Thread: [Best Vulnerability Tool?](#)

Poroshenko - August 5, 2016, 12:52 pm

I've been trying to get into my school website for a while now and it's wordpress, I tried bruteforcing but It's protected by WAF. I couldn't find anymore vulnerabilities, so I think I need a new scanner, any suggestions? Thanks.

Riggs - August 5, 2016, 12:58 pm

Acunetix, Nikto, Nessus. Expensive, but I think all three offer free trials.

Thanks, regarding the wordpress issue do you know how to bypass WAF on WPScan?

iliketrees123 - August 5, 2016, 4:46 pm

I like to use Acunetix (cracked of course, I'm not that rich), nikto and wpscan. I haven't tested golismero much but it seems good enough.

Do you know anywhere that would offer an "affordable" copy?

£239/yr is a bit steep for my intended use
