**Cold Hearted** - July 30, 2016, 1:34 am

I created this quick iMacro for easy findings of Pokemon, it clicks from top to bottom of the map and locates all Pokemon, all you need to do is have Pokevision open and then load up my macro.

Here's what it does:

To install this all you need to do is drag my .iim file into your iMacro scripts folder at  
C:\Users\USERNAME\Documents\iMacros\Macros

Enjoy guys, btw it's just a normal .iim file.

(I created this on Firefox, may not work on Chrome or other browsers)

I can already tell that you're a massive troll due to your reputation, it's also a iim file which can't have viruses.

Stop trolling, do something worthy of your time, kid.
