Thread: [\[Release\] QuickSpin - Remove softban](#)

Duk. - July 27, 2016, 3:55 am

<https://mega.nz/#!zQ0gBJwK!MXV0uxRnOkR34o58YEzv1uK5l8G1zvpKQkTrEj8vnFk>

Run QuickSpin.exe

QuickSpin will ask for the information it needs to unban your account.

If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.

A successful unban is not guaranteed due to the nature of the exploit.

Feel free to try again if it didn't work the first time.

Thanks for this! Just asked another member for a similar tool xD

Woes - July 27, 2016, 3:56 am

How fast can it get rid of a softban?

iSnitch - July 27, 2016, 4:14 am

Works like a charm!

This will get you unbanned in 2 minutes.

Jak! - July 27, 2016, 4:27 am

oh its fucking lit now, just unbanned myself and went and got a gyrados! <3 ilysm

iSnitch - July 27, 2016, 4:28 am

Has anybody got Perma banned ever?

Nope.

Sharjah - July 27, 2016, 4:43 am

Anyone test this out yet and can confirm it works? I have yet to be soft banned from botting, but it would be nice to have a backup plan if I were to :)

370Z - July 27, 2016, 4:48 am

Duk, thanks for the share, got unbanned within minutes.

?

granz???????????????? - July 27, 2016, 4:49 am

The default settings are in amsterdam. Will i be able to go to a location like US after i'm done with this tool or do i need to use a local pokestop?

Nick Burkhardt - July 27, 2016, 4:50 am

Works gr8!! Thanks for this!

Just change settings to local

Lysergix - July 27, 2016, 4:53 am

How do you know if you've been soft banned? Can you someone show what their bot looks like when this happens?

iSnitch - July 27, 2016, 4:56 am

(Jul 27, 2016 04:53 AM)Lysergix Wrote: [\[CITE\]](#) How do you know if you've been soft banned? Can you someone show what their bot looks like when this happens?

You miss all the pokemons and you don't get items from pokestops.

~HF~ - July 27, 2016, 4:56 am

Thanks a lot for this can finally catch rares while botting :D

Lysergix - July 27, 2016, 5:16 am

Says I can't be banned, but then when I run my bot again (same coords as QuickSpin) I get catchFlee's and nothing from PokeStops.

Cxs. - July 27, 2016, 5:35 am

Lmao this actually worked.

Wow, thanks.

What an easy bypass, lol.

CULTSWEGMAFIA - July 27, 2016, 5:45 am

Thanks for this. Going to test it out later. Seems like it works from all the positive feedback on the thread though :p

Dark- - July 27, 2016, 5:51 am

Yooo thanks for this brother! Beats opening a poke stop, spinning and then closing it 40+ times haha

Cxs. - July 27, 2016, 5:52 am

(Jul 27, 2016 05:49 AM)Natha Wrote: [\[CITE\]](#) Thanks dude,

How long does it normally take to unban your account with this method? I heard of the pokestop method, never tried it.

It literally does it in about 2 minutes or LESS.

it's amazing.

Loot Lake - July 27, 2016, 5:53 am

Thanks for this app, unbanned within 30 seconds.

Tohka Yatogami - July 27, 2016, 6:10 am

I was so skeptical about this working but it actually did get me unbanned haha. I appreciate this release, thanks!

Br?ndon - July 27, 2016, 6:13 am

Am I doing anything wrong? It says im not softbanned cause it got xp from the spin but I am banned cause I cant catch ny pokemon and get shit from pokestops.

granz???????????????? - July 27, 2016, 6:28 am

How can i find a pokestop near the desired location i want to snipe a pokemon?

Br?ndon - July 27, 2016, 6:47 am

So I put in the coords to the place I am in game and it spins the pokestop and tells me im unbanned but right after I try to spin the stop and I cant get anything or catch any pokemon. Anyone know why?

Secret Agent Minion - July 27, 2016, 8:04 am

This is insane, I honestly was skeptical on if it would/could work.. It worked, and I'll be using it a fair amount.

DaUB3R - July 27, 2016, 8:35 am

y u heff to remove link 4?

Duk. - July 27, 2016, 4:06 pm

Updated op with link! Enjoy!

Took your damn time!

But thanks OP. ?

SIM-2756559 - July 27, 2016, 4:17 pm

Haven't been banned yet but, I'll keep this software at hand. Thanks

Lawsuit - July 27, 2016, 4:18 pm

you should include original source or give credit

Internet Explorer. - July 27, 2016, 4:22 pm

Isn't this already in NecroBot?

Oh well, thanks for the share, nonetheless!

Kindest regards,
Internet Explorer.

I am having the same issue maybe this got patched?

Gaara- - July 27, 2016, 8:43 pm

Wow I've been waiting for a program like this ! Thanks for this bro.

Sams Dad - July 27, 2016, 8:51 pm

Holy shit, this is insane. So pretty much this tool just bypasses the ban you get for cheating? The amount of cheating that one person is able to do in this game is insane. Woah.

Hern - July 27, 2016, 8:54 pm

What does this even do though? Like if I wanted to manually do something like what the bot does what would it be? Just curious...

lavender. - July 27, 2016, 9:11 pm

i fucking love this thing thanks bro

Looks like this is a new issue that's suddenly appearing, I can't find any previous mention of this problem.

RelationShit - July 27, 2016, 10:00 pm

This program is not working for my account for some reason.
I tried it twice already, third time right now.

I teleported to Japan, not wanting to wait I got softbanned (I know, useless account anyway)
Opened up the program, set up my settings etc.

Says it finished:

Code Spun the PokeStop: 50

Done spinning the PokeStop, will now walk back to the start. Distance to start:
9,3m.

We are back at the start. You should be unbanned now.

--- Unbanning finished.

--- Success

Press any key to exit.

But when I restart the program it either tells me I am softbanned or just says pokestops are on
cooldown.

Not sure why this is not working for me lol

I will wait a few hours until the ban is gone I guess.

Thanks for share tho!

Jak! - July 27, 2016, 10:00 pm

About to miss out on a 100 IV pokemon because it won't work :(

Getting that to :("go to and enter" error

Help please

Juggalo_Toxic - July 28, 2016, 1:01 am

google auth servers are acting up its doing it with bots right now too

Pindakokosnoot - July 28, 2016, 1:26 am

Anyone know how to solve the problem or what is going on?

Rayzah - July 28, 2016, 2:52 am

Yeah im working on finding a solution too

Rayzah - July 28, 2016, 3:13 am

Its both? its not just one or the other man, the auth isnt working hense why it wont let you autmate the pokestops

AnOrdinaryGuy - July 28, 2016, 3:50 am

Well probably it's a server problem. According to this:

I was playing with this last night. You have to put your gps on on your phone, get soft banned, then just use necro or quickspin, put in your coords, then unban yourself :)
