Thread: [why is my btc unconfirmed](#)

Ger? - July 29, 2016, 4:39 pm

I sent some btc to my multibit wallet like 4 days ago and it still shows as unconfirmed. Anyone know how I can get it to go through? It has never taken this long.

Natalie Dormerr - July 29, 2016, 4:55 pm

We need more information and also there is a bitcoin section for this type of topic

Strictly - July 29, 2016, 4:55 pm

My bitcoin took 1 hour to send but never 4 days. Thats way to long.

yotoprules - July 29, 2016, 5:20 pm

It usually only takes about 10 minutes or less for me, something is wrong there.

Bluffer - July 29, 2016, 5:22 pm

Somebody sent me Bitcoin 7 minutes after you posted this thread and I had it within 15 minutes completely confirmed.

Not sure what's up with yours, that's really shitty.

Niccolò Machiavelli - July 29, 2016, 5:24 pm

Did you send a miner fee and everything?

Ger? - July 29, 2016, 7:05 pm

Idk what that is, I just sent it from one wallet to my multibit wallet and it's still sitting there unconfirmed. It isn't very much so it's not really a big deal but I'd still like to know where my btc went lol

you probably didn't pay enough fees.

Ice Poseidon - July 29, 2016, 7:55 pm

Well for me, I use coinbase and I need 3 confirmations, each confirmation takes like max 20 minutes. Don't know what's wrong on your end.

Damn I didn't know I had to pay a fee. Does that mean it's never going to confirm?
