Thread: [Site EXTREMELY slow for anybody else right now?](#)

Bluffer - August 5, 2016, 8:41 pm

It's taking over 20 seconds to load any page on site right now.

Every other site loads fine for me so it's just HF?

Took over 30 seconds to click onto this thread in another tab after posting it

Riyu - August 5, 2016, 8:43 pm

Yea, It's gotten a bit better though.

Target™ - August 5, 2016, 8:43 pm

Was a little slow, not to horribly bad.

spooky hacker - August 5, 2016, 8:45 pm

Extreme lag for me too. Takes atleast 30 seconds to redirect and stuff.

edit: now it's gone ;) ///// and now it's back and worse

Vegeta - August 5, 2016, 8:46 pm

It does this from time to time for me as well, most annoying thing is when it is completely down and you can't do anything at all.

Bluffer - August 5, 2016, 8:49 pm

The thing is I was just about to pm Omni for a sticky so guess I cant yet lol. Hopefully it doesnt last long.

Egregious Jr. - August 5, 2016, 8:51 pm

Chosen 1 - August 5, 2016, 8:55 pm

Super slow for me right now, I have multiple tabs open.

'OverSight - August 5, 2016, 8:58 pm

That feel when you wanted to read this reply to say that the site is fine and it takes 30 seconds to load... lol

Knucklez. - August 5, 2016, 8:59 pm

FamousHater - August 5, 2016, 9:04 pm

its just your pc bluff

iLogic™ - August 6, 2016, 1:07 am

It has been loading slower for me yesterday and also sometimes I got 503. Sometimes it is really annoying ?

Bluffer - August 6, 2016, 1:10 am

I hope Omni will see this when he's online tomorrow, perhaps he will have an explanation but other than that I see no reason to keep this thread open. I know the site is now loading normally once again but that was odd that it wasn't working for most members all at once. Maybe it was a back-end thing like backing up the site.
