Hi,

I used to offer my services for 3\$, but since I do not get enough orders, I consider doing this for free. My main purpose is to improve myself. By making experience I will learn more and more about photoshop, and that, is my main goal.

I may do 2-3, 4 max graphics per day, if there're more you'll gotta wait unfortunately.

Thank you.

I'd like a relatively simplistic logo made based around the letter J.

No colour required, just vectoring. Like this;

I know it's not much to go on, but let your imagination take you. If you require more information then just PM me!
