Thread: [See a rare sighting? Post coords here! v5 \[COORDS POSTED ALMOST EVERY MINUTE!\]](#)

Forward™ - July 29, 2016, 8:36 pm

[img]http://www.pokemongo.com/static/assets/images/pokemon_go_logo.png[/img]

Everyone knows what to do, please don't leech and contribute with the others.

If you don't know, this is a thread purely to post coordinates of rare pokemon, so people can use nox, or pokesnipe to snipe rare pokemon. I will be posting a lot of coords for pokemon so I decided to make my own thread.

Please put a pokivision link, name of the pokemon and approx time it will despawn in your post, thanks.

How to contribute with sending coordinates?

There are a few ways to get coordinates.

1. Go on a pokemon scanning site ex: pokevision.com and filter the unique pokemons. Start clicking until you find one and share the coordinates which you can find in the URL.
2. A lot of people who spam coordinates (I'm one of them) use discord, which is a chatroom. There are ALOT of chatrooms where people use exploits to obtain these coordinates and share them. Simply copy the coordinates and post them here Yeye

Prefer not having these questions on "how do you guys get coordinates?????" anymore

Goodluck Sniping..

How to Snipe Pokemon without getting a ban?

Spoiler [\(Click to View\)](#)<https://hackforums.net/showthread.php?tid=5351209>

Soft banned, and want a quick unban?

Spoiler [\(Click to View\)](#)- Information

QuickSpin is a tool to try to unban your softbanned account.

Uses the RocketAPI (GitHub)

- UsageVictoire

Run QuickSpin.exe

QuickSpin will ask for the information it needs to unban your account.

If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

- !

Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.

A successful unban is not guaranteed due to the nature of the exploit.

Feel free to try again if it didn't work the first time.

- !

- Downloads

QuickSpin 1.0

Want a quicker way to snipe pokemon instead of using nox/other gps spoofers?

Spoiler ([Click to View](#))

PokeSnipe V2

<https://mega.nz/#!7VFjEbbT!DHwfln2nHv1uOA4Gi7ad4BJCjDK77fMhVsKOKnUrvhM>

Setting Things Up

Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.

Set DefaultLatitude to the latitude of where your character in game is.

Set DefaultLongitude to the longitude of where your character in game is.

Choose AuthType: Ptc or Google.

Ptc - Enter Username and Password in the fields named accordingly.

Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

Running the bot

After you are done setting things up go ahead and run the bot.

You will be greeted by this <https://puu.sh/qeBVI/4b9d05dee4.png>

<https://puu.sh/qfYr4/203d681667.png>

Once we've found the coordinates of a Pokemon to snipe <https://puu.sh/qeCb4/a2a1094346.PNG>

Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In my case it was : 40.788268154987, -73.968539742814 <https://puu.sh/qeCAw/0975b00399.PNG>

Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in PokeSnipe <https://puu.sh/qeClv/de06c07399.png>

Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.

You should be seeing something like this next (Your chosen Pokemon of course)

<https://puu.sh/qf7AJ/f3df95fe8e.png>

Missed a good pokemon? Post it here!

It's actually getting annoying seeing it twice. One of them should just be the bigger person and
close it seeing as either thread works and both threads serve the same purpose.

Exactly that.

You can't catch them, they are for future updates. That's why when you reach lvl 40 you don't get a masterball and you still get lucky eggs.

When you look at how big the Pokemon Go community is compared to HF you realize that everyone on HF having a rare Pokemon will barely impact the entirety of the game.

Not all the time. If you snipe, the bot tells you itself.

If it's shit then just transfer it or something, and then wait for a good IV one to lvl up.

Welcome brother xx

S????i - July 30, 2016, 2:01 am

Can I get a confirmation?

IV is better than CP.

If CP is low but IV is at 100%, it just means that the pokemon's level is low?

If you use stardust to level up the pokemon, the pokemon will still get to maximum power, just it'll take more star dust?

If CP is low but IV is at 100%, it just means that the pokemon's level is low?

If you use stardust to level up the pokemon, the pokemon will still get to maximum power, just it'll take more star dust?

Yes sir. IV determines the maximum level at the very end of powering up a Pokemon. If the Pokemon does not have 100IV, it will not be able to reach it's maximum CP at the end of powering up. IV or Individual values also determines a Pokemon Attack/Defense/Speed and Stamina in values out of 15. 100IV is 15/15 in each individual value.

AKA: IV100 Dragonite at CP 10 would be better than IV 30 Dragonite CP 2000, because with some star dust and candies, the CP 10 has more potential in the long run than the CP 2000

Make threads in the Pokemon Go Section, 1/250 chance of getting it, if I recall correctly. It's a "luck" reward.
