Thread: [\[NecroBot FIX\] Temporary Crashing](#)

success = true - July 29, 2016, 2:18 am

This was suggested by a few members. This script will auto restart the NecroBot.exe process every 20 minutes.

Steps:

1. Edit Config/config.json
2. Set "StartupWelcomeDelay" to false
3. Open notepad
4. Paste [this](#)
5. Save into the same folder as your NecroBot.exe file, and save as NecroBot.bat
----> Ensure the 'Save as type' is set to 'All Files'
6. Run the .bat

This should suffice until the random freezing/login issues are fixed.

(Jul 29, 2016 02:24 AM)orangemist Wrote: [\[CITE\]](#) This would reset your location every 20 minutes back to the original coordinates. So it will look like you've travelled back to a location it took 20 minutes to get to in a matter of seconds. The softbans will kick in.

How would it?

True, I'm botting on a secondary account so I don't really care and crashing was kind of annoying. I'm sure this can be avoided by setting a smaller roam radius in the config.

Do we have to do any setting to bypass the "Program will continue after the key press" ?

success = true - July 29, 2016, 2:31 am

Yeah forgot to mention that, editing main post.

Fuckadoodledoo - July 29, 2016, 2:31 am

Also how does it change the co-ordinates? and is there any way to stop it doing this?

That post got deleted, I'm not sure it even would be honest. I could only imagine this would be a problem if you "MaxTravelDistanceInMeters" was set to a very high value.

Do you have any idea how i can stop it from saving logs in the .txt file?

It keeps saying that its in use by another process when another bot is writing its logs to it

So are you trying to run simultaneous processes? I don't see an option to disable logging from what I see.

All the bots are logging in the same .txt file. And they cant do it at the same time, so I'm getting errors. and those errors cause a loss in xp as it completely restarts the process lol..

Do you have multiple folders for different bots? I feel like a bot should allow an array of accounts to be specified.

Nah, i dont have multiple folders. That would be fucking ridiculous to be honest. having 10+ folders just to be able to bot properly

Guess i'll be switching to something else then as this is complete bullshit lol

Xiforce - July 29, 2016, 3:08 am

Hmm lets see if it works now lol
