL get soft-banned.

If you click on any gym, pokestop, etc. you MOST LIKELY (cbf to try it out) will get soft-banned.

If you do get soft-banned, don't blame me. I've been doing this ever since people figured it out and it works flawlessly for me. You can teleport anywhere, just make sure to teleport back once you click on the pokemon.

If you do get soft-banned, you'll have to wait 2-12 hours depending on travel distance. Teleporting from California to Florida will be a shorter wait compared to teleporting from Texas to Italy.

Unconfirmed "info" is that if you keep checking the account to see if you're soft-banned, it'll take longer. Make sure you check every 2-3 hours and not every 30 minutes.

Need coordinates for rare pokemons? Check this thread out:

<https://hackforums.net/showthread.php?tid=5353118>

Want a tool to snipe pokemons? Check this reddit post:

https://www.reddit.com/r/pokemongodev/comments/4ut5aw/sniping_tool/

monka - July 25, 2016, 12:44 pm

Awesome trick dude! Does evolving pokemons cancel out soft bans?

Delta - July 25, 2016, 12:45 pm

Wow thanks for this sick tutorial.

funtela - July 25, 2016, 12:50 pm

Damn this is a great tutorial I didn't know you can do that! What do you use to search for Pokemon though? I've never "sniped" before lol x)

Frankey - July 25, 2016, 12:51 pm

Nice tutorial. Learned a few new things. I hope I won't get softbanned because that would be bad :(Let's try it!

NodNod - July 25, 2016, 12:51 pm

Thanks for the tutorial, will try it out.

?Starfire? - July 25, 2016, 12:56 pm

You could use <https://pokevision.com> to check hotspots for what you want :)

Also great tut, I will definitely try it out!

CHAOS - July 25, 2016, 1:03 pm

That's an awesome tip man, gonna try this out now, trying to get that big fat snorlax wish me luck.

Hydra - July 25, 2016, 1:04 pm

Delta - July 25, 2016, 7:06 pm

Just to bump and verify. Tried and tested. Works 100%. Only tried once but it worked. Went from Santa Monica pier to the uk clicked on a Porygon went back to Santa monica pier captured it and wasn't soft banned. Nice method op.

Stashyy - July 25, 2016, 7:09 pm

I did this a few times before you made the thread.
I thought all people knew about this.

Vegeta - July 25, 2016, 7:11 pm

Gonna have to try this, always get bummed out when I see a thread with a good ass pokemon that I can't get because it's halfway across the US or over the ocean. Thanks OP!

Mr. Robot - July 25, 2016, 7:12 pm

Is that just because it registers the pokemons caught location?

Pooh Shiesty - July 25, 2016, 7:19 pm

Does this only work on nox? or can i do the same thing on bluestacks?

Hern - July 25, 2016, 7:19 pm

Man just got soft banned I am an idiot. Did not entirely understand the steps until after I messed up.

TL;DR

Once you are in the pokemon battle screen with your pokeballs able to be thrown out you change gps back to home.

Will try it again tomorrow haha

Pain - July 25, 2016, 7:21 pm

rip if only nox wasn't stupid for me and actually worked

Hydra - July 25, 2016, 8:28 pm

(Jul 25, 2016 07:19 PM)FREE GUCCI MANE Wrote: [\[CITE\]](#) Does this only work on nox? or can i do the same thing on bluestacks?

You can try it with bluestacks so long as you do the same steps.

Teleport > Click on pokemon > Teleport back > Capture pokemon

(Jul 25, 2016 07:12 PM)Mr. Robot Wrote: [\[CITE\]](#) Is that just because it registers the pokemons caught location?

I assume it's due to the system not registering location until any action is made which is why if you click on a pokestop, you will get soft-banned. I've seen my GPS on Google Maps screw up due to low signal and it puts me many miles away from where I really am so that may be why the system is designed that way. That's just an assumption, don't know the actual reason to why it works.

?nnie - July 25, 2016, 9:42 pm

Hopefully this will stop me from being soft banned! Thanks so much! Once I'm not softbanned anymore, I'm going to catch em all

junior17 - July 25, 2016, 10:20 pm

Thanks to OP! I will make sure i do teleport back to prevent from getting SB.

Secrets - July 25, 2016, 10:22 pm

Mhm , thanks op will give it a try. soft bans are annoying lol

?A5? - July 25, 2016, 10:33 pm

Thanks OP. This will help me out!

Ni??c??k - July 25, 2016, 10:59 pm

You're teleporting unrealistic distances without getting banned?

Why do I feel like this is bad. Lmao

Nice tut though.

Tostig - July 25, 2016, 11:11 pm

<https://gyazo.com/aa0c6c46202f4b773cd2e5b04a29da81>

i just get this

fuckin A

thiiird - July 25, 2016, 11:44 pm

can i do this while having a bot running?

Slay - July 25, 2016, 11:45 pm

woah thanks for the share, ima use this

?nnie - July 25, 2016, 11:46 pm

Should I geo and ok my location before opening the game?

Clockworks - July 25, 2016, 11:48 pm

Thanks for the tut! Its a shame nox is absolutely horrible for me.

Hydra - July 25, 2016, 11:52 pm

(Jul 25, 2016 11:46 PM)?nnie Wrote: [\[CITE\]](#) Should I geo and ok my location before opening the game?

Yea, it's recommended you do. I added it to OP.

Varane - July 26, 2016, 9:44 am

This thread deserves to be bumped, this is really helpful in catching rare pokemon.

Banana - July 26, 2016, 12:43 pm

When I type the coords in the coords box, I press ok and it still doesn't tp me

rd3600 - July 26, 2016, 1:01 pm

Damn this is sick, more people should do this!

Fatboy Slim - July 26, 2016, 1:02 pm

Works really well, great tutorial and idea, if it's yours. Hats off.

Shoppa - July 26, 2016, 1:20 pm

How do I install pokemon go on there? it wont pop up on the google store.

oh reinstall did the jobberino

Qmz_ - July 26, 2016, 1:32 pm

Looks good, will try it later on.

CHAOS - July 26, 2016, 2:37 pm

Just tried this out now and i can confirm it works perfectly.

Shoppa - July 26, 2016, 2:45 pm

Just to confirm, before i launch the game i put the cords of the place i want to go to?

Or do I put the cords in where i am right now, launch the app and then change the cords?

?nnie - July 26, 2016, 2:49 pm

(Jul 26, 2016 02:45 PM)Shoppa Wrote: [\[CITE\]](#) Just to confirm, before i launch the game i put the cords of the place i want to go to?

I believe you put the coords of your home, or wherever your game think you are before you open up the game. Then, once you spawn in at your home, you put in the coords of the place where the snorlax is, geo and OK those coords. Click on the snorlax, then geo and ok your original location

Shoppa - July 26, 2016, 2:50 pm

(Jul 26, 2016 02:49 PM)?nnie Wrote: [\[CITE\]](#) I believe you put the coords of your home, or wherever your game think you are before you open up the game. Ok thanks, do you use this method yourself?

?nnie - July 26, 2016, 2:53 pm

(Jul 26, 2016 02:50 PM)Shoppa Wrote: [\[CITE\]](#) Ok thanks, do you use this method yourself?

I've tested it out on another account. But I'm waiting for pokevision servers to go back up, or someone to post coords. The issue I have is that the loading pokeball in the top left is constantly loading, which makes me weary that this will work.

EDIT: confirmed as fuck

Wyatt Garcia - July 26, 2016, 2:54 pm

Sick tutorial I will give this a try :) Awesome,

Fatboy Slim - July 26, 2016, 2:57 pm

(Jul 26, 2016 02:53 PM)?nnie Wrote: [\[CITE\]](#) I've tested it out on another account. But I'm waiting for pokevision servers to go back up, or someone to post coords. The issue I have is that the loading pokeball in the top left is constantly loading, which makes me weary that this will work.

Go get some sleep then dude.

?nnie - July 26, 2016, 2:59 pm

Got this method to work flawlessly. Thanks so much, OP. I would recommend retyping the directions to make them a little easier, but I'm super grateful you posted this

370Z - July 26, 2016, 2:59 pm

Just tried teleporting, works fine; no ban.

For some reason I just suck at it, I can't throw the Pokeball. I am on a track pad and it doesn't always throw. Any fixes?

Shoppa - July 26, 2016, 3:00 pm

(Jul 26, 2016 02:53 PM)?nnie Wrote: [\[CITE\]](#) I've tested it out on another account. But I'm waiting for pokevision servers to go back up, or someone to post coords. The issue I have is that the loading pokeball in the top left is constantly loading, which makes me weary that this will work.

EDIT: confirmed as fuck

Ok thanks, I'm also waiting for it to work ;|

I tried to randomly teleport somewhere hoping for a pokemon to see if this works, but nothing so teleported back without a soft ban.

Though i started pokemon go with my cords already changed.

Edit: Pokevision is back up, did what you said and worked fine :D

Tereck - July 26, 2016, 3:02 pm

You just saved me a lot of time sir. Thanks

?nnie - July 26, 2016, 3:11 pm

Lickitung 3:20 left

<https://pokevision.com/#/@51.51087923308819,-0.17332434654235837>

SZPZ - July 26, 2016, 6:11 pm

mine fucked up lol. I typed the location in but did it slightly wrong and got a ban lol rip.

How long will it last ? None of the unban methods are working.

Hern - July 26, 2016, 6:14 pm

After you catch the pokemon and have to change coords, do you close the entire app and player and THEN enter the new cords and start up the game or do you change the coords WHILE the game is running after you catch the pokemon?

SuperdoopeRob - July 26, 2016, 7:06 pm

I'm just getting GPS Signal Not Found. Any help would be appreciated m80s.

Hydra - July 26, 2016, 8:30 pm

2-12 hours. Usually 2-4 hours or so.

(Jul 26, 2016 06:14 PM)Speedie Wrote: [\[CITE\]](#) After you catch the pokemon and have to change coords, do you close the entire app and player and THEN enter the new cords and start up the game or do you change the coords WHILE the game is running after you catch the pokemon?

You can repeat the process.

Original location > teleport > click pokemon > teleport back > capture > teleport to next location > so on...

(Jul 26, 2016 07:06 PM)SuperdoopeRob Wrote: [\[CITE\]](#) I'm just getting GPS Signal Not Found. Any help would be appreciated m80s.

Check your settings of Nox for Location/GPS settings. Also, enable root if you haven't yet.

I have updated the original post to make the steps much clearer and included more details to make it easy for you all. Hopefully that's better than before :)

Woes - July 26, 2016, 8:57 pm

Anybody know of an alternative for Nox for mac. (Not Bluestacks)

++I tried downloading Nox on my Windows RDP, but I keep getting that my Graphics Driver isn't Up To Date when it actually is lol.

Hydra - July 26, 2016, 9:04 pm

I'm not sure about either problems, maybe someone else can assist you or you can Google for a fix?

(Jul 26, 2016 08:34 PM)Natha Wrote: [\[CITE\]](#) Aweome trick, seems legit, I'll give this a try when I'm home, hopefully it works like a charm.

Pretty sure someone is selling this in the marketplace, lol.

That's pretty scummy for someone to do that. I'm about to end multiple services for location reportings. Check my new thread :)

Lawsuit - July 26, 2016, 9:25 pm

I'm having lots of trouble entering coordinates. It doesn't change to the cords half the time. Anyone else having this issue?

Physicist - July 26, 2016, 9:32 pm

(Jul 26, 2016 09:25 PM)Lawsuit Wrote: [\[CITE\]](#) I'm having lots of trouble entering coordinates. It doesn't change to the cords half the time. Anyone else having this issue?

That search bar won't work. On the box for Geocode, just enter "latitude, longitude".

So go to pokevision, if you see a pokemon you wanna catch, click on that pokemon so the address will change to the coord, copy that to the geocode. You'll be chilling.

Mitch - July 26, 2016, 9:33 pm

sick tutorial!! This will be good for those people who bot their accounts and sell them on E-Bay. So they can sell accs with rare pokemon

Hydra - July 26, 2016, 10:48 pm

(Jul 26, 2016 09:25 PM)Lawsuit Wrote: [\[CITE\]](#) I'm having lots of trouble entering coordinates. It doesn't change to the cords half the time. Anyone else having this issue?

 <https://i.gyazo.com/b7866a107a0d97fff53291a3e4ed6002.gif>  Like xphysics said, enter the coordinates in {lat},{long} format in the geocode box.

f3arme - July 26, 2016, 11:19 pm

Thanks for this ?

-Vik

Brama - July 26, 2016, 11:37 pm

I wonder is this possible to do without using Nox. Like if I am andriod. and I use a spoofer to teleport, click the pokemon then turn the spoofer off and catch the pokemon. I will test this tomorrow.

If someone tests this before then. Please share your results.

Grim - July 27, 2016, 12:30 am

Somone should code a program for this. Could be useful ?

https://www.reddit.com/r/pokemongodev/comments/4ut5aw/sniping_tool/

Haha. There are shitty snipe tools already. Generally crappy ones. I've modified and added in

support for pokeminer. So I have my miner mine for rare locations anywhere I want in the world and then my main bot snipes them in realtime until pokeballs reach 0. In which then it mines pokestops near its location. Look how far I sniped MrMime from:

Earning anywhere from 98,000 to 100,000XP Per hour and have 142 Pokemon registered in pokedex.

EsKay - July 28, 2016, 8:25 pm

Hmm , i want to use this method on my "legit" account, is it safe to use o.o, how long has everyone here used this method and not gotten softbanned o.o

Kalciumm - July 28, 2016, 9:02 pm

If only I could throw the pokeball better lol I can't get any pokemon and I keep wasting pokeballs.

Lil Boatt - July 30, 2016, 8:46 am

Thanks for the tutorial.

I've never done anything like this before and am trying to try it out, but I'm confused. How exactly can I find my longitude and latitude so that I can teleport back? I know how to find long/lat's of the Pokemon, but not my own so that I can teleport back to evold the ban.

Thanks

Hydra - July 30, 2016, 10:19 am
