Thread: [Mining bitcoin or any altcoin without electricity costs!](#)

?D?vi??c?t?TM - July 30, 2016, 4:32 pm

Would it be profitable enough to live from?

I mean, if I set up 5 S9 Antminers
i should be make like 41\$ a day..

Walt DisneyTM - July 30, 2016, 4:33 pm

\$1230 a month isn't bad, but you could do better.

If you worked a job + ran this 24/7, it'd be extremely profitable and livable.

Re-invest a % every month, make more.

Woods - July 30, 2016, 4:34 pm

How would you get around the electronic costs?

Malthemar - July 30, 2016, 4:39 pm

How on earth would you do that?

Siphoning energy from a neighbor?

Lakica - July 30, 2016, 5:10 pm

Come on you guys .. He is clearly gonna use solar panels for this :D

The solar panels costs a buttload though. I'm not even sure if it'd be worth the investment at that point. You'd want to get more miners than that.

webdev77 - July 30, 2016, 5:13 pm

If you can get large amounts of free electricity, why not buy a lot more mining hardware? You could easily make a few thousand a month if you can invest enough up front.

Pharah - July 30, 2016, 5:13 pm

He's probably gonna hide his Antminers in Walmart ?

Gionee - July 31, 2016, 1:01 am

Yes it's profitable and just mine altcoins to make even more.

ShNuG - July 31, 2016, 1:09 am

well its great.. I had the same plan in my mind while ago.. I could get free electricity, but have no upfront !

I can invest \$2k in mining hardware atm.. So anyone would recommend mining btc or any other coins ?

Reece Morgan - *July 31, 2016, 7:20 am*

Just on a side note, it's definitely possible to get free electricity in your home. It's not necessarily legal though, and you shouldn't attempt it if you are not a very good electrician.
