Thread: [PokeBuddy \[New Bot , Multi function , Autofarm, Autocatch\]](#)

Lana Del Rey - July 27, 2016, 9:17 pm

Copied this off another forum! This is not mine, I don't take credit for this

Use at your own risk [Virus Scan 11/54](#)

Code Download: <https://github.com/finndev/PokeBuddy/raw/master/PokeBuddy.zip>

Key: FREE-BETA

github : <https://github.com/finndev/PokeBuddy>

(Could someone confirm if this bot is legit? Has anyone used it?)

Sams Dad - July 27, 2016, 9:17 pm

ANOTHER BOT? This is insane. Nothing negative! I am just extremely surprised over how many bots there are for this game already. Especially considering 95% of them are free.

Great job and kudos to all the developers for being out so quickly.

Top 3! - July 27, 2016, 9:18 pm

Is this a legit program I might download it but someone post

Mech - July 27, 2016, 9:20 pm

At least this bot has a decent looking GUI.

But the fact that it is using the word "Pokemons" when the word Pokemon is already plural.

This will drive me insane.

This will drive me insane.And the lack of case-sensitivity is hurting my OCD. I demand for a fix in the GUI! Pretty solid look though, developer just has to sort out the spelling and grammatical mistakes.

Glorify - July 27, 2016, 9:21 pm

do you have to know coding to know how use this

(sorry if thats a stupid question)

(sorry if thats a stupid question)No, no you don't :p Most bots require you to have Microsoft Visual Studio; but you can Google yourself to that, pretty easy.

You could get "My GO Bot" – that's just a simple .exe that you run, sign in and you are ready to rumble! No fancy programs required.

ObeyHacking - July 27, 2016, 9:22 pm

Testing this right now. Thanks OP - Will report back!

EDIT - Confirmed working! Awesome thanks for the post OP

Thank you, let us know how it goes.

*I myself haven't tried this yet, don't want to risk it because of the virus scan.

You do not have to have any coding knowledge to use this. It's simply click and type.

I'd love too check this out.

Deffs gonna need a source or else a confirmation it's not elmerFUD.

I don't go phishing often either.

God damn award-posting filthy whores!

Dude. Fucking chill.

Atovy - July 27, 2016, 9:35 pm

i personally use it now and its verry good bot

Zach_Farlow - July 27, 2016, 9:35 pm

trying it right now very nice gui

CheGuevara? - July 27, 2016, 9:35 pm

Yeah I saw this on another forum but I don't know, 11/54 detected files.

I don't want it, but thanks for sharing!

I mean the GUI is a step forward when it comes to these bots, I don't like the GUI design but it's a step forward!

Sorry, I really did not mean to offend anyone with that. I have just removed it from my post. Terribly sorry if I offended you in any way.

Have a fantastic day, man.

Otakutrash - July 27, 2016, 9:37 pm

It works, but it's not that good. I still prefer Necrobot or GoBot if you like gui.

I find GoBot to be a bit confusing.

Thanks guys for confirming this works, but I think I'm going to steer away from it.

Ooze - July 27, 2016, 9:53 pm

IM using it, however in setting when i click on items nothing comes up
shame

Snipist - July 27, 2016, 10:07 pm

Although it's probably harmless, I'll stick with what I have for now unless I see something better.

Folks - July 27, 2016, 10:15 pm

I havent used it but its by finn so its probably legit

Dem?n - July 27, 2016, 10:17 pm

This is great and thank you for sharing. Surprised to see such high false positives on VT lol. Thank you for the release man <3

AnOrdinaryGuy - July 28, 2016, 2:14 pm

Very nice bot!

If only there was not this google auth error

Neji - July 28, 2016, 2:16 pm

Everyone on OwnedCore.com was saying that it's unsafe because it's not open source or w/e but as OP said: use at your own risk!

Thank you very much for the share regardless!

Saw the same thing that's why I'm a little suspect.

Yin Yang - July 28, 2016, 8:02 pm

I'm trying this right now and it seems to be running just fine. I set my location in Central Park. Getting about 81K XP per hour. Not bad, thanks for the share!

gamercreeep - July 28, 2016, 9:56 pm

This bot is actually pretty good. Gets the job done. Getting 50-60k/hr without lucky egg but seems really consistent and won't stop working quickly. Plus its super easy to setup. Would recommend.
