Thread: [NecroBot being a dick.](#)

Le Max - July 29, 2016, 1:46 pm

I have no clue why but essentially my bot is just skipping having to visit a pokestop to get more pokeballs, any advice for this?

Ygore - July 29, 2016, 1:47 pm

I think you're banned just like me :/

Rask0 - July 29, 2016, 1:47 pm

At least you can run yours :'(

Lord_Jesus - July 29, 2016, 1:48 pm

Apple User - July 29, 2016, 1:49 pm

This has been happening to me lately.

Ran out of pokeballs in addition running out of the radius, checking my coords.ini folder, when they are properly at the right coordinates.

:'(This bot can't run thirty mins without an error.

Le Max - July 29, 2016, 1:49 pm

I'm not banned, it says you are soft banned if you are banned. It eventually arrived at a Pokestop about 3 minutes later, at a Pokestop though it's literally taking another 3 minutes to leave to another one. Idk man, wasn't doing this so slow before.

Demonstrate - July 29, 2016, 1:52 pm

It's because your bot is set to snipe at the locations you have set in the config file. Just go into your config file and set "SnipeAtPokestops" to false.

Shoppa - July 29, 2016, 1:52 pm

Same issue, restarting helps often but it's annoying as fuck

Le Max - July 29, 2016, 1:55 pm

I have set it to false now and have just started it, will reply if this fixes it.

Lord_Jesus - July 29, 2016, 1:56 pm

Think I might be banned or some shit!

12kb - July 29, 2016, 2:03 pm

Yeah happened to me, turning snipe off works just fine

Celtic - July 29, 2016, 2:08 pm

You have no balls because you have snipe turned on mate. in config change the snipe option from true to false.

Le Max - July 29, 2016, 2:15 pm

(Jul 29, 2016 02:08 PM)Celtic Wrote: [\[CITE\]](#) You have no balls because you have snipe turned on mate. in config change the snipe option from true to false.

I never turned it on, it came toggled on sir.

I'm doing it in Japan, assumed since all the hentai nerds lived there that it would be best.

EDIT: Bot is literally useless at this point, it's having huge ass errors and catching no pokemon.

Clockworks - July 29, 2016, 3:27 pm

It was working fine to begin with today, few hours later it started finding pokemon but not going to stops. Now it does neither and prompts a big red error log and dies.

Classick89 - July 29, 2016, 5:37 pm

same thing was happening to me with pokeballs, just restarted the bot and it didnt do it again.

darkend - July 29, 2016, 5:39 pm

If you download the source instead of the compiled files you can edit the recycle feature to what items you want to keep and seeing as you have no Pokeballs im assuming your recycler is removing them. Isn't hard to change just download Visual Basic 2015

Contact me for more help I can show you how.

It is really too much effort to install all of that just for a bot, the bot is dying as it is already, not working at all and just spamming pokestops etc. Looking for a new bot in the mean time whilst this is fixed hopefully!

NKingdom - July 29, 2016, 5:44 pm

It works fine from me on v0.3.3, just only a problem which the program will dead sometimes. I have run the bots for whole night and it went well, now are level 22 with 8 hours botting.

Because everytime Necro Bot got a update, it will create a new config and auth file, which you need to type it all again and the config file changes a lot. You need to read it and see if there are somethings that you do not want.

I have found the same problems with the "No Ball" issue as the "SnipeAtPokestops" is set to true as default, and please correct it to false.

Mind sending me a copy that doesn't recycle pokeballs and when it goes to a pokestop fills up with the maximum amount of pokeballs? Want to use my sniper also :D

NKingdom - July 29, 2016, 5:51 pm

On my setting, I turn the sniper function off, and why you don't want to recycle pokeballs ?? You can set the maximum of pokeball in the config file too.

Le Max - July 29, 2016, 5:55 pm

What even is recycling pokeballs? As far as I know it's just deleting them when i wanna use them to snipe pokemon.

NKingdom - July 29, 2016, 5:59 pm

<https://gyazo.com/9e9dae3dc64db2a6f6d8e82e03c39fc5>

set those to 999 and it should work

Le Max - July 29, 2016, 6:01 pm

set those to 999 and it should work

My issue isn't that it's getting to 25 and then resetting, it goes to a Pokestop and get's 2 pokeballs, gets 2 pokemon and then goes back AGAIN and gets barely any. Before it was getting the whole 25 refill from 1 stop. Even with 8 pokeballs it will STILL stop.

sweatpants - July 29, 2016, 6:46 pm

you guys need to turn off sniping and recycling for your pokeballs. thats what fixed it for me

rockfeler4 - July 29, 2016, 6:48 pm

sniping isnt working for me at all if anyone can help :)

Succubusty - September 14, 2016, 11:51 am

How do you even turn off recycling for your pokeballs?

It's literally recycling ALL my pokeballs, every single time...

Ni??c??k - September 15, 2016, 5:01 pm

I'm just surprised NecroBot still exists. I thought everyone stopped using it.

What settings does everyone run with now that they've been cracking down on botters? Seems like they'd take longer to level up too.

SIM-403479 - September 18, 2016, 5:08 am

Instead of using necrobot you should download Pokemobot it works much more efficiently.

The XP per hour is around 20k depending on your settings.
