Thread: [\[v2.13\]Precompiled - Edited Haxton Bot - Best XP Setting - 300K/hr](#)

Azurio - July 30, 2016, 3:17 am

Hello guys,

This is probably the only precompiled bot with the new API update that instantly works with a guaranteed 300K XP/ Hr (no drop) without any hassle to configure or run.

Credits to Haxton and Sytharix group for editing!

For people having .net framework errors, you need service pack 1 on Windows 7 to install .net framework 4.6, then it should work

SETUP INSTRUCTIONS FOR MAXIMUM EXP PER HOUR (v2.13.):

SETUP INSTRUCTIONS FOR MAXIMUM EXP PER HOUR

1. Download the file and extract it
2. Open up the extracted folder
3. Open up "Haxton-SytharixEdit.exe.config" file
4. Change the "AccountType" setting to either Google or Ptc
5. Depending on what you chose on step 3, put either your Google Email & Password or PTC Username & Password into the necessary fields
6. Save file
7. Run "Haxton-SytharixEdit.exe"
11. Save file
12. Run START.BAT in main folder.

Last update:8/8/2016

v2.3. Download Link (better then v2.5 atm): [click here](#)

v2.5. Download Link: [click here](#)

Changes v2.5:

- Lot's of bugfixes
- Bot manager
- Made 2 bots, one for pokestopfarming and one for exp
- Other improvements to increase speed
- More stable

v2.9. Download Link: [click here](#)

Changes v2.9:

- Lot's of bugfixes
- works with the new pokemon go update
(don't expect it to work perfectly, 2.3 still works too)

v2.10 Download Link: [click here](#)

Changes v2.10:

- Reverted some things back to the way they were in 2.3

v2.13 Download Link: [click here](#)

Changes v2.13:

- Working with API changes
- Increased and insane xp/hr

ENCOUNTERALREADYHAPPENED = MEANS YOU ALREADY CAUGHT THE POKEMON. THE LONGER THE BOT RUNS, THE LESS FREQUENT THIS ERROR WILL BE. IF YOU RESTART IT EVERY 20 MINUTES THEN YOU'RE GOING TO GET IT A LOT.

TASK CRASHED/FAILED = PROBLEM WITH ORIGINAL HAXTON CODE. I CAN'T EDIT THIS, WE NEED TO WAIT FOR AN OFFICIAL UPDATE FROM THE DEVELOPER.

GETTING A LOW XP/HR? JUST LET THE BOT RUN. IT WILL GET BETTER AS TIME INCREASES.

THE BOT IS SLOW TO START UP, THIS IS NORMAL. GIVE IT A MINUTE AND YOU'LL BE MOVING AT SUPER SPEEDS

Have fun!

Well it has the fastest XP settings already preset on the fastest bot and it's precompiled. Alot of people get crash because of confused editing config file and they don't know what's best, so this is the most noob non-gui release i guess.

Pokemon with 3k cp is pretty hard but if you are above level 25 i recommend just sniping pokemon with Pokesniper and use the live topic to get the coordinates. I got almost 10 pokemon over 2k now or near 2k and it's just a matter of powering them up to get the highest cp possible.

To get those you actually need to be level like 36+ at level like 29 you are able to get a 3k dragonite with 95+ iv

Anyone think I should make make a precompiled bot that gets about 350k exp/hr?

Are you getting XP from pokestop? might be you are soft banned

Azurio - July 30, 2016, 6:04 am

the burst is the other name for sniping, it uses a undetectable sniping method to quickly snipe on the coordinates preset (recently got outdated because of pokenest-update) while catching normal pokemon on ur location, so basically if u scroll down in user.xml, you can adjust the nest coordinated :)

atahan - July 30, 2016, 6:38 am

yes but it seems like it doesnt catch any pokemon regularly, only tries it via sniping/bursting and doesnt find anything.,
when nests are confirmed, im gonna add them.

meanwhile i will stick with necro, it makes 100k+ at your coords aswell.

For anyone interested, there's a developer who works alongside the Haxton developers and makes off-shoots of the releases. His releases have a much higher XP rate than the original. Here's a discord inv for those that're interested in checking it out. Compiled releases are all in "Haxton".

I'm running i7-6200k with water cooler, 16gb of ddr4 ram and a SSD but no, specs make no difference on such a small program like this. It's all the location etc but you must of just started playing at a really lucky time when there was heaps of pokemon spawned lmao.

When clicking on the regular XML file without opening it just takes me to a black internet explorer page. Any help would be great thanks

This bot has been running very smoothly for me, a friend of mine ran the bot for an out starting at 800k exp p/h and after the hour was up was still running 220k p/h. This was 2.9 exp.

Jimmie - July 31, 2016, 11:14 am

Posting here to test this later.

AnestheticHannibal - July 31, 2016, 11:15 am

It works but crashes every 2 hours.
Same results with 2.3 and 2.9.
XP/H is 100k.

EDIT

I forgot to mention that it doesn't crash it just starts repeating loading inventory or something and nothing else.

Happens after 2 hours every time, I restart it and its fine again.
But if anybody knows a fix please share.

That's a problem with the app itself and is a common bug. Just keep restarting the app and keep trying. That's what I do.

PSA: For anyone as dumb as me , you may not have noticed every single pokemon is added to the noCatchList By default , removing these entries will allow pokemon to be caught again and increase exp.

Also , the setup guide in the OP states to edit the "user.xml" within the "EXP-FARM" file , however editing this "user.xml" and not the one inside of "POKEMON FARM" , results in a permanent "Fatal error" occurring in red within the bots console.

Don't run the start.bat, just run the expfarm only.

Using 2.10 and getting a steady 80-100k after an hour.

Hopefully this doesn't crash after 2 hours like the previous versions.

Edit

Still does the same shit as other versions after 2 hours, I wonder if its on purpose.(Updating inventory over and over again)

xlosmuertosx - August 1, 2016, 4:13 am

Hey guys, Ive noticed something.....

Suppose I have a pokemon with a cp 200... a pokemon with a higher cp is found but once its captured, the newly caught pokemon is transferred. Any fix for this ?

AnestheticHannibal - August 1, 2016, 6:39 am

I've been reading other threads and they're telling me that using this bot gets you soft banned over and over again.

Apparently it teleports you, unbans you and catches the pokemon then repeats that.

Is this true?

EDIT

Now people are saying it have a built in unbanner that shows when you got banned/unbanned. If that's the case then I haven't gotten banned, which is good.

If OP sees this please respond.

So what's happening there is your Min Keep CP is set to something like 1000 (higher than the newly caught pokemon). Once you catch one that is over that limit, it will transfer the low CP one.

There isn't a fix as that is what it's supposed to do

@Dexter - August 1, 2016, 1:56 pm

Using the 2.10 version now started off at 1.2 million xp per hour currently on 500k per hour after 10 minutes.

koa1aski - August 1, 2016, 2:00 pm

Why are you taking Sytharix's work and claiming it as your own?
The creator of this edit is Sytharix.

Djehuty - August 1, 2016, 2:00 pm

This isn't your bot and the creator isn't real happy. Give Sytharix credit for it.

BobLeeSwagger123 - August 1, 2016, 2:01 pm

Stolen from Sytharix
Sytharix is the original creator, not you.

-rep !

TheNaked - August 1, 2016, 2:01 pm

Using someone else's config and bot claiming it's your own is not cool.. Atleast give some credit dude..

UnnaturalGreens - August 1, 2016, 2:01 pm

Lmfao this isn't yours, it's stolen from the Sytharix discord.

Nice dude, stealing shit, not giving credit, and claiming it as your own. Real classy.

stopstealingshitfaggot - August 1, 2016, 2:03 pm

give credit where credit is due fagg0t

Akiwox - August 1, 2016, 2:08 pm

GIVE fucking credit you mug

#/MaUr3bW

Dralel - August 1, 2016, 2:09 pm

This isn't yours !!! GIVE CREDIT TO : Sytharix #/MaUr3bW)

CatDecompose - August 1, 2016, 2:11 pm

Give credit or we'll slit your throat faggot

'OverSight - August 1, 2016, 2:16 pm

Im glad you give credit where its due. Rude.

chopmeat - August 1, 2016, 2:16 pm

this is not your fucking bot you piece of shit

#/MaUr3bW

there is where credit is due

Jaerin - August 1, 2016, 2:20 pm

LOL the bot dev is encouraging people to brigade the thread

Dude is posting this shit like its his when it isnt. Give the credit

laxerman213 - August 1, 2016, 2:37 pm

This guy is just stealing from Sytharix.

Azurio - August 1, 2016, 3:24 pm

First off all, I have not claimed anything,

secondly, i re-edited the edited version, this is open source so I have the full right to rename when I re-edit, Haxton is still the major coder here

cheers

Oh really? You re-edited it? Want to explain how you got the source code for the edited version? And why the files last edited date is literally the exact same as Sytharix's releases?

Edit: I see you added credit to your main thread. Sytharix said on his discord that if you want to upload his bot somewhere that's fine, but you MUST put his discord link in the post.

laxerman213 - August 1, 2016, 3:50 pm

bahaha.. you're joking right? You are literally stealing this guy's work. Also, PLEASE, I beg you, show me what you "edited".

Give Sytharix credit you flake.

ThisIsCyn - August 1, 2016, 3:51 pm

To all the people complaining saying he didnt give credit. It says haxton bot in the fucking title..... All

he has done is edit it. He isn't claiming he made it anywhere just providing a fucking config jeeez since it's open source too he can name it whatever the fuck he wants

UnnaturalGreens - August 1, 2016, 3:52 pm

The problem isn't that he stole the original Haxton bot. He stole Sytharix's modified Haxton bot and is claiming it as his own.

Am I doing this wrong?.. <https://gyazo.com/68eff0e44da80be65ee13229db3212d3> left it in the default position

7 - August 4, 2016, 1:30 am

This has stopped working now?

I think since the new update.

Azurio - August 7, 2016, 6:07 pm

Bot had been updated for the new API and XP/hr has been drastically improved, enjoy! :)
