Thread: See a rare sighting? Post coords here! V6 [COORDS POSTED ALMOST EVERY MINUTE!]

Mino - *July 30, 2016, 7:23 am*

[img]http://www.pokemongo.com/static/assets/images/pokemon_go_logo.png[/img]

Everyone knows what to do, please don't leech and contribute with the others.
If you don't know, this is a thread purely to post coordinates of rare pokemon, so people can use nox, or pokesnipe to snipe rare pokemon. I will be posting a lot of coords for pokemon so I decided to make my own thread.
Please put a pokivision link, name of the pokemon and approx time it will despawn in your post, thanks.

How to contribute with sending coordinates?
There are a few ways to get coordinates.
1. Go on a pokemon scanning site ex: pokevision.com and filter the unique pokemons. Start clicking untill you find one and share the coordinates which you can find in the URL.
2. Alot of people who spam coordinates (I'm one of them) use discord, which is a chatroom. There are ALOT of chatrooms where people use exploits to obtain these coordinates and share them. Simply copy the coordinates and post them here Yeye

Prefer not having these questions on "how do you guys get coordinates??????" anymore

How to Snipe Pokemon without getting a ban?
Spoiler (Click to View)https://hackforums.net/showthread.php?tid=5351209

Soft banned, and want a quick unban?
Spoiler (Click to View)- Information
QuickSpin is a tool to try to unban your softbanned account.
Uses the RocketAPI (GitHub)

- UsageVictoire
Run QuickSpin.exe
QuickSpin will ask for the information it needs to unban your account.
If you use QuickSpin frequently, edit the included user.xml to quickly load your info.

- !
Make sure the location you enter into QuickSpin is the location you want to be at, otherwise you just end up getting softbanned again.
A successful unban is not guaranteed due to the nature of the exploit.
Feel free to try again if it didn't work the first time.

PokeSnipe V2
https://mega.nz/#!7VFjEbbT!DHwfLn2nHv1uOA4Gi7ad4BJCjDK77fMhVsKOKnUrvhM

Setting Things Up
Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.
Set DefaultLatitude to the latitude of where your character in game is.
Set DefaultLongitude to the longitude of where your character in game is.
Choose AuthType: Ptc or Google.
Ptc - Enter Username and Password in the fields named accordingly.
Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

Running the bot
After you are done setting things up go ahead and run the bot.
You will be greeted by this https://puu.sh/qeBVI/4b9d05dee4.png
https://puu.sh/qfYr4/203d681667.png
Once we've found the coordinates of a Pokemon to snipe https://puu.sh/qeCb4/a2a1094346.PNG
Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In my case it was : 40.788268154987, -73.968539742814 https://puu.sh/qeCAw/0975b00399.PNG
Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in PokeSnipe https://puu.sh/qeClv/de06c07399.png
Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.
You should be seeing something like this next (Your chosen Pokemon of course)

what i do is i take cord, and i run it into quick spin first so i get unbanned there
and then i run it again on pokesnipe , am i doing it right ? is there a faster way ?

Yes... You just use quickspin with the coords to your HOME, then open pokesnipe [coords in user.htxml are your HOME], and once it opens type pokemon name and the coords of THEIR location

I just put my city coordinates on pokesnipe so I don't get softbanned and then just use it normally.

PokeSnipe doesn't give you a softban, so you don't need to run quickspin. Just make sure you use your real coords in the user.xml in PokeSnipe.

You can use NecroBot and just add every pokemon to the DoNotCatch list. that's what I do. Recycles what I want it to, and stocks up with like 300 Pokeballs within a pretty short time. Also hatches my eggs.

You use quickspin, let it completely finish unbanning you [takes a few minutes]. then reuse pokesnipe. Are your default coords in pokesnipe setup to your city? they should be.

2. IV
3. CP

IV stands for Individual Values, it basically determines how perfect your Pokemon is from the start. There's 3 individual stats that are randomly generated when the Pokemon is created. 0-15 in all 3 categories. 15 in everything would result in a 100% IV Pokemon.

whats more imporant iv or cp
short term: cp
long term: IV

With a high IV you can basically power your pokemon to the fullest.

You can get a 3k cp snorlax with a 100IV maybe after you powered him up and leveled up (every time you level up you can boost him even more)
But if your snorlax is a low IV you wont be able to power him up as much as with a high IV pokemon thus you wont get it to max cp.

I have no clue m8 i just told you my experience after 3 days. Sometimes people get lucky and get a high cp pokemon and sometimes you get a shitty cp meanwhile others have a high cp from the same pokemon and coordinates that have been posted.

This is why IV is more important. Ofcourse you want a decent cp pokemon with a high IV so youd have to use less candy and startdust to power your pokemon once you decide to power them up.

do the higher CP flee bcuz that means ur pokeballs are weak and you need some masterballs and ultra balls for higher cp

You should level up your character to 30 so you get max cp on any pokemon - 30 is the highest lvl to get cp at.

In the config file you have to put default coords for ur location. make sure NecroBot and PokeSniper both have the same default coords.

With any bot, just turn off it's ability to catch Pokemon and put it in a dense area that has Pokestops. I think some bots now have an option just to farm Pokestops.

Basically Pokesniper enters the battle with the pokemon at said location then teleports back to your old location where you aren't softbanned and game thinks you caught it there - thus getting you the pokemon.

What method are you using to find pokemon? I am currently using Pokevision (it's down) and pokesnipers.com which is a little slow.

What level are you?

Blastoise are rare, they don't last very long, you could be missing them. Make sure the cords are very recent.

It's hard to get 3k cp pokemon, you would need a near perfect IV dragonite with max cp. If you can catch a 90+ IV dragonite, you can max it out easily.

I've maxed out my dragonites around 45, can't catch anymore unless I transfer a few.
Still haven't got one maxed out at 3k.
