Thread: [\[PS\] How to make an image black & white](#)

WaterM - July 26, 2016, 5:06 pm

This tutorial will guide you on how to make an image black & white on Adobe Photoshop CS6. If you don't have photoshop then this tutorial isn't recommended for you.

1. Open up Adobe: Photoshop CS6.
2. Open an image that you would like to turn black and white.
3. Look down by your layers and below you will see an icon that looks like circle but half is filled and the other half isn't. Click onto that.
4. Select Black White and you are done!

Very simple tut, but good enough :D You can also make images B&W in older PS versions
(Jul 26, 2016 05:06 PM)WaterM Wrote: [\[CITE\]](#) 1. Open up Adobe: Photoshop CS6.

I thought this was pretty self-explanatory... But I guess for newer designers this could help. Thanks OP.

It's an easy tutorial for noobs.

WaterM - June 23, 2018, 7:20 am

BUMPIng this for all the noobs out there.
