Thread: [QuickSpin - PokemonGo Softban Unbanner](#)

funtela - July 27, 2016, 2:34 pm

QuickSpin

Information

QuickSpin is a tool to try to unban your softbanned account.
Uses the RocketAPI (GitHub)

Usage

Run QuickSpin.exe

QuickSpin will ask for the information it needs to unban your account.

If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.

A successful unban is not guaranteed due to the nature of the exploit.

Feel free to try again if it didn't work the first time.

Cool. Thanks for this. It could prove to be very useful when trying to snipe rare pokemans around the country (World).

I'm willing to bet that this doesn't work.

Quickspin is public already, dont think you are " Maclone " the original creator, are you?
If not atleast give some credits to the guy?

Ryan isn't too keen on the whole "give credit to the creator" thing. Might not get as much rep from this stuff if he did... So he just puts a little source link in the corner.

By posting that little source link thing, he advertises other forums on this forum.

Which is against the TOS (?) ?

He wouldn't have posted that at all if I hadn't called him out before.

I posted the source in the thread... There's so many bots here and they are all obviously from other websites..

Ok. I have the duct tape out and I just wrapped in around the camera 30 times. I think it's good.

Pindakokosnoot - July 27, 2016, 4:01 pm

I appreciate you calling people out on taking credit for other people's work. I'm sure this post was sarcastic, but I took a look anyways in Cuckoo and didn't find any trace of funny business. Just thought I'd let anyone else that's paranoid know.

funtela - July 28, 2016, 11:10 pm

Just updated the OP with the current working version guys! Enjoy! This thing works wonders.
Perfect for those random bans when sniping!

Demonstrate - July 28, 2016, 11:10 pm

Glad to see that it's working once again. I used this all of the time before I switched over to Necrobot.

zillakami - July 29, 2016, 2:02 am

Apparently one of my accounts got banned and trying to run the Quickspinner. Says that "indeed we are softbanned" Then it runs the pokestop for 50 times and says that "we are unbanned now", but in the reality my account is still softbanned.

Maybe I should camp ownedcore and whatnot and post a new thread every single time a new update comes out for a bot I didn't create.

I don't have anything against him posting other people's work but good god, how many threads do we need.
