Thread: [My new sign design!](#)

Excalibur' - August 1, 2016, 3:51 pm

So i made this sign, kinda stole 25% of the idea from a guy on HF, idk who. And 75% Original xD!

Please let me know if u guys like it!

The fps was smoother but since my PC suck, this is the best i can get!

and a bit blurry too idk why! it was much better in psd.

My PC started lagging so i gave up.

Made this in PS.

Rate it outta 10 and lemme know what should i change and what should i add.

If anyone wants it then let me know! lol!

PS: I'm not a pro! <3 I am learning from HF and a lot of other places.

Maybe make the white bit opaque , and if you're having trouble with fps record it at 25% speed, then use an online too to speed it up X4

Apart from that good concept, keep if up ?

Malthemar - August 2, 2016, 4:26 am

It looks pretty great, OP!

The white is a little too harsh and it could use a border :)

iSwear - August 2, 2016, 9:32 am

looks really nice!!! I can see the potential in this thing for ads, ect.. nice sig my nigga..

Aryan_Ahir - August 2, 2016, 11:01 am

nice..... i like this... good idea

Looks decent. I mean there's nothing much there's to judge, what i believe that you achieved what you were going for which is great.

I'd give it an 8/10, there's too much white empty space which you could've got rid of by maybe making the text a little bit bigger, maybe add a smoothing looking animation.

You got my skype so if there's anything you need help with lmk!

Thanks bro, really wanted your review, but as i said, i opened up a video in PS and used the frames from it, huge mistake. so i started lagging like shit! I will definitely work on it and try to improve this and my skills xD.

Good on ya bro. Nuttin like mine ??.

I think it's become a bit of a generic thing to do nowadays anyway.

PrecisionXYZ - August 3, 2016, 4:43 pm

You said "I'm learning" but you've already a good skill !

8/10 easy ?

Nerdi - August 3, 2016, 5:44 pm

The white takes up too much space in my opinion.

Make it more narrow, perhaps lower the opacity and play around with less tall / wide versions of this signature, using CROP.

Excalibur' - August 3, 2016, 10:02 pm

Thank you everyone, your suggestions really help me. I will use them and try to improve myself :)

Thank You, but good luck with the warning xD Unless the mods don't notice!

SilentKing - August 4, 2016, 7:38 am

This looks nice can someone link me to a tutorial on how to do this

What version of photoshop supports animation? Think the one I have installed doesn't have the

feature

I have been using CS6 for a few years! so i guess its in that version only!

M?xim - August 5, 2016, 5:21 am

It is a creative idea. What is the current filesize?

That is what I were thinking.. You could never, never optimize this signature to be less than 500kb.

FiftyTwo - August 5, 2016, 4:29 pm

Haha, I know where you've gotten the idea from. ;)

Really good sig but it is sort of ripping him off (not gonna name a name lol).
