Thread: [PokeSnipe \[CCRTS\] - A Pokemon Sniping Bot](#)

Herbert The Pervert - July 27, 2016, 10:37 am

PokeSnipe[CCRTS] X64 - [\[Download\]](#)

PokeSnipe[CCRTS] X86 - [\[Download\]](#)

Setting Things Up

1.Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.

2.Set DefaultLatitude to the latitude of where your character in game is.

3.Set DefaultLongitude to the longitude of where your character in game is.

4.Choose AuthType: Ptc or Google.

Ptc - Enter Username and Password in the fields named accordingly.

Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

-Running the bot

-After you are done setting things up go ahead and run the bot.

-You will be greeted by this <https://puu.sh/qeBVI/4b9d05dee4.png>

-Let's look for a Pokemon to Snipe? I recommend this discord <https://#EMQeT> and this website <https://skiplagged.com/pokemon/> (Thanks -sed) I also recommend our very own PoGo Coords tab in the shoutbox. Click it! <https://puu.sh/qfYr4/203d681667.png>

-Once we've found the coordinates of a Pokemon to snipe <https://puu.sh/qeCb4/a2a1094346.PNG> Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In my case it was : 40.788268154987, -73.968539742814 <https://puu.sh/qeCAw/0975b00399.PNG>

-Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in PokeSnipe <https://puu.sh/qeClv/de06c07399.png>

-Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.

-You should be seeing something like this next (Your chosen Pokemon of course)
<https://puu.sh/qf7AJ/f3df95fe8e.png>

That's all for now. Hopefully something like this doesn't happen to you:

FAQ:

Q: Can you run it from anywhere and Snipe Anything on the continent?

A: Da.

Q: Why snipe?

A: When you get to the higher levels you will need to start looking for specific Pokemon if you wanna win those gym battles.

Q: What is IV?

A: <https://www.youtube.com/watch?v=50smDf5xQpk> It's the percentage of the the absolute perfection of IV.

Q: I'm out of pokeballs, what do I do?

A: Check the post under this one. I've attached a Pokestopper that fixes this.

Commonly Known Problems

People tend to spell Pokémon names incorrectly so check the names here:

<http://pastebin.com/raw/Uzpg3rMQ>

Also.. Pokevision url's have messed up coordinates. Try to not use those. There are better alternatives!

#CREDITS#

SquirrelFork for providing necessities

Maclone for being a patient guy. (Sorry)

Valmere for helping me figure out the Sniping task.

##CREDITS/##

If you were wondering what CCRTS stood for... It's Cross Continent Real-Time Sniper.

[\[Original Post\]](#)

Vegeta - July 27, 2016, 10:39 am

Looks pretty bad ass, I'll have to try this on one of my alt accounts and hopefully finally snag a damn Snorlax since everyone I try to get flees and then I get soft banned.

Thanks for this OP, hopefully it works with no issues as well.

P?kachu - July 27, 2016, 10:42 am

So you put in the pokemon you want to catch and the location you are and it finds and catches it for you? How big is the radius it searches?

Herbert The Pervert - July 27, 2016, 10:44 am

THIS SHIT IS DOPE I JUST CAUGHT 3 DRAGONITE AND A SNORLAX WITH 98% IV

Osuka - July 27, 2016, 10:45 am

does this bypass the ban when it travels to the pokemon and battles it and travels back to the original cords so its catch able?

Herbert The Pervert - July 27, 2016, 10:46 am

(Jul 27, 2016 10:45 AM)Osuka Wrote: [\[CITE\]](#) does this bypass the ban when it travels to the pokemon and battles it and travels back to the original cords so its catch able?

It goes to the pokemon and encounters it then goes back to the original coordinates you put in and catches it

Osuka - July 27, 2016, 10:49 am

If only it was auto setup and it would scan for good pokemons and catch them and loot for pokeballs :O

will try this out thanks.

Banana - July 27, 2016, 10:57 am

<https://gyazo.com/15a701a164efe568de6246607f12853f>

I set the auth to PTC and it is still not working

```
<appSettings>

Not sure what to tell you, I would guess try extracting the folder again and be sure to save after

Aidan123 - July 27, 2016, 11:09 am

everytime i try and snipe one i cant catch it? am i softbanned?

henry - July 27, 2016, 11:09 am

Is there anyway to filter pokemon quicker? It's like a game of find waldo

370Z - July 27, 2016, 11:10 am

Been using this for quite a bit now. Gained 9 Snorlax's and a bunch of Dragonite's. +Many others.

Herbert The Pervert - July 27, 2016, 11:11 am

(Jul 27, 2016 11:09 AM)Aidan123 Wrote: [\[CITE\]](#) everytime i try and snipe one i cant catch it? am i softbanned?

No, sometimes you get them and sometime you dont

Aidan123 - July 27, 2016, 11:16 am

(Jul 27, 2016 11:11 AM)Herbert The Pervert Wrote: [\[CITE\]](#) No, sometimes you get them and sometime you dont

alright, just seems odd that 12 straight have got away from me. i will keep trying though

Pain - July 27, 2016, 11:22 am

Wait so if you "snipe" will you get soft banned? Just curious.

Herbert The Pervert - July 27, 2016, 11:25 am

(Jul 27, 2016 11:22 AM)PAIN Wrote: [\[CITE\]](#) Wait so if you "snipe" will you get soft banned? Just curious.

no

Mr.Oug - July 27, 2016, 11:27 am

Just the thing that I needed. Thanks a mate....!!

junior17 - July 27, 2016, 11:35 am

Can someone help me?

I run the config, set my default lat & lang, i chose google, i saved the config, run up the bot.. entered the pokemon name, entered the coords, and pressed enter, then the app crashed! I didn't see any google authorization from the bot, i couldn't find any code to input in google[dot]com/device , this bot won't give me any code to link with my google account. Please help!

Charmander - July 27, 2016, 11:35 am

Thanks bro this is helping me out loads <3

P?kachu - July 27, 2016, 11:37 am

Is there a github repository link for this?

Ooze - July 27, 2016, 11:38 am

Kind of confused on the coordinates we put in the .config file

Should I put the coordinates I normally bot from, should I run my bot at the same time I run this?

Decentral - July 27, 2016, 11:40 am

No softbans?

Because that would be an issue.

Lana Del Rey_ - July 27, 2016, 11:47 am

(Jul 27, 2016 11:38 AM)The J0ker Wrote: [\[CITE\]](#) Kind of confused on the coordinates we put in the .config file

You put the coordinates of where you are currently (IRL).

*I think ?

Pain - July 27, 2016, 11:51 am

Anyone tried this out yet? How is it going Iso do we download x86 or x64

Lana Del Rey_ - July 27, 2016, 11:53 am

(Jul 27, 2016 11:51 AM)PAIN Wrote: [\[CITE\]](#) Anyone tried this out yet? How is it going Iso do we download x86 or x64

What kind of computer do you have? x64 = 64 bit and x86 = 32 bit

rr9z - July 27, 2016, 11:53 am

You put the coordinates of where you trainer are atm, if you were botting in NYC. Put those coords and start sniping

You won't get softbanned, been using it for 1 hour straight, and got a few dragonites and like 10-15 snorlax

Pain - July 27, 2016, 12:03 pm

Just tried this out dude this shit is DOPE af!! HQ

Aidan123 - July 27, 2016, 12:06 pm

There is no config folder for pokesnipe?

Goat - July 28, 2016, 6:35 am

Damn, the tool isn't working for me.

Please visit and enter problem, can't get my auth lmao.

Help me fellas.

plasticsoul215 - July 28, 2016, 7:14 am

If anyone want Dragonite, just go to Hong Kong to search it.
Hong Kong is small, if it spawns a Dragonite its very easy spot out.

420 - July 28, 2016, 7:18 am

I'm trying to catch a pokemon for few hours with this bot and I caught none.

Reward - July 28, 2016, 7:21 am

So this jumps around the world and gets any pokemon?

fadzly_jb - July 28, 2016, 7:30 am

Great job. managed to get all the pokemon high IV

plasticsoul215 - July 28, 2016, 7:40 am

I think this doesnt work for Google acc yet.
But for Ptc, it works totally fine.

fadzly_jb - July 28, 2016, 7:45 am

guys. the visit and enter problem only occur on Google account. Use Pokemon trainer account instead

An0nym0u555 - July 28, 2016, 8:03 am

It takes so long and hangs at the sniping pokemon thing. It doesn't do anything after that for about 70% of the time. What is the problem?

plasticsoul215 - July 28, 2016, 8:19 am

Its the server's problem.
Check this one out.

Please visit and enter problem, can't get my auth lmao.

Help me fellas.

Same. Anyone have a solution?

(Jul 28, 2016 03:47 AM)Cxs. Wrote: [\[CITE\]](#) To all you guys having the Please visit and enter

problem, you need to get your auth code from another bot and paste it into the config for Pokesnipe.
Is this the fix?

@Dexter - July 31, 2016, 11:42 am

It does not let me control v the co-ords after entering the pokemons name ??

[21:13:33 PM] ArgumentOutOfRangeException - Restarting

I keep getting that error message when trying to snipe a pokemon, it constantly just does that. Can anyone help?
