Thread: [See a rare sighting? Post coords here! V8 \[COORDS POSTED ALMOST EVERY MINUTE!\]](#)

Thank you for visiting this new Pokemon go thread. Here you can post cords of rare/powerful Pokemon for others and yourself to snipe. First of I would like to say a big thanks to the top contributors of the previous threads:

[This thread](#)

[Thread 7](#)

[Thread 6](#)

[Thread 5](#)

[Thread 4](#)

[Thread 3](#)

[Thread 2](#)

[Thread 1](#)

How to contribute?

There are a few ways to get coordinates.

1. Go on a pokemon scanning site ex: pokevision.com and filter the unique pokemons. Start clicking untill you find one and share the coordinates which you can find in the URL.

2. Alot of people who spam coordinates (I'm one of them) use discord, which is a chatroom. There are ALOT of chatrooms where people use exploits to obtain these coordinates and share them. Simply copy the coordinates and post them here.

3. If you want to get cords to a specific pokemon, maybe to complete your pokedex, or if you want more candies of a specific type, you can have a look at my thread here:

<https://hackforums.net/showthread.php?tid=5359790>

4. Most people here use the pokesniper bot, it would be helpful if you could post your cords in this format:

Code Pokemon

12.345,-123.456

Time leftThis format is best because people using pokesniper can copy paste the whole thing, rather than having to individually paste or type the name followed by the cords.

I brainlessly copied Cam's thread

If I use a sniping tool such as pokesnipe with I get banned?

Spoiler ([Click to View](#)) There is a small chance you will get "soft banned", most people who snipe with the tools have never been soft banned, however mistakes do happen. As long as you set your cords in the config folder, close to where you last logged out, you can snipe pokemon all over the world

I messed up, I'm soft banned, please help me

Spoiler ([Click to View](#))

What is quickspin and how does it work?

Quickspin is the easiest way to get unbanned, it works off a bug, when you are soft banned, if you swipe the same pokestop 40 times, you become unbanned. The latest version of quickspin will spin the pokestop 60 times, just to be safe.

How to use?

Download quick spin here:

<https://mega.nz/#!eFp0FT7a!Z07PX2uZ2TI8pFYkWBllUo6tTbloEJaksxsuf-xV4o>

Once you have downloaded, extract the folder to your desktop, open the user.xml file with a text editor, set the auth type to your choice. (Do you login with pokemon trainer account, ptc, or google) Then fill in the appropriate login information. Finally, set the place you would like to login at, if you have been botting in japan but you want to login at your house, set the cords of quickspin to your house, and then run it.

How do I download and setup pokesnipe?

Setting Things Up

Begin with editing PokemonGo.RocketAPI.Console.exe.config open it up in Notepad++ or preferred text editing tool.

Set DefaultLatitude to the latitude of where your character in game is.

Set DefaultLongitude to the longitude of where your character in game is.

Choose AuthType: Ptc or Google.

Ptc - Enter Username and Password in the fields named accordingly.

Google - You don't have to edit anything, don't touch the refresh token, that will be saved automatically later.

Running the bot

After you are done setting things up go ahead and run the bot.

You will be greeted by this <https://puu.sh/qeBVI/4b9d05dee4.png>

<https://puu.sh/qfYr4/203d681667.png>

Once we've found the coordinates of a Pokemon to snipe <https://puu.sh/qeCb4/a2a1094346.PNG>

Copy the link of those direction" the last part of it separated by / is the location of the Pokemon. In

my case it was : 40.788268154987, -73.968539742814 <https://puu.sh/qeCAw/0975b00399.PNG>

Now we've got the Coordinates and the Pokemons name. I'll go ahead and type Venomoth in

PokeSnipe <https://puu.sh/qeClv/de06c07399.png>

Now it asks for the coordinates. Ctrl + V the coordinates you got earlier.

You should be seeing something like this next (Your chosen Pokemon of course)

He only prevented the whole bullshit with people making 50 of the same coord threads.

Cant blame him

Why does it matter to you? This sub forum is full of people who think being the poster of these threads matter, it's ridiculous. I actually like the way OP did it, it prevented 30 minutes of a dozen immature brats arguing over which thread deserves to be used. Stop being salty that YOU couldn't have all the internet glory [/s] of posting a fucking pokemon thread and grow the fuck up.

Believe me it does, I have the biggest e-penis around.

Sadly things are going a bit slow right now, most of our sites are down. This could be the last of these threads as I have found a way to get cords for any Pokemon with ease. We may never see another one of these threads once I finish the tutorial on the new method.

UPDATE: Pokesnipers is back up! Get sniping and share the best CPs and IVs!

Dunno why that happened. I catch them before I post so i know it's real and this is what i copy
pasted in pokesniper.

jipseey - August 1, 2016, 6:40 am

Do you guys have to edit the user.xml coords everytime you're sniping a pokemon

Leimone - August 1, 2016, 6:42 am

How do u guys cypypaste into Pokesniper?

Kekui - August 1, 2016, 6:43 am

No. You only put your home Coords in the user.xml, as that's where the sniper returns to after it's
done sniping.

Niantic has been sending cease and desist letters to PokeVision and other third-party app devs so it was probably shutdown.

Siy? - August 1, 2016, 9:56 am

Going to put <http://durfijjhet.nl/Pokemon/Pokemons.log> service down for now, made it for the community, not for people who copy-paste the coords without providing the link to other people. (AKA trying to get the pokemon award :3)

Service will be up on another day.

It's based on player level and it's RNG. You can get a 1k+ cp or 100 cp no matter the level

It's not dying, it's just getting harder to snipe, causing these threads to die down and slow down. I'm sure they'll always be someone to make their own pokemon map

Every 2 minutes the list becomes longer (new pokemons are added)

Every 6 minutes the list clears itself.

So every 6 minutes there is a new page of pokemons

Every 2 minutes the existing list gets longer
