Thread: [See a rare sighting? Post coords here!](#)

Mod_Cubsmiles - July 26, 2016, 11:05 am

Lets make this the official rare sightings thread:

Just refer to the latest posts for the most recent sightings.

(Please post if something is confirmed and caught from using the coords)

HOW TO OVERRIDE SOFTBAN AFTER TELEPORT:

- Teleport to the coords
- Find a Pokestop
- Check if softbanned
- If yes: do the following:

Quote: Open Pokestop, spin, close. Repeat 40 times/or until Pokestop turns purple. CONFIRMED

I'll start it off:

TheThugMudi - July 26, 2016, 11:19 am

Omg that spinning pokestop 40 times WORKED. Thanks man never knew about it.

And I really would love to follow this thread as it would be really great.

I want Dragonite, Venusaur and Blastoise :D

hatenn - July 26, 2016, 11:21 am

Yes confirmed, pokestop 40 times worked for me too, thanks!

Good thread ideia too! Keep up.

You have to snipe them using nox. Basically you teleport to the pokemon. Click on it then teleport back to your original position before finally capturing the pokemon. This avoids the softban.

Im guessing you're in the same situation as me, actually a map is supposed to appear, and you click on the map to set your location. But it doesnt do that.

Just spin a nearby pokestop 40 times (after each spin go out from the pokestop and click on it again) or so and your softban is gone.

I was just there, couldnt find it. Also, it wouldnt appear on the nearby pokemon list.

Can anyone confirm that you actually have to spin a pokeshop, catch a pokemon, or enter a gym in order to get a soft ban? I've been teleporting around like crazy, but as long as i teleport back to my original location before catching a pokemon, I havent gotten a soft ban.

Just bot like you're playing as a normal user and don't teleport from location to location instantly.
Give it a realistic time to teleport, then bot again

use Pokevision to find Pokemon, set gps to where they are (DON'T CLICK ANY POKESTOPS OR GYMS), initiate the battle, set gps back to initial coordinates, catch pokemon.

this will let you catch pokemon that are ANYWHERE without getting softbanned :)

Ok, I have hella people PM'ing me and posting here for something that has been posted a few times in this thread. This is a PM I've copied and pasted for everyone in need of it, I cba typing it out again.

You're going to want a base of operations where you aren't soft banned.

Mine personally is

40.77870130763417,-73.97166073322296

Go to those coords, perform the trick in the OP of the thread you found me in to lose your softban if needed (keep trying trust it works)

Ok, so to snipe at any cords.

Save your home base, in this case, mine,
40.77870130763417,-73.97166073322296 in a notepad.

Go to a cord posted for a specific pokemon using the gps in nox

Wait for the poke to appear, enter battle with it, then the second the battle starts, quicktravel back to your base (40.77870130763417,-73.97166073322296)

You should see a pokeball load and disappear at top left, feel free to catch after that's been done :^).

I don't understand the "Initial coordinates" what does that mean?

Go to Pokemon, start battle, and then go back to the same spot on the gps?

Use a location spoofer. For iPhones you need to have a jailbroken iPhone because most of the apps (if not all) do not work.

jessyray - July 26, 2016, 8:14 pm

Please someone send me in the right direction to changing coords.

I have changed default lat and long in config.json - saved that file and tried save all then pressed Ctrl + 5

This still takes me to some coords that I used earlier.

I also cannot find any coords.txt file to delete

Any help would be amazing. I am searching everywhere but can't seem to find a solution.

will make a video about it and put it on my help desk later on today, got to download screen recording software and shiz

but its simple you use the unbanner first then run the bot at the coords of the pokemon, e z snipe, been getting every good pokemon so far waiting for a dragonite.

"shows off he caught a gyrados but doesn't post the coords"

Just because you made the thread before someone else doesn't mean you don't need to contribute and just take, take, take.

Poke balls: 100-500 CP Pokemon.

Greater Balls: 500 - 1000 CP Pokemon

Ultra Balls: 1000+ CP Pokemon.

This is what i personally do but some people will disagree.

To never get softbans:

Download NOX.

Press ctrl + 3 to open the map.

Type in the coords were you are not softbanned. ie: your home.

Click Geocode, then click "OK" in the bottom right.

Open the Pokemon app and sign in.

Type the Poords of the Pokemon you want to snipe, click geocode then click okay.

Click the Pokemon you want to catch, then go back to the map and type your home coords in and TP back.

Catch the Pokemon from your home location!

Result! Now you don't have to spin things forever!

I used bot, and while bot was running i installed and used pokersnipe. Then i try pokersnipe and i get soft ban.

Now each time, i need to use NOX to remove the soft ban so i change location, and logout close all.

Then i need to open Pokersnipe again (some min later) and i get soft ban. Is it to fast? Do i need to wait some hours instead? Or any other suggestions?

My option is to login and spin 40 times pokestop. But then i will get soft banned again after i close bot, and use pokersnipe.

Suggestions?

Yeah bro that's what went wrong you had the other bot running, whatever location you have on nox
needs to be the same one you put on pokesnipe when you were editing the file. Im not sure if that's
how you have it but i set the coords to my home.

Start @ your "real" coords
Jump to pokemon to catch coords
Tap the pokemon, DONT CATCH
Switch back to your "real" coords
Catch the pokemon
