I'm looking for a working free xFinity account.

I'm in need of one ASAP. I'll let you use my sig space also if you like. Thank you in advance to whoever helps me. If so, please me PM the info instead of the thread.

For what? Watching movies? On another hand, if someone could send me one that works for xfinity go so I can watch movies without having to worry about my isp kicking my ass to mexico, that would be nice ?
