Thread: [HELP ME WITH DARKCOMET AND JANADARK!](#)

?O?? - August 4, 2016, 4:50 am

Ok i have been going at this for hours! I build my stub with no settings on and then i open up my crypter which is JanaDark. then i crypt the stub but when i opened the RAT on my Test PC it says process failed?!! Can someone plz help me solve this on Team Viewer or something?

R00t_H4x0r - August 4, 2016, 6:46 am

pm me your skype and i will help

joepvand - August 4, 2016, 6:48 am

Darkcomet is older than your nan. Use darktrack alien

SIM-3187190 - August 4, 2016, 7:03 am

DarkComet is unstable and very vulnerable to exploits. If a slave of yours has any technological knowledge they could take control of your PC through your rat. Like the user above said, use [DarkTrack](#). When you download it, the password for the zip file is dt94

Darkcomet, Just dont do it, Save yourself

Flu0z - August 4, 2016, 12:50 pm

Don't use DarkComet.

Has multiple exploit's that can make the target actually control you.

Essence - August 4, 2016, 12:51 pm

You buy a crypter & don't even have the knowledge of realizing DC is way too outdated lol. RIP mommy's credit card =/

?O?? - August 4, 2016, 6:17 pm

Yes RIP that 10\$ for a crypter lol and thanks for the recommendation on dark track. It is very sleek looking!

And does darktrack use NOIP???
