Would really appreciate it.

It seems that in the latest update the problem persists. but the team is on it from the looks of it . This bot looks great and thank you For the great share!

I am looking for more solutions and will start a new thread if i find anything of use.

Note: It is flawed temporarily but it is not the posters fault. It was running and will be again soon .

Both look great, thanks for sharing this from wherever you found these!

Chance Acid Rapper - August 4, 2016, 9:58 am

I would love the first one! Thank you :)

The first one seems to be stuck at UI updating and the second one keeps finding 0 pokestops. As a user mentioned earlier this is not the posters fault. Will be trying the first bot later, hopefully it will be fixed. :)

trulytru - August 4, 2016, 2:05 pm

the company decided to disallow 3rd party api. but dont worry it is being reversed and i am working on a solution that does not rely on api. if you would like to get involved pm me and ill see if you would fit our needs
