Thread: See a rare sighting? Post coords here! V7 [COORDS POSTED ALMOST EVERY MINUTE!]

Thank you for visiting this new Pokemon go thread. Here you can post cords of rare/powerful Pokemon for others and yourself to snipe. First of I would like to say a big thanks to the top contributors of the previous threads:
Thread 6
Thread 5
Thread 4
Thread 3
Thread 2
Thread 1

How to contribute?
There are a few ways to get coordinates.
1. Go on a pokemon scanning site ex: pokevision.com and filter the unique pokemons. Start clicking untill you find one and share the coordinates which you can find in the URL.

2. Alot of people who spam coordinates (I'm one of them) use discord, which is a chatroom. There are ALOT of chatrooms where people use exploits to obtain these coordinates and share them. Simply copy the coordinates and post them here.

3) Most people here use the pokesniper bot, it would be helpful if you could post your cords in this format:
Code Pokemon
12.345,-123.456
Time leftThis format is best because people using pokesniper can copy paste the whole thing, rather than having to individually paste or type the name followed by the cords.

If I use a sniping tool such as pokesnipe with I get banned?
Spoiler (Click to View)There is a small chance you will get "soft banned", most people who snipe with the tools have never been soft banned, however mistakes do happen. As long as you set your cords in the config folder, close to where you last logged out, you can snipe pokemon all over the world

I messed up, I'm soft banned, please help me
Spoiler (Click to View)

What is quickspin and how does it work?
Quickspin is the easiest way to get unbanned, it works off a bug, when you are soft banned, if you swipe the same pokestop 40 times, you become unbanned. The latest version of quickspin will spin the pokestop 60 times, just to be safe.

How to use?
Download quick spin here:
https://mega.nz/#!eFp0FT7a!Z07PX2uZ2TI8pFYYkWbIlUo6tTbloEJaksxsuf-xV4o

Once you have downloaded, extract the folder to your desktop, open the user.xml file with a text editor, set the auth type to your choice. (Do you login with pokemon trainer account, ptc, or google) Then fill in the appropriate login information. Finally, set the place you would like to login at, if you have been botting in japan but you want to login at your house, set the cords of quickspin to your house, and then run it.

How do I download and setup pokesnipe?

Setting Things Up
Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.
Set DefaultLatitude to the latitude of where your character in game is.
Set DefaultLongitude to the longitude of where your character in game is.
Choose AuthType: Ptc or Google.
Ptc - Enter Username and Password in the fields named accordingly.
Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

Running the bot
After you are done setting things up go ahead and run the bot.
You will be greeted by this https://puu.sh/qeBVI/4b9d05dee4.png
https://puu.sh/qfYr4/203d681667.png
Once we've found the coordinates of a Pokemon to snipe https://puu.sh/qeCb4/a2a1094346.PNG
Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In my case it was : 40.788268154987, -73.968539742814 https://puu.sh/qeCAw/0975b00399.PNG
Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in PokeSnipe https://puu.sh/qeClv/de06c07399.png
Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.
You should be seeing something like this next ( Your chosen Pokemon of course )

The first one was by a non upgraded member with -18 rep.

I didn't see instagram's thread, although it is an exact copy of the other thread with outdated infomation.

Quick question, whenever I teleport I have to spin the pokemart until I'm unbanned. But sometimes there aren't any pokemart near me if I'm trying to catch a Pokemon. Any suggestions?

You log in, save the coordinations where you are (which is the place you are not softbanned yet).

You teleport to the location you want to catch the pokemon (DONT CLICK ANYTHING, ONLY THE POKEMON YOU WANT TO CATCH)

In the catch screen, DONT do anything, set your location back to the first location (location where you logged in)

Catch the pokemon

???

Profit

Edit:
Or you use the pokemon sniper software ;p

Please, stop with the requests... I don't believe many of people who post coordinates, will spent their own time just to find coordinates for you.

I see this thread not being nearly as active as it was before pokevision stopped working. I think we need to find a similar site, or start our own community project.

Posting about it over and over on every single page isn't going to make it magically spawn mate. Patience is a virtue especially when you're on the hunt for 100IV Pokemon.

I've had this problem too, at least a couple of times.

When i restarted the program it was fixed,

Also if you are using PTC, the PTC Login services could be offline.

When you post so long the first you put in is always gone. I tried one in the middle with 10min and it was gone.
There's no point of making such a long.

Cheers anyway!

Anyone knows any decent spawns or nests in California, Nevada, Arizona, and Oregon area for the following?

I'm looking for some coordinates for some decent nest spawns for the following Pokemons still to add to my collection.
Dratinis
Gastly
Machop
Magikarps
Poliwag
Psyduck
Staryu
Scyther

If anyone know some really decent Spawns for these especially in California, I would truly appreciate it. Thanks.
