Thread: [Help me plz plz plz plz plz !!!](#)

anonymouskilller - July 11, 2010, 1:27 pm

I have about 50 victims on my cybergate on windows xp and i m going to re-install/reser my window due to some reason and donot wanna lose my victims . so , i need ur help .

Please tell me the procedure how to resetup the cybergate so that i donot los my victims .
i will be very thankful if someone help me .
PLz help me !!!!!!!1

RayOrtiz - July 11, 2010, 1:29 pm

I can do it for 10\$ paypal but you must have teamvier 5 PM

CarrotMilk - July 11, 2010, 1:30 pm

Shouldn't be a problem, just make sure you remember the password and the port you were using. You'll need the same IP Address too for no-ip etc... Good luck!

jonnyc55 - July 11, 2010, 1:30 pm

You seriously expect help with that post? YOU SERIOUSLY EXPECT IT??!?

'PLz help me !!1'

GTFO this forum. You appear like a 10 year old.

So you're reinstalling Windows?

You won't lose your victims.

The easiest way is to copy and paste your CyberGate folder onto a USB Stick or some other form of removable storage device. Then just copy and paste the folder back onto your computer when you've reinstalled.

If you cannot do this, just remember your Listening Ports and the password your server uses.

i think this is not the solution , as by entering the port and password anybody can get unlimited free victim due to same port and password.

The no-ip host matters. Every ones host is different so there victims will connect through there no-ip host.
