Thread: [\[UPDATED\] QuickSpin - PokemonGo Softban Unbanner \[UPDATED\]](#)

astano - July 28, 2016, 10:49 am

- Information

QuickSpin is a tool to try to unban your softbanned account.
Uses the RocketAPI (GitHub)

- Usage

Run QuickSpin.exe

QuickSpin will ask for the information it needs to unban your account.

If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

- !

Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.

A successful unban is not guaranteed due to the nature of the exploit.

Feel free to try again if it didn't work the first time.

- !

This thread is also not the place to discuss if this exploit is working.

It has worked for others and also for me while testing, so this tool has been made to automate the process.

What was the point of literally copying and pasting what OP posted?

I installed the 1.1 version but after loading up the location etc. it shows some red error and disconnects instantly.
