Thread: [Need some skin insight help?](#)

darkend - July 25, 2016, 2:59 pm

Hello all!

So basically I can't really remember when but in the past I watched a video and saw a skin that looked a lot like the one I just won in a jackpot. In this video the Youtuber said the skin is worth loads because if the float is really low on this skin its rare or something :s

Here's the skin(.GIF)

Exterior: Battle-Scarred

Float: 0.75658298

Spoiler ([Click to View](#))

I could be horribly wrong and be talking about a total different skin. Sorry my knowledge on skins isn't great also I know how funny some users are going to find it if im totally wrong xD so yep im stupid xD

Thank you for the help in advance and sorry if I waste anyone.s time.

No you can be right, depends on the skin (black-scope etc.). I believe though that snake-camo needs to be closer to 0.80 in order to be "rare", but I might be completely wrong. Btw, if you find the right trader, he might overpay a bit for it.
