I'm only level 13 btw, what a legit account looks like.

I was legit for 8 days and level 14. Then I find out everyone is doing some form of cheating where I live. If you can't beat them, join them.

My legit account is 29, Went almost everyday after work, jogged, and ran for some rare spawns. Don't think much people cheat where i'm located but just botting just because I can.

So am I pathetic for grinding my way to 29, sleeping 2-6 hours a day and getting up for work? I don't think so, but this is also Hack forums where I would assume botting would be one of the main things.
