Thread: [Buying Crypter Source + USG Source](#)

n0tReanimation - July 11, 2010, 7:08 pm

As the title says,

Post your offer,

I will deny/allow depending on your offer.

Don't worry about how much i have.

NOTE: I will need some assistance when i have the source, so the seller must provide assistance.

flAmingw0rm - July 11, 2010, 7:10 pm

In which language you want it?

n0tReanimation - July 11, 2010, 7:17 pm

Oh forgot to add that,

Whatever's available.

But VB6 will be mostly available.

NOTE: I will need some assistance when i have the source, so the seller must provide assistance.

flAmingw0rm - July 11, 2010, 7:33 pm

If you would like a good source code of crypter in VB6 with USG included, check this topic:

<https://hackforums.net/showthread.php?tid=502415>

It's free and really good source code.

If there was a only way to download it..

I'll pay for that damn download link.

Bump.

Still looking for offers.

n0tReanimation - July 11, 2010, 8:53 pm

SpKRypt's source is broke.

Idk what it is but doesn't seem to be fit for me.

Still looking.

Threadlocks - July 11, 2010, 8:56 pm

i want to give mine check my sig i am trusted

Still Looking for sources.

n0tReanimation - July 12, 2010, 8:34 am

Bump.

I still need one.

SpK's won't work for me. It does work functional but i cbf to getting a working stub. This is the assistance i need.

Guys,

Where could i find a source?

I don't want a free one.

Please?

50GTB - July 12, 2010, 9:31 am

Come on guys their must have someone selling cheap he is trusted!

n0tReanimation - July 12, 2010, 2:32 pm

I don't need cheap.

I just don't want to be ripped like Zorata who sells his damn source for something that can be easily found, like RunePE 64 and 32Bit. VB.NET or VB6 either way.

Infinito - July 12, 2010, 2:38 pm

Well, I have a private crypter source + USG I bought from Cache a while back and I modded it so it's pretty good now, if you want to buy it.

NOt FUD. Watch out. :/

????

Ecasrev - July 12, 2010, 3:12 pm

qTorrent says:

bl0b...?

Infinito says:

A while back Cache was selling Bl0b crypt source.

I bought it and heavily modded it.

qTorrent says:

create a stub and upoad

Infinito says:

Added tons of features.

I can't for some reason.

On this PC.

I'll show you.

My PC is messed.

qTorrent says:

send me the stub than and ill upload

Infinito says:

I can't create here.

It's FUD.

Or should be.

I'll teach how to FUD anyhow.

????

Well there goes \$50.

It doesn't matter though, good practice to FUD things ya know?

Also, Infinito has 24hrs before his ass gets reported.
