Where is the best place to buy e-liquid online in the UK?

Would rather HQ liquid instead of cheap but if you know of some cheap HQ stuff then lmk! ?

Also fast delivery is needed since I don't want to be waiting a full week each time I order.

Im going to be completely honest with you mate, your probs best off buying it from a vape shop as then you can taste what its like. Its only a thought. Some shops allow under 18's if you are under age.

I usually buy from the shop close by but they've put their prices up since the next closest shop is like 17 mile away and I don't feel like doing a 34mile round trip every time I want some juice.

I'm 27 btw lol, just hoping to order some online to save me a trip thats all.

Why don't you mix your own cocktail? then you can control what you use?

Why not just buy like 360ML at a time that usually lasts me about 2 weeks. and in most cases you might be able to get a slight bulk discount. I know a store near me does a discount if you buy 5-9 and then another if you buy 10+

Try amazon.co.uk

Not sure if they have HQ juice, but there is juice for really cheap I've got myself some nice liquid

from there.

360ml would last me a lot longer than 2 weeks and I'm constantly toking on my e-cig, I don't know how the fuck you get through so much lol. I know I can get deals.

I can't believe you're the only one who replied to the thread with an answer I'm looking for. I simply want to know of a decent place to buy online. I've purchased from amazon before, it wasn't the best liquid I have ever had but that's not the main issue. The main issue with amazon is finding liquid with 1.8mg nicotine. Every damn liquid I look at is Onicotine on that site lol

£16 for 60ml, not bad!

Yeah, I assumed this but I have purchased some with nicotine in the past, they no longer sell this though.
