Thread: [New IP Bans/DNS Bans?](#)

Lovely? - August 3, 2016, 12:13 pm

Whit the new IP Bans and so on, will there be or is there a bot that supports proxies?

instagram.finggaz - August 3, 2016, 12:16 pm

Definitely needed... I have 250 proxies so I can go all day if they decide to blacklist my vps ip

Lovely? - August 3, 2016, 12:26 pm

Same i have a ton of private proxies ready to use.

Cold Hearted - August 3, 2016, 12:28 pm

There probably is mate, but they're most probably private.

Will be free ones soon, I'm sure.

Yea, but the bans is a good thing right now. Will increase the price of accounts and such. The prices were already being ruined.

Bans are only IP based, not account based. So prices won't change.

Sadly, haha.

Sadly, haha.

Making it harder for people to bot will hopefully increase the prices as people won't be botting 100+ accounts at once right now.

Exactly. You'd need good and stable proxies to bot. 100+ on a single IP won't work out anymore so they won't be so easy to sell. Prices will definitely increase. I know mine will lol.

RafSimons - August 3, 2016, 12:40 pm

Where did you see people getting ip banned?

Lor?d - August 3, 2016, 12:41 pm

This ^

Haven't heard anything about this.

I'm botting ~150 accs on my IP and haven't been touched

SIM-3122326 - August 3, 2016, 12:43 pm

The ones that got banned were all people using vpn with 50 bots running at the same time. Chillax.

Lovely? - August 3, 2016, 12:43 pm

There's a huge discussion on another forum, not sure if i can link it here or not.

RafSimons - August 3, 2016, 12:44 pm

Jesus christ, how big must the demand be for someone to need 50

PotatoBlood - August 3, 2016, 1:00 pm

I'm running a couple bots, an rdp got blacklisted where i ran 40 bots on, another rdp with 20 bots got blacklisted too.

My home ip where I ran 4 bots on got banned too.

10 bots on a VM with a vpn didn't got blacklisted yet.

Scrubkin2017 - August 3, 2016, 1:17 pm

10 bots 24/7(give our take a bit) for quite some time and no ban. No VPN/VM
