Thread: [PokeMobBot v1.1.3 - Custom Config - 170k-200k EXP/H \[2/8/2016\]](#)

Up In The Smoke - August 2, 2016, 1:57 am

Pokemon GO API has been changed - Bots are not working - Be Patient.

170k-200k EXP/H

I have tweaked the config for optimal performance

Download Config: [google.com/file/d/0B1-cbS6Cd6DBaHdOCE5rYVJpUGs/view?usp=sharing](https://drive.google.com/file/d/0B1-cbS6Cd6DBaHdOCE5rYVJpUGs/view?usp=sharing)[Click Here](#)

Download PokeMobBot: [Click Here](#)

Instructions:

1. Download PokeMobBot
2. Run exe and press Enter
3. Replace config.json with one above
4. Replace auth.json with one below and edit it with notepad

Sample [google.com/file/d/0B1-cbS6Cd6DBbIFyZ3dWdlZkejg/view?usp=sharing](https://drive.google.com/file/d/0B1-cbS6Cd6DBbIFyZ3dWdlZkejg/view?usp=sharing)[auth.json](#) for PTC Login

Have Fun!

Testing New Config - Looks Promising

1.1.3 Has a New PokeSniper Function:

When [PokeSnipers.com](#) Servers come back online I'll make an update!

(Aug 2, 2016 04:12 PM)strokin3 Wrote: [\[CITE\]](#) Mine works fine for like a minute and then walls of red text pop up! Then it keeps trying to log in and boom red text. cycle repeats 100000 times in 5 seconds.

If this happens re-download PokeMobBot and run exe and copy your config/auth to replace the ones it generated.

Is there a high chance of being soft banned? I just don't wanna run something on my main if It'll get soft banned repeatedly.

Softbans are apart of the Bots and will have no long lasting affect on your account.

The bots use an anti-softban function which will unban you in a timely manner.

Yeah much better.

Just the Snipe function server is down so its throwing an error every few seconds,
I cant wait until it comes back online.

Grab it while its hot and sizzling ? ?

?eall? h??d - August 2, 2016, 10:10 am

First couple minutes.

Edit: Now steady at 500k but dropping little by little.

Lil Boatt - August 2, 2016, 10:17 am

Thank you for this! Trying it out now. Much appreciated.

I didn't change the coords but I also haven't been logged into Pokemon GO since yesterday morning (around 24 hours ago).

Will I be okay if I let this run and when I'm finished I just wait like 12-24 hours before changing back to my OG coords?

Is there a reason it recycles all items every 1-2 minutes? It got me a lot of xp by using my lucky egg and evolving everything that could be evolved at launch but other than that isn't really doing much. :/

Yeah I don't really understand why it's recycling my pokeballs, it keeps saying not enough pokeballs to start sniping and then it finds some and recycles them lol

EDIT: Dropping under 90k.

I have this problem with regular pokeballs. It's always low and sometimes im even out of pokeballs. I still have 15-20 greatballs and like 70 ultraballs not being used most of the time. Then I have 100+ razberries and even when i dropped 50 of the razberries it didnt pick up more regular pokeballs and instead its collecting all the razberries again.

I miss the old feature from Necrobot where you could decide how many pokeballs, greatballs, razberries etc u want to have.

Scintillation - August 2, 2016, 11:42 am

Sniping fucks it all up cause sniping takes more time to actually tp to it and take it rather than just discovering it and instantly bagging it.

Softbans are normal with these settings. With teleport on, you are literally teleporting from one pokestop to another so naturally this results in short softbans at times. The exp gain with teleport on is far higher than with it off though.

No, I was running the bot after like an hour or two it just happened to every single one of my accounts, another user made a thread saying he had the same problem. He said he downloaded the latest version but idk how to compile it lol. Still needing a fix :(

NVM I fucking lied, shit still don't work. This is what every bot is going through...

LanaDelRey - August 3, 2016, 3:30 am

Cheers for the config, hopefully it works as good as you say it does.

godzillaguy - August 3, 2016, 3:34 am

In 3hrs i only made 120 k, is there a way to make it do 200k an hour

Up In The Smoke - August 3, 2016, 4:22 am

Testing a new config right now and it's going great compared to the current one.

Yeah it's just 90k, waste of space fucking LIAR! 200K my fucking golden salted bread stick.

P4R4DiSi4C - August 3, 2016, 4:46 am

These config are for farming XP right ?

How do I find a config that will just simply gather pokemons, evolve them and transfer them ?

GIBRALTAR - August 3, 2016, 5:24 am

i think your config renamed my pokemon in english is there a way to make them french again?

TolerGaming - August 3, 2016, 6:47 am

Can anyone explain how sniping works and how to change it in the configs (the right way). Sorry I am a noob,

Sanuhty - August 3, 2016, 6:55 am

although this is good im getting around 90k it is no where near close to 170k

38aytac38 - August 3, 2016, 7:18 am

Do you have a new config? I was getting ~180k now i am getting arround ~90k

Up In The Smoke - August 3, 2016, 7:29 am

New config coming very soon.

G0hma - August 3, 2016, 7:45 am

Fastest bot i've used so far, thanks for sharing.

Stevo - August 3, 2016, 8:16 am

so... for people who have no idea what they're doing with this... some guidance plz?

Cryptic v9 - August 3, 2016, 8:17 am

it still recycles for some reason even though i set max to keep to like 5000 for each. wtf

zoiners - August 3, 2016, 8:31 am

Using your one sampled. Anything else you're doing different?

PrecisionXYZ - August 3, 2016, 9:00 am

Thank you for this helpful tutorial, very nice job.

SIM-823730 - August 3, 2016, 10:02 am

Have this running on several different accounts. The experience per hour varies based on account. Though it's been good on two accounts with 160k/hr while others are running just a little over 80k/hr. Still a good configuration none the less, don't understand why people are so angry.

Stevo - August 3, 2016, 10:06 am

Set all the files up and I get this:

Egyptian Royalty - August 3, 2016, 10:12 am

Hour and a half in, 195k/hour

I think it's dependent on lucky eggs but it's definitely the best experience rate bot I've come across so far.

Up In The Smoke - August 3, 2016, 10:35 am

New config coming in 1 hour.

Heartboy - August 3, 2016, 11:16 am

I want to give a great review for this, but I feel like there could be a little more instruction (Even though there isn't much to do here). I just think it would be helpful for the less experienced users. I see a few people that have completely messed up their game, so maybe just a few more steps could be added. Other than that, it's a great share OP. Will be awaiting the new config.

karanvir - August 3, 2016, 11:20 am

Im getting too much soft ban with this.

An0nym0u555 - August 3, 2016, 11:22 am

I used this bot for the past 24 hours and I got an average of 80k xp/h. Still better than anything else but for me it doesn't get me to 170k xp/h ;(

I've tried restarting the bot, restarting computer, no changes were made to any config files... Not sure what happened.

Pokemon Go recently changed their API so you will have to wait until the developers find a workaround for this, should not take too long. Changing your location will not work.

Thank you very much for the config, saves me the time of having to figure out how to configure a new bot! Mine just stopped working and I am waiting on an update, so I'll use this for now. So far I am not disappointed.

Edit: Seems this bot is having the same problem, can't find pokestops.

Just in case nobody filled you in bud, Niantic updated their API. Bots need to update too. Expect a 1 or 2 day delay until developers fix their bots :)

All bots don't work. OP will probably update thread when they do work. Please read previous posts. They updated their IPA with a new verification method that was basically dormant until this update. They need to figure out how the bot can replicate this verification in order to move forward. Chill the fuck out and wait.
