Minecrafters seemed to do a good job on HackerCraft.

Anyways I approve of this recruitment by Derpec. Good luck.

Dude why?? Lol - August 5, 2016, 7:18 am

IGN: Trioxide

Age: 15

Portfolio: Creativity and Curiosity runs in my mind. I just get on Minecraft and build random stuff possible. Try to design things uniquely. For example I build underground/air mansions, models of cartoons, spawn points.

Years Building: 2

Here is an example -

Yes it's Pingu with a halo, black shades and a MtnDew in his hand dripping ?

IGN: CiaranL

Age: 15

Past Experience: I was developer, making custom plugins, for a community named The Chest MC on the prison and factions servers. Then I later brought the community and ran it through that. Eventually it died but I got some great experience from it with it bringing me \$1000+ in revenue before I shut it.

What plugins you specialize in the most: Permissions mostly. Can do pretty much any plugin you want.

EDIT: Would the position be paid and how much effort/money is being put towards advertising?

This is a group project, so I highly doubt it.

Dude why?? Lol - August 6, 2016, 7:12 am

Is this still up? I think you should go to minecraft forums to do this.

If only eternal was good, I could do this and get people to do this.

RIP
