Thread: [PERMANENT BAN APPLY TODAY!!! MAY SATAN BLESS U ALL](#)

n31ght0 - July 30, 2016, 10:33 am

that's tool try to unban me from softban but always fail !!!!!!!!!!!
thats mean banned permanent

Evil Bob - July 30, 2016, 10:34 am

What am I looking for here?

Cold Hearted - July 30, 2016, 10:34 am

It's called a softban.

Jesus, I bet your mother has a tough time.

What even is this thread.

Pharah - July 30, 2016, 10:34 am

What are you on about?

Mind explaining?

Wyatt Garcia - July 30, 2016, 10:35 am

Useless thread. You got softbanned.

ThatsComplex - July 30, 2016, 10:36 am

Lmao all i see is a soft ban....

Satan will not be blessing anyone today, How about stop fucking jumping from Tokyo, to Ny in 2 minutes.. It helps ?

DarkBlaze - July 30, 2016, 10:37 am

just unban yourself m8, you're bot doesn't have soft ban remover? hardly takes a min.

Dude you're soft banned, just log out of the accounts for a couple of hours, One of my accounts i been using with HAXTON is running at 400k xp per hr for the last 12 hrs and still haven't been ban. You kids need to stop jumping locations every 30 mins.

Shoppa - July 30, 2016, 10:45 am

I had the same issue, had to restart the bot and wait a while till it continues again

Hey Im Goku - July 30, 2016, 11:00 am

At what point will people realize that perma bans will display a message when manually logging into the app..

Demonstrate - July 30, 2016, 11:02 am

That's a soft ban, I was experiencing the same, I waited a bit and nothing worked so I used QuickSpin and resumed operations.

Did you really create an account just to say that?

Also, you don't know that.

Nobody has been perma banned, yet.

So god knows, it may be silent, or it may be displayed via message.

I'd assume you'd get emailed, though.

Roger Waters - July 30, 2016, 11:07 am

I had that earlier. I waited a few hours, then the client had an update, and I was able to get back into the bot. Just make sure your bot is up to date and try again later.

Catszzzz - July 30, 2016, 11:17 am

how did they perma ban in ingress ? was it a wave of everyone who botted or warnings

Hash1brid - July 30, 2016, 11:21 am

its not a perm banned, stop hopping from locations every minute and this wont happen.

The Silenced - July 30, 2016, 8:54 pm

Yeah it seems like the company who made pokemon go is starting to crack down on bans, making them harder and longer. Guess it sucks for those who bot all the time. Hopefully there will be a new work around soon.

Does half the retards who commented on this thread not notice that is the tool to remove softban and that its not working for him? That's what he trying to explain.

P3TER P4RKER - July 30, 2016, 10:10 pm

Maybe your unbanner is bugged or you are loosing connection could be alot of reasons but im not perma'd and I run ALOT of bots. So... Idk man.

Niantic seemed too upgrade their soft ban that's about it.

"No usable pokestops found in your area"

Some areas fail to load the pokestops. Happened to me when I was trying to bot in Central Park, but have had no problems in Australia and Japan.

Switch your location.
Get rid of your softban.
Continuing botting.

So.. I've had this all night since the whole situation with Necrobot:

"Unable to authenticate try again later". On two of my PTC accounts. Can log in fine on the website, but ever since I updated I can't log in.. Why?

Severs probably, i got that message on my Ptc account yesterday almost the whole day but i was able to use my google account. Pokevision is down as well ATM.

Shmurd? - July 30, 2016, 10:34 pm

can someone link me quickspin and if im botting in ny right now i can switch my home location to tokyo get the softban then use quickspin and resume within 5 mins?

Most bots should attempt to unban you. If not, it'll take about 15 minutes of running before being unbanned.

NY to Tokyo should take about 35 actions before getting unbanned.

For this long though? Everyone else is logging in no issues but here I am unable to do anything unless I log into my gmail..

That one? If so, it will remove softbans in a bad way. There's a possibility of an infinite loop when the exploit is patched.

Does that bot seriously do a full restart on any error?

And appears to do the same with any unhandled exception.
