Thread: [See a rare sighting? Post coords here! v2 \[MANY POKEGO TOOLS AS WELL HERE\]](#)

Banana - July 27, 2016, 2:19 pm

Since the first thread [HERE](#) is full, I decided to make a second version. Below are some helpful tools to use for sniping! Post coords of rare pokemon here!

How to Snipe Pokemon without getting a ban?

Spoiler ([Click to View](#))<https://hackforums.net/showthread.php?tid=5351209>

Soft banned, and want a quick unban?

Spoiler ([Click to View](#))- Information

QuickSpin is a tool to try to unban your softbanned account.

Uses the RocketAPI (GitHub)

- Usage?

Run QuickSpin.exe

QuickSpin will ask for the information it needs to unban your account.

If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

- !

Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.

A successful unban is not guaranteed due to the nature of the exploit.

Feel free to try again if it didn't work the first time.

- !

- Downloads

QuickSpin 1.0

<https://mega.nz/#!eFp0FT7a!Z07PX2uZ2TI8pFYkWBllUo6tTbloEJaksxsuf-xV4o>

Want a quicker way to snipe pokemon instead of using nox/other gps spoofers?

Spoiler ([Click to View](#))PokeSnipe[CCRTS] X64 - [\[Download\]](#)

PokeSnipe[CCRTS] X86 - [\[Download\]](#)

Setting Things Up

Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.

Set DefaultLatitude to the latitude of where your character in game is.

Set DefaultLongitude to the longitude of where your character in game is.

Choose AuthType: Ptc or Google.

Ptc - Enter Username and Password in the fields named accordingly.

Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

Running the bot

After you are done setting things up go ahead and run the bot.

You will be greeted by this <https://puu.sh/qeBVI/4b9d05dee4.png>
<https://puu.sh/qfYr4/203d681667.png>

Once we've found the coordinates of a Pokemon to snipe <https://puu.sh/qeCb4/a2a1094346.PNG>
Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In my case it was : 40.788268154987, -73.968539742814 <https://puu.sh/qeCAw/0975b00399.PNG>

Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in PokeSnipe <https://puu.sh/qeClv/de06c07399.png>

Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.

You should be seeing something like this next (Your chosen Pokemon of course)
<https://puu.sh/qf7AJ/f3df95fe8e.png>

That's all for now. Hopefully something like this doesn't happen to you:

Q: Can you run it from anywhere and Snipe Anything on the continent?

A: Yes!

Q: Why snipe?

A: When you get to the higher levels you will need to start looking for specific Pokemon if you wanna win those gym battles.

Q: What is IV?

A: <https://www.youtube.com/watch?v=50smDf5xQpk> It's the percentage of the the absolute perfection of IV.

Commonly Known Problems

People tend to spell Pokèmon names incorrectly so check the names here:

<http://pastebin.com/raw/Uzpg3rMQ>

Also.. Pokevision url's have messed up coordinates. Try to not use those. There are better alternatives!

Ran out of Pokeballs? Spoiler ([Click to View](#)) PokeStopper
[\[Download\]](#)

Q:Refresh token?

A: It's created in the configs folder after you've logged in with Google once. GoogleAuth.ini contains that token. No need to manually do anything. If you wanna log out delete the file GoogleAuth.ini

NOTE: This bot won't know if your bag is upgraded. So if you have upgraded bags in the game, use something else.

The normal version will delete revives and all that other shit and keep the max amount of Pokeballs for a user that hasn't bought bag upgrades.

The gym version will maximize in keeping potions and revives, minimum on Pokeballs.

Ignore the "There's an update available."

Want an auto PTC account creator?

Spoiler ([Click to View](http://www.dc4in.com/pokeacccreator.php))<http://www.dc4in.com/pokeacccreator.php>

These bots are not created by me! I have found them on another forum! I do not take credit for these bots!

Psykonaut - July 27, 2016, 2:20 pm

Let's get back to it! Just got a 47CP as my first Dragonite lol GG

Anyone know what pokemons are in the pokedex?

45, 113, 132, 137, 144, 145, 146?

Im missing some that is obtainable.

#Toxic - July 27, 2016, 3:59 pm

If anyone seen another high Vaperon, post up pls :(

From my experience sniping doesn't work when you have a soft ban so trying to the 40 spin thing and then try sniping.

Demonstrate - July 27, 2016, 7:10 pm

(Jul 27, 2016 07:09 PM)Natha Wrote: [\[CITE\]](#) I'm using Nox the tutorial posted by iHydra, I did everything right and now I'm soft banned, fuck that sucks, first SB on this account.

Just use QuickSpin, it'll get rid of that soft ban in seconds.

(Jul 27, 2016 07:11 PM)Folks Wrote: [\[CITE\]](#) you have to set the your coords to where you are in pokesnipe config.

Already done, still crashes :(

Edit: Fixed, cords were off.

Br?ndon - July 27, 2016, 7:13 pm

(Jul 27, 2016 07:09 PM)Audemar Wrote: [\[CITE\]](#) The pokemon just run away when I try to get them? Somebody help..

When you go to a new location click on the pokemon and dont do anything till you set the location you came from and then you can catch it. You are probably softbanned so just open a pokestop and spin it and close it over and over. Takes around 40 times to get the ban to lift. You know its off when you get the items from the stop.

Woes - July 27, 2016, 7:14 pm

Something is going wrong, it supposed to say you the link google.com/device and a code.

Try to paste, if its a text like ASDF--AS32 go and paste it here "www.google.com/device"

Do you have NecroBot or anything else that has your Google Refresh Token? If so, get the token and just paste it into PokeSnipe/QuickSpin's config, and it won't ask you to enter a code anymore.

If you use NecroBot...

1. Go into the Config folder
2. Open the auth.json
3. Find the GoogleRefreshToken and copy it
4. Go to your QuickSpin folder
5. Open user.xml
6. Paste the GoogleRefreshToken
7. Profit?

Some thing can be done with PokeSnipe if it's giving you problems. Just paste the GoogleRefreshToken PokemonGo.RocketAPI.Console.exe.Config

ILikeHacking - July 27, 2016, 10:57 pm

personally i have one of the scanners up covering over 50km in an area and have it notify me when
some specific pokemon show up, i check if it's over a certain iv and post it. been getting so many
rare pokemon but 90% of them have less than even 70 iv. not sure how others have it set up.

(Jul 27, 2016 11:09 PM)idk341 Wrote: [\[CITE\]](#) Can someone help when i paste cords it says please visit and enter???

If you use NecroBot...

1. Go into the Config folder
2. Open the auth.json
3. Find the GoogleRefreshToken and copy it

4. Go to your QuickSpin folder
5. Open user.xml
6. Paste the GoogleRefreshToken
7. Profit?

Some thing can be done with PokeSnipe if it's giving you problems. Just paste the GoogleRefreshToken PokemonGo.RocketAPI.Console.exe.Config

if the one for necrobot works then the one for pokestopper should too i think.. run pokestopper and it'll copy a code to your clipboard and open google.com/devices for you. paste the code there. then

go to the root of pokestopper and you'll find the refresh token inside Configs\GoogleAuth.ini let me know

could be wrong but it teleports very quickly starts the fight and teleports back and catches it in your actual location. something along those lines, nox is not needed.

Crummzyy - July 27, 2016, 11:15 pm

Please someone come up with a fix for this glitch. It's very annoying.

need to set default coords to your actual coords, other than that sometimes the pokemon actually does run away or vanish without meaning your softbanned

Yeah, I set the cords to central park new york, which is where I used a bot to level the account. I guess I'm gonna try again and see if it works, but I was definitely soft banned because the pokemon got away on the first ball like three times in a row.

use quickspin to get unbanned.

?roxy - July 28, 2016, 12:26 am

Can anyone that has successfully used PokeStopper send me the full contents of the GoogleAuth.ini file please? You can of course delete your Token, but I need to manually make the file and paste my token in since Google Auth isn't working atm. Currently out of PokeBalls. You can PM me or reply here.

Thanks.

(Jul 28, 2016 12:24 AM)Mr. Robot Wrote: [\[CITE\]](#) Caught all but the kangaskhan :(

How do you catch all these? I've been trying this for quite a while and can't seem to find not a single pokemon like for example, Snorlax, Lapras, Venasaur.

Are you using berry's and ultra balls?

Neji - July 28, 2016, 1:59 am

PokeSniper isn't asking for my username or password or anything similar. It asks for the Pokemon name and Coordinates but nothing happens after that. Is this because of the servers?

Dextral - July 28, 2016, 1:59 am

(Jul 28, 2016 01:58 AM)V?er?dic?t Wrote: [\[CITE\]](#) Ill literally pay the person \$5 btc if they help lmao
Help the man out! ;) Lmfao!

Just want this shit working, need some beast ass pokemon.

heywsup - July 28, 2016, 1:59 am

To you guys having the Please Visit and Enter problem, if you have another config you can look at to get your google token for that account copy and paste it from there to your poke snipe user file.

Fitzpatrick - July 28, 2016, 2:00 am

(Jul 28, 2016 01:59 AM)isoviacy Wrote: [\[CITE\]](#) Hi man, i got my 100% dragonite, shall i power him up as much as i can?

Yes ya should, basically you cannot get any better Dragonite to begin powering up. Go for it.

AyJay123 - July 28, 2016, 2:00 am

(Jul 28, 2016 01:57 AM)Dextral Wrote: [\[CITE\]](#) So does anyone know what the "Please Visit and Enter" is about still? Happened to me and a couple others when Pokemon Go was still up.

Only have an issue when it's logging into a Google account. Like most of the other bots that have been coded, it's when it's trying to get the refresh token for the account. It would typically say something along the lines of "Please Visit google.com/device and enter xxxx-xxxx", which is pretty much just authorizing the app to log back into your account.

TEMP_3133526 - July 28, 2016, 2:00 am

(Jul 28, 2016 02:00 AM)Fitzpatrick Wrote: [\[CITE\]](#) Yes ya should, basically you cannot get any better Dragonite to begin powering up. Go for it.

Dragonite 83 IV

KEEP going fam ?

Pindakokosnoot - July 28, 2016, 2:43 am

Could anyone explain to me why Im getting low cp pokemons from your coordinates while I see people getting 2k cp pokemons from them..

Im lvl 22

Sharjah - July 28, 2016, 2:43 am

(Jul 28, 2016 02:43 AM)Drake Griffin Wrote: [\[CITE\]](#) Could anyone explain to me why Im getting low cp pokemons from your coordinates while I see people getting 2k cp pokemons from them..

Depends what pokemon you're catching. Are they already evolved pokemon e.g. Charizard, Dragonite, etc. or are they like dratini and charmanders etc?

That sounds odd..

First time opening you should just put in pokemon name, cords and then it should guide you how to login (first time only)

Remember to change your cords in the "PokemonGo.RocketAPI.Console.exe.Config" (line 19 and 20)

And change the Login from PTC to Google or Google to PTC (Depending on your account login)

If you've successfully used a bot that uses a refresh token, just copy and paste it into the sniper.

Yeah, that happened to me too. What you have to do is download the 32bit version, copy paste your Google Auth code from the other bot you're using to the "GoogleRefreshToken" in the PokeSnipe config.
