Please invest in some [Spoilers] in the original post.

I'll stick around in this thread to see the drama.

weres the screenshots of us downing it/pinging out and lying to you???

We never do test boots, anyone who's made a ticket knows that check our faq, you're no different.

If we recommend VIP it's because it's the strongest plan we have and there is nothing else we can

do for you, service suspended.

this leser kid is annoying af, he does this every month he buys.

like we do you keep rebuying VIP for \$200+ if everrrry month you come on HF and try to ruin sales from posting shit on our thread or making reports? makes no sense lmao like are you a multi or something? you're trolling us right???

I have not opened dispute only after you've account suspension

All the words that you write here is just distracting

It has nothing to do with the subject

You have to suspend the account?

Why ?

You should refund the money

LeSeR - July 31, 2016, 1:18 am

You should refund the money

LeSeR - August 1, 2016, 3:05 pm

My account is still suspended

You should return the money

Ympker - August 2, 2016, 12:53 am

There really was no reason for you to suspend his account. If he paid atleast grant him the respective access and resources for as long as he paid for.

Seems like a legit report ! I also bought this crap before and the power is terrible ! They lie about power and will say anything to sell a plan, very bad.

I don't think that is good way to do business !

Can also see from the messages that after you told him you need to be sure it will down your target, he just tells : "Yup seems you just need to buy VIP".

Pretty funny that he uses a bullshit excuse as not testing your target after saying that !!!

H3H3Production - August 3, 2016, 9:26 am

Man that sucks :/ All booter's i see are either scams or go down after some months. I mean, what stresser can we trust these days? I just wish that there would be a stresser that does not lie about its power :/ Man, i would even pay more for that.

Sorry for your loss OP. Hope that this gets resolved!

lol i'm sure kid.. don't contradict yourself if we said anything to sell a plan we'd do test hits with TN

but oh wait we don't do any test hits weirddd.

up 1 year now, no downtime, no scams, hundreds of renewed plans.

It's normal after a while for 0.0001% to make a invalid report =)You say I can make a target down

But in fact I can not do so

In addition to ignoring all tickets

What do you want me to do !

I have used all legal means to you

But you did not respond

So I gave a warning to the community only

Because you have fraud

But when saw you suspend my account

Published report scam

This is also a legitimate

Quite simply if you do not want the customer to use the service? You can have the amount returned
