Thread: [Why is this image not centering?! ARGH!](#)

Code <p></p>

Why is the image not centering and sticking to the left?!

If i change it to float:right it works just fine, but why not center?!

because float:center; doesn't exist.

Yeah...

Add 'text-align: center;' to the parent container.

Or set it to 'display: block;' and add 'margin: auto;'.

If you want to be lazy then...

<center></center>
