How are people getting 300,000/h????

(Jul 27, 2016 08:37 PM)Chill! Wrote: [\[CITE\]](#) How are people getting 300,000/h????

The only way I could see this possible would be by making your speed something stupid fast, like 1000 Km/h.

I haven't heard of anyone getting this much though.

Forward™ - July 27, 2016, 8:39 pm

It hasn't been confirmed yet on Haxton, they post pictures 1 minute into the session, which is always way higher than what the actual exp/hr is.

Forward™ - July 27, 2016, 8:40 pm

Even if you made your speed 1k km/h the bot wouldn't be able to run that fast to catch and click every pokestop let alone, at that type of speed you would probably just be banned from having 300k exp an hour is obviously cheating.

Lor?d - July 27, 2016, 8:42 pm

I was the one that found the Japan coords ?

But aside from that, my necrobot won't clear out the bags anymore but only on certain accounts. Any clue why?

So you're running multiple instances and on some of the accounts, it's not recycling potions?

RelationShit - July 27, 2016, 8:44 pm

How many pokestops are there on posted locations? (without moving)

Also, what is the fastest bot? Currently using Pokecolor (v1, old one) and it is very slow. Especially when collecting from pokestops.

I was going to ask something else too but forgot rn

Forward™ - July 27, 2016, 8:45 pm

I hear pokefast is the fastest listed bot. You can put speed to 200 km/h.

Sams Dad - July 27, 2016, 8:46 pm

If I was to create a second account and start botting on it for fun, what is the best bot to get like 300K+ XP/H? And would I be like instantly soft-banned, or would I be able to run it for a couple of levels?

I am.

It was running fine up until a few hours ago.

No bot can go that high, max is like 60k/h w/o lucky eggs. I would suggest pokefast.

A lot of people are having that issue it seems like, I suppose it will be addressed and probably fixed soon. On how to fix it, you can attempt to replace all files except for the settings file, and rerun the bot and see if that fixes it?

Everyone please ask me questions in here, and not pm me so if another person has the same question, it will be answered by them reading it.

Nobody has been softbanned from that speed soo.

You shouldn't be botting on your main anyways.

Sorry can't post links, not 50 posts ;-;

Any ideas?

What do I need to change in the coding to make it where I can login with PTC? I'm a retard when it comes to this stuff so I'd appreciate it if you could dumb it down for me. :D

Forward™ - July 27, 2016, 9:07 pm

That's weird, go to logs and see if auth code is in there.

By sniping Pokemon you don't have to travel at all. Only have to travel to get pokeballs from
pokestops.
