Thread: [See a rare sighting? Post coords here! v3 \[LOCATIONS POSTED ALMOST EVERY MINUTE!\]](#)

Pindakokosnoot - July 28, 2016, 6:42 am

THIS IS NOT A SUPPORT THREAD. MAKE ONE INSTEAD, THIS IS A THREAD FOR COORDINATES

How to contribute with sending coordinates?

There are a few ways to get coordinates.

1. Go on a pokemon scanning site ex: [pokevision.com](#) and filter the unique pokemons. Start clicking untill you find one and share the coordinates which you can find in the URL.
2. Alot of people who spam coordinates (I'm one of them) use discord, which is a chatroom. There are ALOT of chatrooms where people use exploits to obtain these coordinates and share them. Simply copy the coordinates and post them here ?

Prefer not having these questions on "how do you guys get coordinates?????" anymore

Goodluck Sniping..

Since the first thread [HERE](#) is full/glitched, I decided to sn1pe a third version. Below are some helpful tools to use for sniping! Post coords of rare pokemon here!

How to Snipe Pokemon without getting a ban?

Spoiler ([Click to View](#))<https://hackforums.net/showthread.php?tid=5351209>

Soft banned, and want a quick unban?

Spoiler ([Click to View](#))- Information

QuickSpin is a tool to try to unban your softbanned account.

Uses the RocketAPI (GitHub)

- Usage?

Run QuickSpin.exe

QuickSpin will ask for the information it needs to unban your account.

If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

- !

Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.

A successful unban is not guaranteed due to the nature of the exploit.

Feel free to try again if it didn't work the first time.

Setting Things Up

Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.

Set DefaultLatitude to the latitude of where your character in game is.

Set DefaultLongitude to the longitude of where your character in game is.

Choose AuthType: Ptc or Google.

Ptc - Enter Username and Password in the fields named accordingly.

Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

Running the bot

After you are done setting things up go ahead and run the bot.

You will be greeted by this <https://puu.sh/qeBVI/4b9d05dee4.png>

<https://puu.sh/qfYr4/203d681667.png>

Once we've found the coordinates of a Pokemon to snipe <https://puu.sh/qeCb4/a2a1094346.PNG>
Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In my case it was : 40.788268154987, -73.968539742814 <https://puu.sh/qeCAw/0975b00399.PNG>

Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in PokeSnipe <https://puu.sh/qeClv/de06c07399.png>

Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.

You should be seeing something like this next (Your chosen Pokemon of course)
<https://puu.sh/qf7AJ/f3df95fe8e.png>

That's all for now. Hopefully something like this doesn't happen to you:

Q: Can you run it from anywhere and Snipe Anything on the continent?

A: Yes!

Q: Why snipe?

A: When you get to the higher levels you will need to start looking for specific Pokemon if you wanna win those gym battles.

Q: What is IV?

A: <https://www.youtube.com/watch?v=50smDf5xQpk> It's the percentage of the the absolute perfection of IV.

Commonly Known Problems

People tend to spell Pokèmon names incorrectly so check the names here:

<http://pastebin.com/raw/Uzpg3rMQ>

Also.. Pokevision url's have messed up coordinates. Try to not use those. There are better alternatives!

Ran out of Pokeballs? Spoiler ([Click to View](#)) PokeStopper
[\[Download\]](#)

Q: Refresh token?

A: It's created in the configs folder after you've logged in with Google once. GoogleAuth.ini contains that token. No need to manually do anything. If you wanna log out delete the file GoogleAuth.ini

NOTE: This bot won't know if your bag is upgraded. So if you have upgraded bags in the game, use something else.

The normal version will delete revives and all that other shit and keep the max amount of Pokeballs for a user that hasn't bought bag upgrades.

The gym version will maximize in keeping potions and revives, minimum on Pokeballs.

Ignore the "There's an update available."

Want an auto PTC account creator?

Spoiler ([Click to View](#)) <http://www.dc4in.com/pokeacccreator.php>

These bots are not created by me! I have found them on another forum! I do not take credit for these bots!

I know, I get between 80~90 IV pokemons from the discord chat though,

There is another chat which only gives 95 IV+ pokemons but it takes a while before they post lmao

IV's are Individual Stats (supposedly hidden) and along with hp, these IV's are what decide the maximum CP for each level. If you find a low CP monsters it means nothing but the monster being a low level, the higher the Individual Stats the higher CP potential as you level up.

I am using Google, what I'm saying is PokeVision uses PTC. That's where most of the cords come from, either directly or through PokeSnipers. Very few come from people actually finding them and posting cords.

No it shouldn't if it's a different account. Make sure you aren't soft banned as well. Or you might be out of pokeballs/your pokemon inventory might be full.

Servers are either hammered or have been intentionally slowed down. The clients are trying to display info that hasn't been read yet. That's whats causing the crashes.

Use nox, go to default location. once found pokemon to snip go to the location its @ and just click the pokemon once youre in battle go back to your default location and now you can capture the pokemon and not get soft banned :)

when the pokemon escapes it tells you you are softbanned but when you try again you can catch them again. This is ofc if you didnt mess your location etc and if it worked before.

I'm sniping with Necrobot, but I like the fact that I can line up snipes with it. The only problem is that

it takes a while, but I can deal with it.

Doesn't matter, whoever makes the 4th thread after this one gets glitched makes it.

You don't have to tell us that ur making a 4th one.

Cold Hearted - July 29, 2016, 3:11 am

Well I'm off now.

I've posted about 30 different Co-Ords, enjoy guys.

Peace out.
