Thread: [1 config for multiple bots?](#)

Lawsuit - August 1, 2016, 7:09 pm

Does anyone know how to change the path of the config file for the bots?

I want to use one config file for all my bots so I don't have to edit a bunch of configs everytime I change something.

Cheers.

Recompile the code.

Copy and Paste the config into each folder?

Also, I don't know where the path is located in the code.
