Thread: [Free Guide On How To Install Sky TV Openbox](#)

UTRONEX - July 31, 2016, 6:56 am

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/1_zpsheieubff.jpg\[/IMG\]](#)

UTRONEX's
Complete Guide On How To Install Sky TV Openbox

After my last popular guide on how to install Kodi (Found here-
<https://hackforums.net/showthread.php?tid=5145210>). I decided it was time to show you all how to access the entire Sky TV package through the Openbox v8s.

Altogether this cost me £70 to set up. That included buying the box, ethernet cable and server. The server that you buy will last you for 12 months.

What you will need before you get started..

Openbox v8s (You can buy this from eBay or Amazon)

An ethernet cable or wifi dongle (depending on what you will be using)

A USB stick (Any size will do)

Your laptop or computer

A line from a server (we'll get to this part later)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6584_zps9pb1hkir.jpg\[/IMG\]](#)

The one other thing you will need is an existing Sky TV dish and the cable coming from it.

PLEASE NOTE- You do NOT need Sky TV! You only need the Sky TV dish and the cable (for the signal).

1. Set up your Openbox v8s. You'll need the HDMI cable, ethernet cable (or wifi dongle), power cable and your Sky TV satellite cable plugging in. Once it's all plugged in, press the power button on your remote and wait for your Openbox to fully load up.

2. So first, we will get the easy stuff out the way. In this part, all we are doing is downloading some updates and installing them on your box. First thing you'll be doing is heading over to <http://eopenbox.co.uk/firmware/> to update your firmware. Download Openbox v8s.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/2_zps3thlcdz.jpg\[/IMG\]](#)

3. Next, head over to <http://www.ajsat.co.uk/> and click "Standard List". This will download the latest channel list. If you ever find any of your channels are scrambled you can come back here and download the updated channel list.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/3_zpsayqqcku5.jpg\[/IMG\]](#)

4. Copy these files over to your USB stick.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/4_zpsxr80eogu.jpg\[/IMG\]](#)

5. Put the USB stick into the front of your Openbox and clicked menu on your remote.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6585_zps4o2xyhmi.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6585_zps4o2xyhmi.jpg)

6. Scroll over until you find "Upgrade By USB" and press OK.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6586_zpsk0kahlu9.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6586_zpsk0kahlu9.jpg)

7. It should automatically be on your firmware upgrade so click start. Wait for it to run through the process and your box may reset itself. If it does, just wait for it to load up again :)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6587_zpsrihyrh7p.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6587_zpsrihyrh7p.jpg)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6588_zps0tfsmhhy.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6588_zps0tfsmhhy.jpg)

8. After it has finished loading, go across to "Upgrade By USB" again and select "Misc Files". Go down to the bottom and click "Select & Upgrade". Select your TP_PROG.dbs file, click green to select it then yellow to upgrade.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6589_zpsgqabfoz7.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6589_zpsgqabfoz7.jpg)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6590_zps6kr6fv52.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6590_zps6kr6fv52.jpg)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6591_zps1kguzus5.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6591_zps1kguzus5.jpg) 9.

Now, to get connected to the internet, scroll across to "Network Setting" and press OK. Depending on which one you're using, go through the setup and connect to the internet. Once done, come out of the menu and back onto your main TV screen.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6592_zpszjxmencg.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6592_zpszjxmencg.jpg)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6593_zps0ldq.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6593_zps0ldq.jpg)

10. You can access channels from the FAV button on your remote now. All the normal (free channels) will work fine, all the others (paid for) will be "scrambled". Lets fix that :)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6594_zps0ioiyias.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6594_zps0ioiyias.jpg)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6595_zpsxgdoxy0r.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6595_zpsxgdoxy0r.jpg)

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6597_zps0hzaeepfn.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6597_zps0hzaeepfn.jpg)

11. You'll need to purchase a server line and put it onto the openbox. To purchase one, go on eBay and search for "openbox gift". Don't pay anymore that £20 for one of these, they all do the same job.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/5_zpsyezs9qnb.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/5_zpsyezs9qnb.jpg)

12. Once purchased, you'll be given a server line. It will look something like this.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/6_zpseocfmqto.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/6_zpseocfmqto.jpg)

13. Copy the line that you are sent and do NOT change anything. Paste it into a notepad file and go into file> save as. Change the file type to "All files" and save as CCcam.cfg

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/7_zpspk5n0lom.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/7_zpspk5n0lom.jpg)

14. Copy that notepad file onto your USB stick and put it back into your openbox.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/8_zpsfnuykw1m.jpg\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/8_zpsfnuykw1m.jpg)

15. Now, you want to go back into the menu and scroll across to where you see "Network Setting".

You need to open a secret menu on the box by pressing 6666. Once pressed you should see "Camds Setup" appear. Go down and open it.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6598_zpsdv00ghfg.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6599_zpsezhqx96r.jpg[IMG]

16. Click "Update files by USB". Select "CCcam.cfg" click green, then yellow.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6602_zpsajgozkbw.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6603_zpss43n1xqp.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6605_zpsd7uertt5.jpg[IMG]

UTRONEX - July 31, 2016, 6:57 am

17. Once finished, click on "Manage config files". Then OK on "CCcam.cfg. You should see your server up and running (I have blocked out my user). At the end it should say "Need Reboot" so go ahead and turn your box off then back on again using the remote.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6606_zpsmy4iuslf.jpg[IMG]

You're all done :)

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6609_zpswwmlz0si.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6610_zpspkw40gma.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6608_zpsq3r8dxu5.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6612_zpssl8ivp.jpg[IMG]
[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/IMG_6613_zpsqcseqslu.jpg[IMG]

If you followed this guide step by step, everything should work perfect. If it doesn't, send me a PM and we'll work together to get it working.

Thanks for reading!

killersaif - July 31, 2016, 7:08 am

Woaahhhh now I don't need to pay £60 a year to renew thanks for this! :)

UTRONEX - July 31, 2016, 11:37 am

No problem man!

£60?? I wish! Sky TV customers pay well over £1000 a year for all of these channels!

Enzio - July 31, 2016, 11:55 am

HQ as fuck as always ?

JASON AND MEDEA - July 31, 2016, 12:32 pm

Vouch for this. I'm a Sky customer, I honestly don't know why... Pay like £130 a month I think, but that includes or internet. I don't even use our Sky line either. We use BT most of the time so there's not even a point in having it anymore.

I may install one of these, thanks!

UTRONEX - July 31, 2016, 12:54 pm

(Jul 31, 2016 12:32 PM)Conor McGregor Wrote: [\[CITE\]](#) Vouch for this. I'm a Sky customer, I honestly don't know why... Pay like £130 a month I think, but that includes or internet. Nah man you want to get one of these installed ASAP, get Sky on the phone and tell them to fuck off! They extort their customers, breaking up movies and sports in such a way that you have no choice but to purchase every package they have.

I thought this was too good be true but it's really not. I've ran my for two months now with absolutely no problems at all. I've shared it with HF because I think more people need to know about it. A lot of people don't do it because they think it's hard to do when it's not.

Go for it dude and any help you need just drop me a PM :)

GDUFF567 - July 31, 2016, 1:42 pm

Posting for later. Thanks a lot mate

Pass Candy - August 1, 2016, 4:18 am

Looks like a great guide mate. :)

sp?c?m?n - August 1, 2016, 5:54 am

I have one of these and its amazing We cancelled our sky and just took out the fibre and it works amazing We can run this and also go and play play stations and shit 10/10 tut btw ?

UTRONEX - August 1, 2016, 10:50 am

(Aug 1, 2016 05:54 AM)UserNotify Wrote: [\[CITE\]](#) I have one of these and its amazing We cancelled our sky and just took out the fibre and it works amazing We can run this and also go and play play stations and shit 10/10 tut btw ?

Awesome man nice to hear some feedback from someone who's running one of these boxes. I've heard nothing but good comments. :)

xDowwdeen - August 1, 2016, 11:06 am

This is amazing have used it before, the only down side is you don't get the Sky Channels in HD any more, as they changed there encryption and hasn't been bypassed again. But you do get the BT Sport Channels in HD and others just the Sky Sports and Movies you don't.

UTRONEX - August 2, 2016, 9:27 am

Yeah I'm hoping they will be de-encrypted soon that would be awesome.

I've got to say though, for a hacked service, the quality is pretty damn good :)

Magma - August 2, 2016, 10:51 am

Quick question - will this work in the US?

UTRONEX - August 2, 2016, 5:51 pm

(Aug 2, 2016 10:51 AM)Magma Wrote: [\[CITE\]](#) Quick question - will this work in the US?

I can't see why not but you would have to install your own satellite. You could hire a company to fit one for you, they would be able to put one up and face it in the right direction for you to get the

signal.

Magma - August 3, 2016, 1:23 pm

Can't I just get a big ass antenna?

Like right now I have Direct TV, the box is install and everything. Should I just disconnect the wire and plug it to the new box?

UTRONEX - August 6, 2016, 7:02 am

It has to have one of these connections on it and I can only assume that it has to be a dish. I don't think an antenna would do the job to be honest. You can pick dishes up for like £50 in the UK. You could get them just as cheap anywhere else I think.

No problem mate :)

(Aug 6, 2016 01:03 PM)Coon and Friends Wrote: [\[CITE\]](#) Is there any risk to doing this? Looks good though, I might have to investigate in one of these

There's always risks with doing things like this but there is very little risk IMO. It is only traceable through the server line that has been purchased and they are being sold through eBay.

FozyCS - August 8, 2016, 3:39 pm

Looks really complex tbh, so thanks for making this tutorial for noobs like me :D Keep it up. Hf needs more members like you

UTRONEX - August 15, 2016, 4:01 am

Hmm, I'm not sure. Never seen any that cheap before.

Is it a 12 month gift or shorter? £2 seems very cheap mate.

Uptraid - August 20, 2016, 10:42 am

How long does it normally take for a gift to be delivered?

UTRONEX - August 21, 2016, 12:27 pm

(Aug 20, 2016 10:42 AM)?DinoBLUD Wrote: [\[CITE\]](#) How long does it normally take for a gift to be delivered?

I got mine emailed to me within about 5 minutes but I suppose it really depends on if the seller is at home or whatever :)

Joey Pirtz - August 21, 2016, 3:21 pm

Cool shit. Now all I need is a way to hide the dish from the fucking TV Licensing twats.

UTRONEX - August 21, 2016, 4:02 pm

(Aug 21, 2016 03:21 PM)Joey Pirtz Wrote: [\[CITE\]](#) Cool shit. Now all I need is a way to hide the dish from the fucking TV Licensing twats.

Lol, TV licence. Not about to "expose" myself on a public forum but yeah...

The dish means nothing matey, you could have a dish without the cable connected or it could be fucked. Joys of the TV licence- they can't prove shit! ?

Trust me on that by the way, I've spent the last few years learning the "TV" game inside out ?

ThisIsCyn - August 22, 2016, 7:21 am

How safe is this to do ??????????????????
i do have tv license btw

UTRONEX - August 22, 2016, 2:08 pm

(Aug 22, 2016 07:21 AM)ThisIsCyn Wrote: [\[CITE\]](#) How safe is this to do ??????????????????
i do have tv license btw

In my opinion it's very safe. The boxes and servers are sold freely on eBay and Amazon. Obviously you make your own decision on whether you consider it safe to use, I'm simply showing you what to do. Whether or not you decide to do it is in your hands ?

ThisIsCyn - August 22, 2016, 2:55 pm

Hi mate. Yes all tutorials I write are things that I use myself. If she hasn't sent it you I would open up a case immediately. It may be a server that you're buying but it's still an eBay item. Get that bitch told!

(Aug 22, 2016 11:56 PM)Junx Wrote: [\[CITE\]](#) Posting for future reference thanks for this
No problem buddy, glad to of helped.

Messi10 - August 23, 2016, 9:11 am

One question, can I do this in America? And can I get american channels and even in spanish?

Sick - August 23, 2016, 9:30 am

Very nice tut ..i only have a few questions i take it the box does not record channels ?
Also do you think the quality is just as good as what comes through virgin on a tivo box or better ?
think if this box does not record thats the part i would miss the most :-(

"Knowledge will give you power, but character respect."

UTRONEX - August 23, 2016, 10:31 am

(Aug 23, 2016 09:11 AM)Messi10 Wrote: [\[CITE\]](#) One question, can I do this in America? And can I get american channels and even in spanish?

Hey man. Yeah someone actually asked me that not long ago. As long as you have a sky dish installed on your house and pointing towards the satellite, it will pick up the signal. Once the satellite is set up you can pick up all kinds of channels but I won't say definite because I don't know how many American/ Spanish channels you can get. To install a sky dish I would buy one off eBay for around \$30 and install it yourself using a guide or get a local business to install one for you.

(Aug 23, 2016 09:30 AM)Wr?ith Wrote: [\[CITE\]](#) Very nice tut ..i only have a few questions i take it the box does not record channels ?

"Knowledge will give you power, but character respect."

Well good news for you, you can record! All you have to do is plug a USB stick into the front of the Openbox and hit your record button on the remote. All your recorded programmes will be saved on the USB stick for playback whenever you wish. You can also use an external hard drive if you wish. As for quality, it's standard definition (SD) I could make a video to show you but it won't really show the quality. It's brilliant quality and very stable.

Metrize - August 23, 2016, 10:43 am

This is great, heads up though HD channels (that aren't freeview) won't work due to Sky's encryption, but hey, getting every channel for such a low cost - even if its SD - you can't complain!

Sick - August 23, 2016, 10:56 am

(Aug 23, 2016 10:31 AM)UTRONEX Wrote: [\[CITE\]](#) Hey man. Yeah someone actually asked me that not long ago. Oh thats good but you know what really fucks you up
my bill for virgin is £49.99 for large tv package,phone,100meg
so i called them and said ok how much would it cost me in just taking your internet ..The price is £35.00 and there will be a price increase in a few months of £2.99 ..So basically you have to take the net.tv,phone ..even going down to the lowest tv package i would only save a few pounds :-(
kinda sucks eh

UTRONEX - August 23, 2016, 11:53 am

kinda sucks eh

But the £20 for a server lasts for a whole 12months, it's not a monthly payment and does the "large" tv package give you absolutely everything? £49.99 seems really cheap for all tv channels and the Internet. If you are getting everything then it's a damn good deal.

Sick - August 23, 2016, 2:51 pm

(Aug 23, 2016 11:53 AM)UTRONEX Wrote: [\[CITE\]](#) But the £20 for a server lasts for a whole 12months, it's not a monthly payment and does the "large" tv package give you absolutely everything? £49.99 seems really cheap for all tv channels and the Internet. i'm on the L tv package but really thats only a few options up from the lowest i get no movies etc or sports .

My phone is only free calls at the weekend from 7pm to 7am
and my net is super fibre 100

So really i have to take all 3 or as i say if i only took the internet it would be £35.00 plus a £2.99 in a few months ..

its just a cunt you have to take all 3 to get a good deal i would be a fool to loose the phone the tv and pay £35 +£2.99 for 1 months net

might must have to look about see if i can piggy back someones router lol

This is exactly how they get your money, by making sure that you have to order every single package they have. They're horrible and it's why I have no problem in jacking their signal to gain free entertainment :)

ThisIsCyn - August 24, 2016, 1:50 pm

so i had a sky dish setup and for some odd reason it wouldnt work so i have to setup a new one xD

UTRONEX - August 24, 2016, 9:51 pm

Good. I've never known anyone, including myself, have any problems when buying a server. Just a bad experience I'm guessing! Move on and buy another :)

Random Sauce - September 8, 2016, 10:01 am

Someone asked me this question before and I don't see why not. The satellite signal will be different and you made need a different gift as the server will have to de-encrypt different channel signals but yeah. If you need anymore help drop me a PM or reply, I'd be interested to go through this with you just to see if it can be done in a different country ?

Excalibur' - September 11, 2016, 5:01 am

You look kinda cute in the background :P

This should give you an idea of the work involved in setting one up. You can buy a sky dish and lnb from eBay US. Then it'll just need setting up and pointing the right way using a satellite finder :)

Famous Grouse - September 20, 2016, 2:20 pm

(Sep 20, 2016 11:07 AM)iNk. Wrote: [\[CITE\]](#) I'm in the USA :(
28.2E can not be picked up in the USA, but if you really are interested in getting into this then don't go for a sky mini dish as this is just too small try a Triax dish or even better motorised.

A motorised setup will give you the benefit of picking up a lot of satellite worldwide and US based. It will cost a bit but for the long term, it is great.

USA servers, I have not seen/heard of personally myself but you can get non-uk server. As you are US based it is probably even better going down the cable route, some non-UK servers are private and only deal in the country. If you do know your local satellite/s let me know i can check it out.

As for the box, Openbox/Skybox/Libertview (Have many names as they are easily cloned in china) is a very basic closed-source, and if going down the motorised route then an Enigma 2 (E2) box such as Dreambox, Vu+, Amiko, Weetek etc. will be best suited as the are Linux based but you can pick up clones for these too.

Weetek can can also handle Kodi, which is good if you don't want a satellite connection.

If you need any help feel free to PM me.

Good guide man :D

will help for a lot of people

KillaBoi - October 28, 2016, 9:25 am

Good guide! I want to do this, however, will it work with other models of the openbox? Also, could you pm me the links to the people and places you bought the box and gift from? I trust you more than the filthy scammers ;)

Also GLWYTut

:'(- October 29, 2016, 5:37 am

is there a version of this that runs on wifi and not needing a satellite?

UTRONEX - November 20, 2016, 11:07 am

(Oct 29, 2016 05:37 AM):(Wrote: [\[CITE\]](#) is there a version of this that runs on wifi and not needing a satellite?

Unfortunately not. You need the satellite signal for the channels. The internet simply provides a connection to the server allowing you to bypass the encryption.

Famous Grouse - January 5, 2017, 3:35 pm

(Oct 29, 2016 05:37 AM):(Wrote: [\[CITE\]](#) is there a version of this that runs on wifi and not needing a satellite?

Look into IPTV channels or servers

UTRONEX - August 7, 2017, 8:31 am
