Thread: [Inserting from xml to database in vb](#)

antibiotic1 - July 29, 2016, 2:15 am

I have xml that looks like this

```
Code <?xml version="1.0" standalone="yes"?>
<sdnList xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xmlns="http://tempuri.org/sdnList.xsd">
  <sdnEntry>
    <uid>36</uid>
    <lastName>AEROCARIBBEAN AIRLINES</lastName>
    <sdnType>Entity</sdnType>
    <programList>
      <program>CUBA</program>
    </programList>
    <akaList>
      <aka>
        <uid>12</uid>
        <type>a.k.a.</type>
        <category>strong</category>
        <lastName>AERO-CARIBBEAN</lastName>
      </aka>
    </akaList>
    <addressList>
      <address>
        <uid>25</uid>
        <city>Havana</city>
        <country>Cuba</country>
      </address>
    </addressList>
  </sdnEntry>
```

And the code that i am using to insert starts like this

```
Code node_list = xml_doc.SelectNodes("//sdnEntry")
For Each node In node_list
  If CheckElement("lastName", node) <> "" Then
    sql = "INSERT INTO us_sdnentry (uid_,lastname,sdntype) VALUES "
    sql &= "(" & node.SelectNodes("./uid").Item(0).InnerText & "," &
CheckElement("lastName", node) & "," & node.SelectNodes("./sdnType").Item(0).InnerText & """)"
    db_sql.RunSql(sql)
  End If
  sql = ""
  ,
  ,
  ,
```

The problem is that when i am debugging and my program executes it just skips the foreach, it dont go inside...

From my 101 XML/JSON : <https://hackforums.net/showthread.php?tid=5353651>

Result:

Table definitions:

Edited:

If you want to save your aka members just:

PHP Code

```
<?php  
param(0).Value = myData.sdnEntry.akaList.aka.uid  
param(1).Value = myData.sdnEntry.akaList.aka.lastName  
param(2).Value = myData.sdnEntry.akaList.aka.type
```

First they ignore you, then they laugh at you, then they fight you, and then you win.
