Bind to a legit file then no one will know the difference as long as it is FUD.

Spread via youtube, get some fake comments and get some views.!

Funtage - July 12, 2010, 4:28 am

If you're looking for specific types of people bind it to a related appropriate file and upload to youtube, torrent sites etc.

eg: MS Point Generator if you were looking for Xbox Live Codes and so on.

I would use a java drive by with pedophiles, as well as setup a youtube video about a program or something someone wants/desires a lot. Something that would appeal to a large group.
